P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story single-family residence in the Foursquare style built in 1920. The building has a rectangular plan. Exterior walls are wood clapboard. The building has a hipped roof clad in composition shingles with overhanging open eaves and exposed rafter tails. There is one gabled dormer centered on the roof. Windows were not visible at the time of survey; property was largely boarded up at the time of survey. The main entryway is sheltered beneath a shallow projecting porch with a gabled roof, supported by simple wood posts. The door is obscured behind a metal security door. The building has a front yard area with shrubs and grass. There are mature trees on either side of the entrance and along the north edge of the property. A central concrete walkway provides access to the main entry porch. A brick driveway is located along the south edge of the property.

Period of Significance: 1895-1925 **Property Type:** Residential **Applicable Criteria:**

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in September 2006 as part of an expedited review during the 2008 survey. It was re-surveyed as part of the 2022-2023 multi-family survey update.

1150 N. Clark Street is an unremarkable example of a Foursquare residence dating from the early twentieth century. As stated in the 2006 evaluation, it appears unlikely to meet eligibility requirements for individual significance within the context of historic residential trends or architecture/design, but technically meets local criterion B as one of few examples of a Foursquare residence within city limits, although they are ubiquitous in other parts of the region; however, City Council denied the local designation of 1150 N. Clark Street as an individual resource on November 20, 2006. No new information was revealed as a part of this updated evaluation; therefore, the property remains ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z).

Integrity could not be fully assessed as the property was boarded up at the time of survey.

Parcel No. 5560-023-030

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This single-family residence is a late example of the Foursquare style. The two-story structure has a square plan and is capped by a pyramidal hip roof with gabled central dormer. A pair of wood framed vents is set in the dormer. Both the main roof and the dormer have open eaves that reveal rafter tails. Exterior walls, on both the main structure and the dormer, are clad with wooden clapboards. The main façade is symmetrically composed. A central entrance is located on the first floor; a single window opening fills each bay on each floor. A gabled portico over the central entry has a segmental arch that appears to be clad with wooden clapboards. The portico is supported by two pairs of wood posts that stand on a concrete foundation. Concrete porch steps connect the front cement walk to the entry. Windows on the main facade consist of tripartite windows on the first floor with paired one-over-one wooden double-hung sash arranged directly above them on the second floor. Each tripartite window is composed of a fixed center sash and flanking narrow one-over-one wood sash. Simple flat surrounds frame the windows. Both the condition and integrity of the building are good.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Constructed in 1920, this residence is a late example of the Foursquare style. This "style", defined by its essential form rather than stylistic ornamentation, enjoyed great popularity in the United States from the the late 1890s through the 1920s. It spread to residential neighborhoods throughout California in this period through pattern books and Sears Roebuck & Company mail order kits. The Foursquare style is related to the contemporaneous Prairie and Colonial Revival styles in that it was governed by a simple, ordered design ethic that developed in response to the the ornate Victorian styles of the late nineteenth century. The popularity of the Foursquare style, along with the Craftsman style, waned as the popular interest in Period Revival styles grew in the 1920s. Character-defining features of the style include: a two-story box form, hipped roof, central front dormer and a frequently wide one-story front porch. Two extant examples of the nationally popular Foursquare style have been identified within the survey area in West Hollywood.

No original building permit was located in the City of West Hollywood's property records. According to County of Los Angeles Tax Assessor records, this single-family residence was originally constructed in 1920.

The building is indicated on the 1919 (revised to 1950) Sanborn map of Los Angeles (Volume 10). (The parcel was not included in the 1910 Sherman Sanborn map.) According to the 1919/1950 map, the building was located on a north-south block comprised primarily of single-family residences.

(Sketch Map with north arrow required.)

Tax Assessor records show the property owner as James E. Ledgerwood in 1920. Ledgerwood owned the property until 1939. Ledgerwood was listed in the Los Angeles City Directories from 1932 and 1938. No information was found concerning Ledgerwood on the Los Angeles Public Library's California Index or the Los Angeles Times Historical Database.

This residence appears essentially intact. The building retains most of its original material and there is no evidence of significant exterior alterations. The building retains its integrity of location, design, materials and workmanship. However, less than half of the surrounding housing stock extant in 1950 has survived and the property now stands among larger apartment buildings. As a result, the property's integrity of setting, feeling, and association are diminished.

Based on information identified as part of this survey, this building does not appear to be historically significant for its association with any person, event or broad pattern of events. However, this building is a good and intact example of a Foursquare style residence. Fieldwork completed to date has revealed only one other Foursquare residence within the City of West Hollywood's R2, R3, and R4 zones.

The City of West Hollywood has four Criteria for Designation of Cultural Resources, including "Criterion B. Example of Distinguishing Characteristics. It is one of the few remaining examples in the city, region, state, or nation, possessing distinguishing characteristics of an architectural or historical type or specimen." For purposes of this review, ARG has interpreted the term "remaining" to mean "extant." It should be noted that Criterion B does not indicate that a building must be a significant example (only a characteristic example) or that it must represent a style with any special significance to the history of the City to meet this threshold.

Although the Foursquare type was well-represented in some other local communities developed at the same time, it did not have a significant presence in the area now incorporated as the City of West Hollywood, which appears to have had only a small handful of examples. Identification of this structure as "one of the few remaining examples" of the Foursquare property type does imply that this was the last of a body of such structures that had historically been a significant part of the cityscape. It does not appear that this property type was ever significant in the historical development of the City of West Hollywood.

The residence at 1150 Clark Street is an "example of distinguishing characteristics...of an architectural type," in this case the Foursquare. This particular example is within the technical definition of the type, as delineated in the DPR form, but it is not a particularly fine or fully realized example of a Foursquare house. Our conclusion is that the property at 1150 Clark Street is not an individually significant example of this historical property type.

However, as the City's code is written, the property appears to meet a minimum threshold under Criterion B and may, therefore, be eligible for listing as a City of West Hollywood cultural resource as one of two remaining (extant) examples in the city that possesses the distinguishing characteristics of a Foursquare style residence. The property does not appear eligible for individual listing on the National or California Registers. The property has not been evaluated as a potential contributor to any district, geographic or thematic.

N.B. This evaluation has been made at the request of the City of West Hollywood as part of a citywide historic resources survey of R2, R3 and R4 properties. The City requested that an expedited review be made for those properties included in the survey that have pending demolition permits. Analysis is based upon fieldwork completed through November 2005 and available historical information and previous surveys provided by the City of West Hollywood. A historic context statement has not been fully developed to guide evaluations. As a result, the conclusions are considered preliminary, are necessarily cautious, and may change in the final analysis.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence built in 1913. Based upon satellite imagery, it appears to be roughly rectangular in shape with a cross-gabled roof clad in composition shingles with projecting eaves. The residence is accessed via a set of steep concrete stairs. At street level, there is a detached garage with a flat roof, stucco cladding, and a tilt-up door. Heavy vegetation and the topography of the lot obscure the residence from view.

This property was previously evaluated in 2008 as appearing eligible for local listing as part of a potential Craftsman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

This property was not fully visible from the public right-of-way at the time of survey due to vegetation and siting and could not be fully described or evaluated for potential significance or integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This property is largely obscured from view from the public right-of-way by mature vegetation. This Craftsman style bungalow was constructed in 1913 according to Los Angeles County property records. Oriented to the east, the house sits atop a hillside parcel and is reached by a step set of concrete stairs. Sanborn fire insurance maps indicate a slightly irregular rectangular plan. It is one-story tall and topped by a gablefront roof. A partial-width porch with a secondary gable extends across the southern half of the main facade. Decorative stickwork and braces fill the gable peaks. Field notes indicate that the building is sided with wooden clapboards. Fenestration could not be identified from the public right-of way. A one-car garage is located at the street level at the north line of the property. The property is enclosed by an iron gate.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. Although relatively few in number in relationship to their historic significance, classic Craftsman bungalows still exist in both the historic Sherman area and the eastern portion of the city that shares a developmental history with adjacent Hollywood. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment House (Type B) in the Chateauesque style built in 1941. The building is l-shaped in plan. Exterior walls are stucco. Ornamentation consists of quoins, balconettes, stringcourses, and bas-relief panels. The building has a high hip roof clad in artificial slate shingles with flush eaves. The roof is accentuated by turrets and finials and arched attic vents that echo the appearance of dormers. Multi-light wood windows are primarily fixed or casement in operation and are arranged in pairs, bays, and groups. There are two entryways on the west-facing elevation consisting of wood-paneled doors within decorative surrounds. Individual units appear to be accessed from interior corridors.The building has a communal landscaped area with mature trees, shrubs, a fish pond, and walkways.

***B6. Construction History: (Construction date, alterations, and date of alterations)**
Constructed, 1941. Build deck and relocate water heater, 1998.

***B7. Moved?** ☑ **No** ☐ **Yes** ☐ **Unknown** **Date:** **Original Location:**

***B8. Related Features:**

B9a. Architect: Unknown **B9b Builder:** Unknown

***B10. Significance: Theme** Apartment Houses: Prewar Apartment Houses; Period Revival: French Revival **B10 Area:** West Hollywood

Period of Significance: 1920-1945; 1926-1941 **Property Type:** Residential **Applicable Criteria:** A/C; 1/3; A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Prewar Apartment House property type as defined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

1234 N. Crescent Heights Boulevard appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Chateauesque style.

It possesses most character-defining features of Prewar Apartment House (Type B) property type and the French Revival (Chateauesque) architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received. (See continuation sheet.)

Sketch Map with north arrow required.

B10. Significance (Continued from Page 2): Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like La Fontaine) helped to attract tenants. French Revival was a popular style for prewar apartment buildings. French Revival is a broad term that describes architecture influenced by a variety of French buildings, ranging from the ornate (Chateauesque) to the modest (French Provincial). The style is characterized by features such as steeply pitched roofs with dormers, turrets, and towers, decorative finials, cornice lines, and stringcourses.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

1234-1240 Crescent Heights is a two-story, eight-unit building in a late French Chateau revival style. The plan of the building is a dog-leg shape running east west, with the longer east-west leg bordering the main, front courtyard on the south. There is a second, smaller landscaped area in the crook of the smaller jog in the building at the back, facing the garages. These garages are located along the eastern end of the property. The building has a great deal of period-revival detail, including but not limited to, quoining, string-course moldings, ironwork, entrance canopies, diminutive decorative turrets, and slanted-bay windows. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story Postwar Courtyard Apartment in the Late American Colonial Revival style built in 1949. The building is u-shaped in plan. Exterior walls are stucco. Ornamentation consists of a belt course, wood window shutters, and fabric awnings. The building has a hipped roof clad in composition shingles with boxed eaves. There are two brick chimneys. Windows consist of multi-light steel casement windows arranged individually, in pairs, and in groups. There are multiple exterior entryways opening onto the courtyard, consisting of wood-paneled doors within decorative surrounds. At least two entrances are sheltered under full-height rounded porticos supported by slender wood posts. Individual units appear to be accessed from a combination of interior and exterior doors.The building has a central landscaped courtyard with dense shrubs, mature trees, and brick walkways.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing. During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

B10. Significance (Continued from Page 2): American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Late American Colonial Revival is more stripped-down than its earlier counterparts, lending itself well to post-war construction. The style is characterized by symmetrical facades, pediments, and simplified features.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

Parcel No. 5554009006

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This Colonial Revival building, otherwise known as "Colonial Manor," was built around a horseshoe-shaped plan, is two stories at the north block and two stories above a basement at the south block, and contains fourteen residential units. The roofs are hipped with moderate pitches and are covered by composition shingles. Chimneys are located at courtyard-facing facades. Exterior wall facing material is stucco. Windows are multi-lite metal casements, which are flanked by fixed, louvered, wood shutters at the second-story. Ornamentation adheres to a Colonial Revival vocabulary and consists of fluted corner pilasters, lintels, and sill courses. The main entrance is located in the middle of the east (primary) façade and is comprised of a wrought iron gate set atop a low brick wall. A brick path leads from the entrance gate to a deep, central courtyard. North and south courtyard-facing facades have balconies. The courtyard contains dense plantings located in central and perimeter planter areas and is marked by winding brick footpaths. A single-story garage with a flat roof is located to the west of the building. The courtyard and primary façades are landscaped with small bushes and mature trees. This building was designed in 1949 by Sandol (or something similar-the name is difficult to discern on the original building permit) for owner James S. Anzalak and constructed for $100,000. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story Postwar Courtyard Apartment built in 1948. The building is u-shaped in plan. Exterior walls are stucco. Ornamentation consists of metal lattices and a belt course. The building has a hipped roof clad in composition shingles with projecting boxed eaves. Non-original vinyl sliding windows with false muntins are arranged individually, in pairs, and in groups of three, as well as wrapping around corners of the building. Entrances are not visible from the public right-of-way; however, individual units appear to be accessed from interior corridors. There is a vehicular entrance to subterranean parking on the east elevation. The property has a central hardscaped courtyard with a swimming pool surrounded by planters. There are stairs and terraced landscaping at the front of the property with hedges and foundation plants.

Period of Significance: 1945-1969 **Property Type:** Residential **Applicable Criteria:** N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Postwar Courtyard Apartment property type, but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design and materials have been diminished by the installation of non-original vinyl windows.

1251 N. Crescent Heights Boulevard was also evaluated as part of a potential district in the Crescent Heights Study Area; however, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story vernacular modernist apartment building has a square plan and a small court in the center with a swimming pool. The building sits over a subterranean garage with access near the center of the street façade. Exterior walls are finished in stucco and the lower part of the street façade is faced in brick. The hipped roof is clad in composition shingle and has overhanging eaves. A simple stringcourse molding at the sill level of the second-floor windows divides the first and second floors of the building. Fenestration consists of divided light metal casement windows of varying sizes; shutters flank windows on the second floor and decorative metal screen panels are located alongside some of the windows. Apartment entrances are located to the side of the building. A pair of short brick retaining walls to either side of the central subterranean garage bushes and a few trees. The building is in good condition and appears to have good integrity. Monroe Sanden (the name is difficult to discern on the building permit and may also read Sandol) designed the building in 1948 for owner James S. Amzalak. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story Prewar Courtyard Apartment in the Early American Colonial Revival style built in 1939. The two buildings are rectangular in plan. Exterior walls are stucco. Ornamentation consists of decorative window and door surrounds, quoins, and belt courses. The buildings have hipped roofs clad in composition shingles with boxed eaves and decorative molding. Multi-light wood windows are fixed, double-hung, or casement in operation. They are arranged individually and in tripartite bays. There is a multi-light octagonal window above the entry on the primary elevation. Visible entrances on the primary elevations consist of single wood-paneled doors within decorative pedimented surrounds with fluted pilasters. Individual units appear to be accessed from interior corridors.There is a front yard with mature trees and a concrete walkway separating the two buildings.

***B10. Significance: Theme** Apartment Houses: Prewar Apartment Houses; Period Revival: Early American Colonial Revival **B10 Area:** West Hollywood

Period of Significance: 1920-1945; 1919-1939 **Property Type:** Residential **Applicable Criteria:** N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses character-defining features of the Postwar Courtyard Apartment property type and Early Colonial Revival style, but lacks distinguishing architectural detailing when compared to similar, more fully realized examples of the property type in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

1263-1269 N. Crescent Heights Boulevard were also evaluated as part of a potential district in the Crescent Heights Study Area; however, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two story, hipped roof apartment building was designed in the Colonial Revival style. It is L-shaped in plan and is abutted by a courtyard landscaped with lush foliage on the north that is shared by an identical building located at 1269 Crescent Heights. Exterior walls are finished in stucco. Fenestration is composed primarily of multi-light wood sash windows; a large bay window is located at the north section of the first floor. Ornamentation at the primary façade includes balconies with decorative rail located on the second floor of the building. The edges of the primary façade are embellished with quoins. Access to the building is through a central door; apartment entries are also located on the north side along the landscaped courtyard. The condition and integrity of the building are good. J.J. Rees designed the building in 1939 for owner John M. Cameron; it was constructed for $24,900. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This Colonial Revival style building is sited on a wide lot located near the middle of the west side of the block. Roughly rectangular in plan and two stories, the building is a symmetrical, mirror image of 1263 Crescent Heights; they enclose a deep, slender courtyard that opens toward the east (primary) façade. The roof is hipped, has a moderate pitch, and is covered with composition material. Exterior wall facing material is stucco. The façade fenestration pattern consists of a combination of square and octagonal multi-lite wood sash windows. The windows at the first floor of the primary façade is crowned by pediments or bayed and some windows at the second floor are embellished by balconets. The entrance door at the east façade is framed by fluted pilasters and capped by broken pediments in the Colonial Revival tradition. Dense landscaping of mature trees, shrubs, and deep swaths of lawn accent the front yards of 1263-1279 N. Crescent Heights Boulevard. The courtyard contains a large, rectangular swimming pool. Three automobile garages, rectangular in plan, are located to the west at the rear of the lot. The buildings were designed in 1939 by J.J. Rees for owner John M. Cameron and constructed for $24,900. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence built in 1912. Based on what is visible, the building is rectangular in plan. The building has a front-gable roof clad in composition shingles. The property is fully obscured from the public right-of-way as it is surrounded on all four sides by private property. It is accessed via a walkway that extends north from the sidewalk along Cynthia Street.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This property is not visible or accessible from the public right-of-way. Based on available information, it is expected that this property is similar in style and type (Craftsman bungalow) to those buildings that surround it. Descriptive information provided as part of this documentation is based on information from historic Sanborn maps and should be verified prior to any further action. Oriented to the west, the structure has a rectangular plan and is one story tall. A partial-width porch is located on the south side of the main façade and is incorporated under the main roof. Condition and integrity of the property are unknown.

Descriptive information, condition and integrity should be confirmed prior to any action by the City.

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B. In addition, it may be eligible for listing on the California and National Registers, at the local level of significance, as part of a Craftsman district on the north side of Cynthia Street, between San Vicente Boulevard and Larrabee Street.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

According to county tax assessor records, this building was constructed in 1912. This single-family residence is a small but typical Craftsman-style bungalow. Oriented to the south, the building is one-story tall with a slightly irregular rectilinear plan; a small bump-out on the east side of the building extends from an otherwise rectangular plan. The building is topped with a gable-front roof with open eaves with exposed rafter tails, typical of the style. Exterior walls are clad with wooden clapboard, marked only by simple cornerboards and vented gable peaks. The main façade is symmetrically composed, beneath a full-width porch. The porch design is unique in its construction. Square porch columns set stop square piers are topped by a simple beam that again intersects with perpendicular braces below the center gable and at the ends of the gable. It is unclear whether these elements are original. Fenestration on the main façade is composed of a single window flanking each side of the central entrance. Windows one-over-one double-hung sash that appear to be non-original metal; however, these windows are set in original openings and casings. Windows and doors are trimmed with flared wooden surrounds. Both the condition and integrity of the property are good.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B. In addition, it may be eligible for listing on the California and National Registers, at the local level of significance, as part of a Craftsman district on the north side of Cynthia Street, between San Vicente Boulevard and Larrabee Street.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2 and 3-story Prewar Apartment Building (Type B) in the Chateauesque style built in 1936. The building is l-shaped in plan. Exterior walls are stucco. Ornamentation consists of corbels under projecting volumes, wood window shutters, wrought iron railings, and decorative door surrounds with dentilled headers and fluted pilasters. The building has a high hip roof clad in composition shingles with flared, boxed eaves. The roof is accentuated by arched attic vents that echo the appearance of dormers. There are three interior, stuccoed chimneys. There are variety of window types on the street-facing elevations, including multi-light wood fixed, casement, and transom windows; one-over-one double-hung wood windows; and tripartite projecting bays consisting of fixed wood windows with leaded glass. There are several entryways on the street-facing elevations consisting of wood doors with decorative surrounds. Individual units appear to be accessed by a combination of exterior and interior doors. There are numerous recessed and projecting balconies.The building has concrete walkways lined with hedges that curve through manicured lawns and around a circular planter with mature palms. Larger shrubs and trees are planted near unit entrances.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Prewar Apartment House property type as defined in the 2023 Historic Context Statement.

8336 De Longpre Avenue appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Chateauesque style.It possesses most character-defining features of the Prewar Apartment House (Type B) property type and Chateauesque architectural style, as outlined in the 2023 Historic Context Statement.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like La Fontaine) helped to attract tenants. (See continuation sheet.)

*Required Information

B10. Significance (Continued from Page 2): French Revival is a broad term that describes architecture influenced by a variety of French buildings, ranging from the ornate (Chateauesque) to the modest (French Provincial). The style is characterized by features such as steeply pitched roofs with dormers, turrets, and towers, decorative finials, cornice lines, and stringcourses.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

8336-46 De Longpre is an impressively sited, three-story, late French Chateau, eleven-unit residential building that follows the curve of De Longpre. The southern wing meets the southernmost part of the eastern wing at a right angle, but then cranks around diagonally to the northeast at the top of the building. The massing of the building contrasts two- and three-story sections that flow into each other because of the tall,steeply pitched roof. Bay windows, horizontal balconies, and the picturesque composition of the building make the building a memorable part of this section of De Longpre St., which is afforded views of the Sunset Tower Hotel, and Hart Park and the historic William S. Hart house. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

1317-19 Fairfax is a stucco-finished, ten-unit Minimalist Traditional style building with a hipped roof. The building has double-hung, wood windows and some quoining at corners and around entry doors. The plan of the building is L-shaped with the long leg of the L running east-west and the short leg at the western edge of the building. Garages are in a separate building at the western rear section of the property. The well-landscaped courtyard is open to the street. This building matches the architecture of, and complements, the two buildings to the north at 1321-1327 Fairfax. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

1321-27 Fairfax consists of two, minimal traditional buildings, each housing ten units. They are in the form of mirror image L-plan buildings surrounding a well landscaped central courtyard opening to the street. The long leg of the buildings runs east west, and the other short leg is at the western end of the building. Garages are in separate structures at the western, rear side of the property. This buildings matches the architecture of, and complements, the two buildings to the south at 1317 -19 Fairfax. The buildings are in good condition and retain good integrity. This complex of buildings contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence constructed in 1911. The building is rectangular in plan. Exterior walls are stucco. The building has a front-gabled roof clad in composition shingles with open eaves. Windows consist of multi-light vinyl sliding windows. The main entrance is located in the center of the primary elevation and consists of a single wood door. There is a secondary building located to the rear of the property. The property is mostly paved in concrete apart from a small area at the front with drought tolerant plants.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It lacks the aspects of integrity essential to conveying this potential significance.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, integrity of design, workmanship, and material have been diminished by a substantial remodel in 2019, including replacement of all windows, installation of non-original cladding, and removal of the porch.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This Craftsman bungalow, constructed in 1911, is obscured from the public right of way by trees, shrubs, and a wood fence. Oriented to the east and rectangular in plan, the building features a gable roof, original windows, and wood clapboard siding. A full-width porch with a gable roof extends across the main façade. A latticed vent at the gable peak forms an inverted V- shape. According to Sanborn Fire Insurance maps and County Assessor's Records, there is a secondary dwelling unit, constructed in 1939, located at the rear of the parcel.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. Although relatively few in number in relationship to their historic significance, classic Craftsman bungalows still exist in both the historic Sherman area and the eastern portion of the city that shares a developmental history with adjacent Hollywood. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story multi-family residence built in 1916. Based upon satellite imagery, it appears to be a bungalow court consisting of five 1- to 2-story buildings arranged roughly in a U-shape. The buildings are generally rectangular in plan and have flat roofs. Visible elevations are clad in stucco and appear to include vinyl and jalousie windows. Heavy vegetation including mature trees obscures much of the property from view.

Parcel No. *5531005005*

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story complex is composed of 15 units in five buildings around a central courtyard on a single parcel, with a larger structure centered at the rear of the courtyard. The buildings are all two stories in height; the second stories, often having a smaller footprint, may have been added at a later date. The original, early building type is consistent with the 1916 date found in the county tax assessor's records, but the buildings have some clearly later style characteristics, particularly on the second stories as well as the abundant tropical courtyard plantings that are highly characteristic of West Hollywood apartments in the 1950s. The wood-frame buildings are finished in non-original stucco with non-original narrow horizontal board siding spanning the spaces between the second-floor windows. Fenestration is non-original louvered windows set in some original wood frames with projecting sills; first floor windows are covered with security bars. Window openings on the second story are set closer to the corners than those on the first floor. Small concrete entrance porches are sheltered by projecting canopies with exposed framing. This two-story apartment building is rectangular in form and comprises part of a U-shaped apartment complex with a lush, long, open courtyard. It is covered by a flat roof with exposed rafter tails; a shed roof element supported by projecting beams is attached to the southwest section of the building. The building is framed in wood; the first floor is finished in stucco that does not appear original and the second floor is clad in narrow clapboarding that may be original. (See continuation sheet.)

P3a. Description continued:

Fenestration is composed of small non-original louvered windows set in original wood frames with projecting sills; first floor windows are covered with security bars. The width of the first floor wall extends beyond that of the second. A short concrete stair leads to the front entry that is set in a wood surround. The landing is enclosed along the edges by iron railing. The condition of the building is fair and its integrity is somewhat compromised by the alterations. No original building permit was located in the City of West Hollywood's property records, but tax records indicate that it was built in 1916. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1910. The building is irregular in plan. Exterior walls are stucco and wood siding. There is one exterior stucco chimney. The building has a gabled roof clad in composition shingles with open eaves and exposed rafter tails. Windows consist of multi-light and single-light wood casements and double-hung windows. The main entryway is located inside the enclosed front porch fronting Fuller Avenue. There is a one-story garage located at the rear of the property facing Fountain Avenue. The building has a concrete walkway, lawn, and plant beds all surrounded by a chain-link metal fence. A short concrete driveway faces Fountain Avenue.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This one-and-a-half story, Craftsman, residential structure is located on the southwest corner of Fuller and Fountain Avenues. Constructed in 1910, the building is oriented to the east, and has a secondary address of 1259 Fuller. The main (Fuller) elevation features a low-pitched, side-gable roof with a central gabled dormer, wood, horizontal siding, and wood, one-over-one and multi-pane fixed windows. The first story features a one-story, full-width porch, which is enclosed with glazing. Exposed rafter tails are visible at the eaves. The porch entrance, located in the center of the façade, is flanked by wood, louvered panels and squared porch supports. The dormer features a latticed vent at the gable peak, wide eave overhangs, brackets, and a pair of double-hung windows. The front yard of the parcel is landscaped with trees and shrubs and separated from the public right of way by a chain-link fence. The Fountain façade features a gabled, one-story secondary entrance. Although originally a single-family residence, the building may have been converted to a house two flats circa 1930.

Period of Significance 1910 **Property Type** Bungalow **Applicable Criteria** _____

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. The subject property is one of only a few examples in the survey population of significant size and scale. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence built in 1912. Based upon satellite imagery, it appears to be roughly rectangular in plan with a cross-gabled roof clad in composition shingles. Visible elevations are clad in horizontal wood clapboards and appear to include hung wood windows and battened porch supports. Heavy vegetation and fencing obscures much of the property from view.

Parcel No. 5530005003

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This one-story Craftsman bungalow, oriented to the north, was constructed in 1912 and has a slightly irregular rectilinear plan. The front yard is landscaped with trees and shrubs, which partially obscure the west end of the main façade. The building features wood clapboard siding, gable roof with composition shingles, and wood sash windows. A porch wraps around the northeast end of the building beneath a secondary front-facing gable roof. The porch has wood, vertical siding at the gable face and squared porch supports. The main gable features a vent at the peak with a wood screen. Exposed purloins project out from the roof eaves. One and two-story additions are located at the rear of the building do not appear to be original to the building. A secondary structure, constructed in 2003, is located at the rear of the parcel.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1915. The building is rectangular in plan. Exterior walls are wood siding. The building has a side-gabled roof clad in composition shingles with open eaves and exposed rafter tails. There is an interior brick chimney. Visible windows consist of one-over-one double-hung wood windows. The main entrance faces east toward N. Ogden Drive and consists of a single door obscured behind a screen door. There is a rectangular, flat-roof addition at the southeast corner of the building and a detached garage to the southwest. Landscaping consists of planters within a concrete block retaining wall. A concrete driveway runs along the west edge of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses character-defining features of the Craftsman style but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design has been diminished by an incompatible addition.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This one-story Craftsman bungalow, oriented to the east facing Ogden Drive, at the corner of North Ogden Drive and Fountain Avenue, is partially obscured by trees and shrubs at the front yard of the parcel. Low concrete walls border the parcel along Ogden Drive and Fountain Street. Constructed in 1915, the building features a gable roof with exposed rafter tails and horizontal wood siding. A flight of concrete steps leads from the public right of way to the main entrance, which is located at the northern end of the main (east) façade. A flat-roof addition is visible at the main (east) elevation. Although window locations have been retained, windows have been replaced with jalousie windows. Prior to subdivision, the building previously shared a lot with two structures to the west.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story single-family residence in the Dutch Colonial Revival style built in 1917. The building is irregular in plan. Exterior walls are wood siding and wood shingle. There is a brick chimney on the rear elevation. The building has a side-gable roof clad in composition shingles with open eaves and exposed rafter tails. Windows consist of multi-light wood casement windows behind screens along the second story and metal security bars on the first floor. The main entryway was not visible at the time of survey, but is accessed by a porch on the primary elevation. There is a detached, two story garage with an apartment on the second floor to the west of the main building and a two-story detached apartment to the rear of the main building. The buildings are surrounded by tall hedges in raised, brick planters. A concrete and brick driveway is located along the west elevation.

e. Other Locational Data: (e.g., parcel #, directions to resource, elevation, etc., as appropriate)

Parcel No. 5530002044

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story single family residence, constructed in 1917 and oriented north, exhibits both Craftsman and Dutch Colonial Revival stylistic characteristics. Trees and shrubs obscure the first story of the main elevation from the public right of way. Rectangular in plan, the building is clad with wood shingles and features a gambrel roof with composition shingles and two gabled dormers symmetrically arranged at the second story. Exposed rafter tails are visible at the roof eaves. The dormers feature composition roof cladding, exposed rafter tails, and multi-lite casement windows. A partial-width porch on the east half of the main façade is covered with a gable roof. A brick chimney is centrally located at the ridge of the gambrel roof. To the west of the building is a secondary garage structure with a gambrel roof and wood shingle siding. A dwelling unit with multi-lite casement windows is located above the garage. A pair of wood garage doors with diagonal bracing faces north to the public right of way.

This property does not appear to be an individually signficant example of its architectural style or type, nor is it associated with the development of the Sherman area. This property does not appear to be individually eligible for historic designation at the local, state, or federal level. Given the stylistic influence of the period revival on the form and ornamentation of this house, this is not considered a characterstic or typical example of a Craftsman residence or bungalow.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2 and 3-story Prewar Apartment House (Type B) in the Chateauesque style built in 1939. The building is l-shaped in plan. Exterior walls are stucco. Ornamentation consists of dentils and string courses. The building has a high hip roof clad in composition shingles. with flush eaves and multiple hip-roofed dormers. The roof is accentuated by turrets, finials, and rounded wall dormers. There are three stuccoed chimneys. Windows consist primarily of multi-light steel casements multi-light wood casements arranged individually as well as in pairs and groups. There are two entryways consisting of wood-paneled doors within decorative pointed arch surrounds. Individual units appear to be accessed from interior corridors.The building has a landscaped area with shrubs, mature trees, walkways, and a sign reading Chateau Frontenac.

***B10. Significance: Theme** Apartment Houses: Prewar Apartment Houses; Period Revival: French Revival **B10 Area:** West Hollywood

Period of Significance: 1920-1945; 1926-1941 **Property Type:** Residential **Applicable Criteria:** A/C; 1/3; A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Prewar Apartment House property type as defined in the 2023 Historic Context Statement.

8247 Fountain Avenue appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the French Revival (Chateauesque) style.It possesses most character-defining features of the Prewar Apartment House (Type A) property type and French Revival (Chateauesque) architectural style, as outlined in the 2023 Historic Context Statement.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like La Fontaine) helped to attract tenants. (See continuation sheet.)

Sketch Map with north arrow required.

B10. Significance (Continued from Page 2): French Revival is a broad term that describes architecture influenced by a variety of French buildings, ranging from the ornate (Chateauesque) to the modest (French Provincial). The style is characterized by features such as steeply pitched roofs with dormers, turrets, and towers, decorative finials, cornice lines, and stringcourses.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

Parcel No. *5555002015*

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This is a twelve-unit, two-story late French Chateau style building sited atop a steep slope overlooking Fountain Ave. The chief feature of the building is the steps and jogs it makes as it rises with its sloping site. The L-shaped plan of the building, with the long leg running north south, surrounds the courtyard on two sides. This courtyard is open to and clearly visible from the street. In addition to the prominent, steep roof, the building has large and small conically roofed turrets, corbels and quoining, gothic arch entries with art-deco style, compound arch with a Gothic, flattened point. Garages are located at the north end of the property. This property is particularly significant because it was constructed very late for a period-revival building in this style - almost the last year this kind of elaborate period-revival building would have been constructed in Southern California. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses character-defining features of the Craftsman style but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design and materials have been diminished by the installation of non-original windows.

Parcel No. 5531003006

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This single-family residence is a good example of a Craftsman-style bungalow. Oriented to the east, the structure is a slightly irregular rectangle in plan and is one-story tall. A low-pitched, front-facing, gabled roof, with a secondary front-facing gable over a front projecting bay, top the building. A shed roof extends from the main block of the building and shelters a large porch. All roof sections are covered in composition shingles. The soffits are open, and lattice vents are located in the gable ends. The main facade is asymmetrically composed with a large porch at the south end and a projecting bay at the north end. Vertical wood posts resting on brick piers support the porch. The building's walls are clad in staggered square-butt shingles. Behind the porch, there is a tripled window composed of a large window with multi-lite transom flanked by tall, narrow, double-hung windows. North of the window, there is a wood door with multi-lites in the upper section. At the projecting bay, there is a second tripled window composed of a large, central, fixed window framed by two narrow windows; these appear to be replacement sash. The condition and integrity of the building are good. Sanborn maps and visual field inspection indicate there is a second dwelling to the rear of the parcel.

Period of Significance 1914 **Property Type** Bungalow **Applicable Criteria** A1,A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. Although relatively few in number in relationship to their historic significance, classic Craftsman bungalows still exist in both the historic Sherman area and the eastern portion of the city that shares a developmental history with adjacent Hollywood. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-and-a-half-story single-family residence built in the Craftsman style in 1909. The building is rectangular in plan. Exterior walls are clad in asphalt shingles. There is one chimney. The building has a side-gabled roof clad in composition shingles with open eaves and exposed rafter tails. Windows consist of single-light casement and fixed windows. The entry porch has stone-clad supports, a single wood entry door flanked by sidelights, and is accessed by a set of concrete steps. There is a two-story, detached building to the rear of the main building. The property has a deep front yard surrounded by hedges. A centered concrete walkway leads to the porch and there is a driveway at the north end of the property.

Period of Significance: 1895-1925; 1906-1931 **Property Type:** Residential **Applicable Criteria:** Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

1243 N. Fuller Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and Craftsman architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

Recorded By: Amanda Duane **Date:** 8/26/2023 ☑ Continuation ☐ Update

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This Craftsman style residence was constructed in 1909 according to LA County Tax Assessor records. Oriented to the east, the house has an essentially square plan. It is one -and-one-half stories tall. A deeply sloping sidegable roof is pierced by a nearly full-width shed roof dormer. Exposed rafter tails are visible under the open eaves of both the primary and dormer roofs. Exterior walls appear to be covered with asbestos siding that is not original. The main facade is symetrically composed. A full-width porch open, supported by four stout columns, is recessed beneath the primary roof at the first floor. The porch columns are clad with stone which may not be original. Beneath the porch, a wide central front door is flanked by tall narrow sidelights. A large multi-light window opening fills the wall on either side of the entrance. On the upper level, a paired central window and two, three-part windows line the dormer wall. Windows and doors appear to have simple wood surrounds. Both the condition and integrity of the property are fair. A spectacular wood fence encloses the property at the sidewalk.

Sanborn Fire Insurance maps indicate a secondary freestanding dwelling at the rear of the property. This could not be confirmed in the field.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. The subject property is one of only a few examples in the survey population of significant size and scale. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing ineligible for listing as an individual resource. It was re-surveyed as part of the 2022-2023 multi-family survey update.

This property was approved for redevelopment in 2019. No new information was revealed since that time as a part of this updated evaluation; therefore, the property remains ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). Although intact, it is an unremarkable example of the Craftsman and American Colonial Revival styles, and does not appear to have an important association with residential development in West Hollywood; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

Parcel No. 5530-015-011

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This single-family residence is a modest example of a Craftsman style bungalow with influences of the popular Colonial Revival style. Oriented to the west, the building is irregular in plan and one-story tall. Exterior walls are clad with narrow wooden clapboards. A side-gabled roof is covered in composition shingles. A large front gable intersects the main roof behind the ridgeline. The main façade is asymmetrically composed. The southern side of the façade is sheltered by a projecting gambrel-roofed porch that is also covered in composition shingles. The porch is supported by a pair of smooth round columns with Doric capitals. Non-original tile steps connect the cement and tile walk to the entrance door. Pairs of original multi-light wood casements flank the entry door. The wall of the northern side of the façade is filled with an original tripartite window with stylized Craftsman muntins; it is composed of a center wood sash and flanking narrow wood sash. Fenestration is adorned with flat window surrounds. This property is obscured from the public right-of-way. Both the condition and integrity of the property are good.

Constructed in 1920, this bungalow is an example of the Craftsman style with influences of the popular Colonial Revival style. The Craftsman style was extremely popular in Southern California residential architecture from 1910 to 1926, with its zenith in the 1910s. The design of Craftsman residences constructed during the 1920s, like the subject property, was influenced by the rising popularity of the Colonial Revival and Neoclassical styles. Such structures typically retained the compact plans, gable roofs with overhanging eaves, exposed rafters and purlins, and windows associated with the Craftsman style. Porches, while still prominent, tended to reflect changing stylistic tastes with Colonial Revival or Neoclassical elements such as pediments, and round columns with classical capitals. Throughout the Craftsman period, the style was used in the design of both single-family and multi-family residences including duplexes, fourplexes, and bungalow courts.

No original building permit was located in the City of West Hollywood's property records. According to County of Los Angeles Tax Assessor records, this single-family residence was originally constructed in 1920.

Date of Evaluation: *8-23-06*

(This space reserved for official comments.)

B10. Significance continued:

The building is located on the 1926 (revised to 1950) Sanborn map of Los Angeles (Volume 20). According to the 1926/1950 map, the building was located on a west-facing block of primarily single-family residences. The opposing, east-facing block was composed of thirteen parcels that, in 1950, were comprised of eleven single-family residences, one flat, and one store.

This single-family residence appears intact with minimal evidence of alterations. The building retains its integrity of location, design, materials and workmanship. However, less than half of the surrounding housing stock extant in 1950 has survived. As a result, the building's integrity of setting is diminished. Integrity of feeling and association are also partially diminished as a result of the loss of its surrounding context.

Based on information identified as part of this survey, this building does not appear to be individually significant for its historic association with any person, significant event, or broad pattern of events. While this building does not represent the work of a master, this property does embody the distinguishing characteristics of a building style and type- the Colonial Revival Craftsman bungalow. However, fieldwork has revealed a number of structures of comparable quality, style and type that retain equal level of integrity located within the City of West Hollywood. The property does not appear to be an individually significant or rare example of the type.

Therefore, the property does not appear eligible for individual listing on the National or California Registers or as a City of West Hollywood Cultural Resource.

N.B. In September 2005, ARG was contracted by the City of West Hollywood to conduct a historic resources survey of all R-2, R-3, and R-4 zoned parcels in the City. These parcels are generally developed with multi-family housing of various eras, styles, and density; however, some parcels with these zoning designations contain older single-family residences. During the course of the survey, the City has periodically requested that ARG conduct an expedited historical assessment for those properties included in the survey area that have pending demolition permits.

With reconnaissance fieldwork and preliminary research related to historic contexts completed (February 2006), there appears to be minimal potential for historic districts containing older single-family residences to exist in the areas zoned multi-family. During the reconnaissance phase approximately 600 single-family residences were found throughout the multi-family zoned survey area. There does not appear to be a significant cluster of single-family resources that retains integrity within the survey area due to the intrusion of infill, larger-scaled development and the incremental loss of original materials on many of these older single-family residences. There may be potential historic districts or clusters of significant single-family resources outside of the multi-family zoned areas of the city. ARG did not survey these areas, nor were contexts associated with single-family development in greater Los Angeles County explored.

For purposes of this expedited review prepared after completion of fieldwork, ARG did not conduct ownership or tenancy research on this single-family property as it has been found that little historical data is generally available with regard to owner or occupant. Additionally, it was determined that there was minimal chance that this information would lead to a determination of individual significance.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

1151 N. Genesee Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Single-Family Residence property type and Craftsman style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet).

***Required Information**

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

Parcel No. 5530003039

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This one-story Craftsman bungalow, rectangular in plan and oriented to the east, features a gable roof, wood shingle siding, and original wood, multi-lite windows. Constructed in 1915, the building's parcel is bordered by a metal fence and landscaped with trees, shrubs, and small plantings. A full-width porch extends across the main façade featuring squared piers and a wood balustrade. The main entrance is centrally located at the first story and accessible via a short flight of concrete steps. Two sets of triple window arrangements flank the main entry door. There are no visible alterations and Sanborn Fire Insurance maps indicate that the parcel includes a separate garage structure at the rear. Both the condition and integrity of this property are good.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. Although relatively few in number in relationship to their historic significance, classic Craftsman bungalows still exist in both the historic Sherman area and the eastern portion of the city that shares a developmental history with adjacent Hollywood. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing ineligible for listing as an individual resource but was included in 2017 in the Lexington-Curson Residential Historic Resources Survey study. It was re-surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Craftsman style and Single-Family Residence property type, but lacks distinguishing architectural detailing when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

e. Other Locational Data: (e.g., parcel #, directions to resource, elevation, etc., as appropriate)

Parcel No. 5530006003

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This one-story Craftsman bungalow with Colonial Revival influences, constructed in 1919, is partially obscured by shrubs in the front yard of the parcel. The building, rectangular in plan and oriented to the north, features a side-gable roof, asphalt roof shingles and wood, horizontal clapboard siding. A vent with thin vertical wood slats is located at the intersecting gable peak at the roof. The front façade is symmetrically composed with a central gable-front porch. Simple, round column supports with Doric capitals, frame the porch entrance. A simple pergola extends from the porch towards the east end of main facade. The main entrance is flanked by two fixed, wood sash windows with a band of evenly divided lights at the top. A paved driveway forms the eastern boundary of the parcel. Sanborn Fire Insurance maps indicate a separate garage structure located at the rear of the parcel. No major alterations were noted.

This property does not appear to be an individually signficant example of its architectural style or type, nor is it associated with the historical development of Sherman. This property does not appear to be individually eligible for historic designation at the local, state, or federal level. This is not a representative example of a classic Craftsman bungalow. This property has not been evaluated as part of any district, geographic or thematic.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping, and was included in 2017 in the Lexington-Curson Residential Historic Resources Survey study. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

7512 Hampton Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and the Craftsman style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet).

*Required Information

B10. Significance (Continued from Page 2): Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1916. The building is rectangular in plan. Exterior walls are wood shingle. The building has a cross-gabled roof clad in composition shingles with open eaves and projecting roof beams. Windows consist of double-hung and fixed wood windows. The primary entryway is located under the covered porch and consists of a single wood door. The porch is supported by battened wood columns with brick piers and accessed by a set of shallow concrete steps. A one-story detached garage is located to the rear of the main building. The building has a front yard area with a lawn and a concrete walkway and driveway.

***B10. Significance: Theme** Single-Family Residences and Secondary Dwellings; Craftsman **B10 Area:** West Hollywood

Period of Significance: 1895-1925; 1906-1931 **Property Type:** Residential **Applicable Criteria:** Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping, and was included in 2017 in the Lexington-Curson Residential Historic Resources Survey study. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

7518 Hampton Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and the Craftsman style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet).

***Resource Name or #:**(Assigned by Recorder) 7518 Hampton Ave

Recorded By: Amanda Duane **Date:** 8/26/2023 ☑ Continuation ☐ Update

B10. Significance (Continued from Page 2): Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This single-family Craftsman style residence is framed in wood and basically square in plan. It is framed in wood and clad in long wood shakes. The roof is a front-facing gable clad in composition shingle with exposed rafter tails and extended purlins. The L-shaped concrete entrance porch at one corner is covered by a flat roof carried on square piers that rest on brick bases with concrete coping. The three-part main window centered on the primary façade is composed of a central fixed window with a multilight segment across the top, and double-hung windows to either side with a similar multilight segment across the top of the upper sash. Sanborn maps indicate a separate garage located at the rear of the parcel. The residence is in good condition and has good integrity.

Period of Significance 1916 **Property Type** Bunglaow **Applicable Criteria** A1,A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. Although relatively few in number in relationship to their historic significance, classic Craftsman bungalows still exist in both the historic Sherman area and the eastern portion of the city that shares a developmental history with adjacent Hollywood. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

d. UTM: (Give more than one for large and/or linear resources) Zone ; mE/ mN

e. Other Locational Data: (e.g., parcel #, directions to resource, elevation, etc., as appropriate)

Parcel No. 5530007001

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This single family residence is largely obscured from the street by a high wood fence and foliage. The property is oriented to the north and, according to historic Sanborn maps, has a rectangular plan. It has a front-facing gable roof and appears to be a simple example of the Craftsman style, but the fenestration, cladding, and other features are not visible from the street due to the fencing and plantings. Sanborn maps indicate the existence of a small secondary dwelling and a separate garage at the rear of the parcel; however, these were not visible from the public right-of-way. The condition and integrity of this property is unknown.

As a modest single-family Craftsman-style residence, this property is not likely an individually significant example of its architectural style or property type. It is not likely to be eligible for individual designation at the state or federal level. However, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under Criterion B. However, the property's type, style, condition, and integrity should be confirmed prior to any further action by the City.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-and-a-half-story single-family residence in the Craftsman style built in 1910. The building is rectangular in plan. Exterior walls are wood siding. The building has a side-gabled roof clad in composition shingles with shallow, open eaves and exposed rafter tails. The building was boarded up at the time of survey and additional features were not visible. The building has a front yard area with a central walkway and mature trees.

Parcel No. 4340026010

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This property is partially obscured by a vine-covered latticework fence at the property line. According to county tax assessor records, this building was constructed in 1910. Oriented to south, this single-family residence has a rectangular plan. It is two stories tall and topped by a side gable roof. The exterior walls are sheathed with wooden clapboards; the roof is covered with composition shingles. The main façade is symmetrically composed. A porch extends the full-width of the building's main façade. A horizontal band of paired windows, each separated by a wide flat mullion, extends the full-width of the second floor beneath a pent-roof, piercing the plane of the side-gable roof. Second-floor windows are comprised of multi-pane wood casements and appear to be original; windows and doors on the first floor are obscured from view. Both the condition and integrity of this property are good.

B10. Significance: **Theme** Settlement **Area** West Hollywood (Sherman)

Period of Significance 1910 **Property Type** Residence **Applicable Criteria** A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Sherman was originally settled on 12 acres of land north of the railway tracks along Santa Monica Boulevard. The former barley fields were purchased from Thomas and Leander Quint by E. H. White in 1896 and subdivided for the townsite. The town grew in response to the need for worker housing for those men who worked in the Sherman railyards, proving housing for many of the railway craftsmen who worked in the yards, metal shops and barns. By 1910, the community that had grown to a population of 900. Modest wood-frame, turn-of the-century cottages and small Craftsman bungalows were typical of this early period of development.

In 1919, "West Hollywood" was generally considered the area bounded by Beverly, La Brea, Sunset, and Doheny which included Sherman. Although the nearby town of Hollywood was annexed to the City of Los Angeles 1910, the town of Sherman voted against annexation by a narrow majority in 1924. The following year, the town of Sherman voted to change its name to "West Hollywood," both maintaining its individual identity and merging its future that of its neighbors to the east.

The subject property represents a vernacular residence with Craftsman influence, associated with the early growth of the Sherman area in the first decade of the twentieth century. It does not appear to be individually significant as an example of its style or type, or for its association with the growth and development of Sherman at the state or federal level. However, within the survey population, there are relatively few intact examples of properties associated with the history of Sherman. Therefore, it may be eligible for listing at the local level, as part of an expanded Sherman thematic district or, individually, under Criterion B

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Prewar Apartment House property type as defined in the 2023 Historic Context Statement.

1263 Havenhurst Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Prewar Apartment House (Type B) and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants. (See continuation sheet.)

(This space reserved for official comments.)

Sketch Map with north arrow required.

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

1263-67 Havenhurst is a 10 unit, two-story building in a modified U plan. The main body of the building runs east west, with a very shallow bay projecting to the north at the eastern end of the project and a longer wing projecting north south at the west end of the building. The garages are housed in a building that runs the length of the east end of the property. The style of the building is a simple, late Spanish Colonial Revival style with a pitched red-tile roof. The building has a modest amount of detailing and articulation that includes slanted bay windows and a string molding course. The driveway on the south side of the property is lined with uncovered balconies that project forward of the face of the building. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

Period of Significance: 1920-1945 **Property Type:** Residential **Applicable Criteria:** N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses character-defining features of the Prewar Courtyard Apartment property type, but is an unremarkable example with diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of workmanship and materials have been diminished due to changes to the cladding.

Parcel No. 5554008008

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story Minimal Traditional style apartment building is U-shaped in plan with a long, open central court. It is covered by a hipped roof with coved, shallow eaves. The wood frame structure is finished in non-original textured stucco with six-over-six double hung wood sash windows. First floor windows are adorned with wood headers. Apartment entrances are located around the courtyard; some are framed by simple wood surrounds. Metal balconies are affixed to the building that may be later additions. Entrance doors are framed by a simple wood surround and some are surmounted by a simple metal balcony. The building is in good condition and its integrity is fair. It was designed in 1942 by Arthur W. Hawes for $56,000; no owner is recorded on the building permit. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1919. It was converted to a multi-family residence between 1955 and 1960. The building is irregular in plan. Exterior walls are wood siding. The building has a gable and hipped roof clad in composition shingles with open eaves and exposed rafter tails. Windows consist of paired wood casements and one-over-one double-hung wood windows. Individual unit entrances are single doors with screens. The front residence shares a parcel with three additional residential buildings. The majority of the property is paved with concrete for parking, but there are small lawn areas adjacent to each building.

Period of Significance: 1895-1925; 1906-1931; 1919-1939 **Property Type:** Residential **Applicable Criteria:** Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

1332 Havenhurst Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a good example of the Craftsman and Early American Colonial Revival styles as applied to a duplex. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Single-Family Residence property type and Craftsman and Early Colonial Revival architectural styles, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

Recorded By: Amanda Duane **Date:** 8/26/2023 ☑ Continuation ☐ Update

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Early American Colonial Revival dates to the prewar period and is characterized by symmetrical facades and ornamentation such as pediments and wood window shutters.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains all necessary aspects of integrity from the period of significance.

Parcel No. 5554008010

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

According to County Assessor records, this Craftsman bungalow was constructed in 1918. Oriented to the west, the parcel contains a primary residence at the front of the lot and three separate buildings at the rear. The primary residence is single story, has an irregularly shaped plan, and is covered by a roof composed of hips and gables with projecting eaves and exposed rafter tails. A small, pyramidal roof covers a projection at the north side of the west (primary) façade. An open porch at the south side of the primary façade is shaded by a street-facing gable roof. Three eyebrow dormers punctuate the center of the hip above the primary façade. A low, rectangular-shaped chimney rises from the roof ridge near the center of the residence. Exterior walls are faced with narrow, wood clapboard siding. Tall, latticework fences (a later addition) run parallel to the building's primary façade and provide a buffer from an adjacent parking lot at the front of the lot. Windows appear to be the original wood casement windows and are set in an irregular fenestration pattern. Although not visible from the pedestrian right-of-way, Sanborn Fire Insurance maps depict secondary buildings at the rear of the lot, including two detached duplex buildings and a small, detached garage. The duplex buildings contain four additional residential units. Both the condition and the integrity of this property are good.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. Although relatively few in number in relationship to their historic significance, classic Craftsman bungalows still exist in both the historic Sherman area and the eastern portion of the city that shares a developmental history with adjacent Hollywood. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

1350 Havenhurst Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Prewar Courtyard Apartment property. As the buildings themselves are an unremarkable example of the French Revival/Chateauesque style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Prewar Courtyard Apartment property type and some features of the French Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Prewar Courtyard Apartments were the next evolution of the courtyard housing type after bungalow courts. Multiple units in one or two larger buildings were arranged around a central courtyard or open space. Many examples were thoughtfully designed by architects, which reflected the increasing wealth of residents living in multi-family housing during this period. Architects including Arthur and Nina Zwebell and F. Pierpont and Walter Davis were highly influential, helping to shape the designs of the property type through the 20th century. (See continuation sheet).

***Required Information**

B10. Significance (Continued from Page 2): French Revival is a broad term that describes architecture influenced by a variety of French buildings, ranging from the ornate (Chateauesque) to the modest (French Provincial). The style is characterized by features such as steeply pitched roofs with dormers, turrets, and towers, decorative finials, cornice lines, and stringcourses.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

1350 Havenhurst is a two-story, Minimal Traditional style, twelve-unit building with a U-shaped plan, with the central courtyard open to the street at the west. The roof is somewhat steeply pitched and hipped. At the front of the building each wing of the U steps down to a smaller bay at the street façade. Each of these front bays is centered in the end wall of the larger bay behind it, and given a proportionately smaller hipped roof, that terminates in a gable over the center of each front bay. Garages are housed across the eastern edge of the property at the back of the lot. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

***B6. Construction History: (Construction date, alterations, and date of alterations)**

Constructed, 1939. No digital exterior alteration permits on file. Metal railings appear replaced and window openings appear modified at unknown dates.

***B7. Moved?** ☑ No ☐ Yes ☐ Unknown **Date:** **Original Location:**

***B8. Related Features:**

B9a. Architect: Unknown **B9b Builder:** Unknown

***B10. Significance: Theme** Apartment Houses: Prewar Apartment Houses; Period Revival: Early American Colonial Revival **B10 Area:** West Hollywood

Period of Significance: 1920-1945; 1919-1939 **Property Type:** Residential **Applicable Criteria:** N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Prewar Apartment House property type as defined in the 2023 Historic Context Statement.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. It is not a fully realized example of the Prewar Apartment House property type and unremarkable example of the Early American Colonial style, lacking the high quality architectural styling and unique amenities of its counterparts that would have been competing for tenants as West Hollywood became an increasingly fashionable and desirable place to live.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of workmanship and materials appear to have been diminished by the installation of non-original features and changes to the window openings.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

1401-07 Havenhurst Drive is a fifteen-unit, two-story residential building in the Minimal Traditional style. The building wraps a central landscape courtyard for approximately three-quarters of the courtyard's perimeter. Garages are located in a separate structure at the western, rear edge of the property. The roof is pitched with gable ends, with the exception of a hipped roof at the southwest corner of the building. Detailing of the building is limited to a few details such as string-course moldings. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-Postwar Courtyard Apartment built in 1946. The building is e-shaped in plan. Exterior walls are stucco. The building has a hipped roof clad in composition shingles with projecting boxed eaves. Visible windows consist of multi-light steel casements. Individual units appear to be accessed from the exterior. Visible entrances consist of single paneled doors. On the ground floor some entrances are sheltered by Juliet awnings.The property has a central courtyard with shrubs, mature trees, walkways, and a swimming pool. The front of the property is enclosed by a painted brick wall with wrought iron gate.

***B10. Significance: Theme** Courtyard Apartments: Postwar Courtyard Apartments **B10 Area:** West Hollywood

Period of Significance: 1945-1969 **Property Type:** Residential **Applicable Criteria:** Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

1260 N. Hayworth Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment property type. As the buildings themselves do not reflect a particular style of architecture, the property appears unlikely to meet state or national thresholds for significance.

The property possesses most character-defining features of Postwar Courtyard property type, as outlined in the 2023 Historic Context Statement.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

Parcel No. 5554012022

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story building was designed in the Minimal Traditional style. It is E-shaped in plan with the open end toward the street and occupied by a swimming pool. The two sub-courtyards within the arms of the "E" are heavily planted and feature mature trees. The wood-framed building has a hipped roof and is finished in stucco. The primary façade is generally symmetrical in composition. Fenestration consists of multi-light metal casement windows set in narrow painted surrounds that may be later additions. Other walls facing into the courtyard are dominated by rows of multi-light metal casement windows. Entrance to the property is through a metal gate with decorative scrolling that is flanked by concrete piers capped by a pair of light fixtures. The building is in good condition and appears to have good integrity. It was designed in 1946 by Edith Northman for A. Marrowitz & Song and built for $150,000. The swimming pool was built at a cost of $3,000. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2 and 3-Prewar Apartment House (Type B) in the French Revival style built in 1936. The building is l-shaped in plan. Exterior walls are stucco. Ornamentation consists of belt courses and quoins. The building has a hipped roof clad in composition shingles with flush eaves. The roof is accentuated by turrets and finials and arched attic vents that echo the appearance of dormers. There is one chimney. Windows consist of individual jalousie windows, multi-light wood casements, and single-light fixed windows arranged in projecting bays. There are at least two entryways on the west-facing elevation within pointed arched openings. The doors are obscured by metal security doors. Individual units appear to be accessed from interior corridors.The building has a communal landscaped area with shrubs and walkways.

It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Prewar Apartment House property type as defined in the 2023 Historic Context Statement.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses character-defining features of Prewar Apartment House (Type B) and the French Revival style but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, integrity of design and materials have been diminished due to the installation of incompatible windows.

Parcel No. 5554012023

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This eight-unit building was designed in the late French Chateau style. The site plan of the building is a modified "U" in plan, with a much shorter leg facing south, and the main courtyard open to the street. The one-story garage building is at the east end of the lot, behind the main residential building. The stucco- finished residential building is two stories with the exception of a one-story wing facing south, at the front of the building. The roof is high-pitched and hipped with very narrow eaves. The fenestration includes multi-pane, double-hung windows. Chateauesque details include one-story, slanted bay windows with diagonal, leaded-glass sidelights, vertical, arched dormer vents, a narrow turret on the second story, and an entry to the ground floor street-facing entrance with a very steeply pitched roof. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

1321-1333 N Hayworth Avenue appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of a Prewar Courtyard Apartment and French Revival Style.

It possesses most character-defining features of the Prewar Courtyard Apartment property type and French Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Prewar Courtyard Apartments were the next evolution of the courtyard housing type after bungalow courts. Multiple units in one or two larger buildings were arranged around a central courtyard or open space. Many examples were thoughtfully designed by architects, which reflected the increasing wealth of residents living in multi-family housing during this period. Architects including Arthur and Nina Zwebell and F. Pierpont and Walter Davis were highly influential, helping to shape the designs of the property type through the 20th century. (See continuation sheet).

***Required Information**

B10. Significance (Continued from Page 2): French Revival is a broad term that describes architecture influenced by a variety of French buildings, ranging from the ornate (Chateauesque) to the modest (French Provincial). The style is characterized by features such as steeply pitched roofs with dormers, turrets, and towers, decorative finials, cornice lines, and stringcourses.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story building, together with the 1325-33 Hayworth building, frame one of the largest landscaped courtyards anywhere in West Hollywood. Both buildings are L-shaped, with 1321-23 framing the courtyard to the south and west, and 1325-33 framing the courtyard to the north and west. The courtyard opens to Hayworth on the east, and is currently largely hidden by a tall hedge. The courtyard itself is well landscaped and the landscaping includes mature trees as an essential component. The fenestration includes multi-paned, double-hung windows. The walls of the building are stuccoed, the roof is steeply pitched and hipped and there are a few simple, traditional, period-revival details, such as string-course moldings. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a bungalow court built in the Spanish Colonial Revival style built in 1922. It consists of two 1-story bungalows and two 2-story bungalows arranged roughly in a U-shape. Exterior walls are stucco. The bungalows are rectangular in plan and each has a flat roof with a raised parapet. On the larger 2-story buildings there are shed roofs clad in clay tile or composition shingles. Windows consist of double-hung wood windows, some with wood window shutters. Entrances to individual units open onto the communal walkway and are obscured by metal security doors.The property consists of four rectangular buildings separated by a walkway. There are small areas of lawn with mature trees and foundation plants.

Period of Significance: 1910-1940; 1922-1949 **Property Type:** Residential **Applicable Criteria:** N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Bungalow Court property type as defined in the 2023 Historic Context Statement.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although generally intact, it is an unremarkable example of the Spanish Colonial Revival style. The site planning and landscaping is rudimentary, and it does not represent a fully realized example of a bungalow court; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and materials have been diminished by the removal and replacement of clay tile with incompatible composition shingles and flashing.

Parcel No. 5554001008

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This property contains four buildings around a courtyard. The street-facing building located at 1420 Hayworth is a two-story apartment building designed in the Spanish Colonial Revival style. It is generally rectangular in plan with a flat roof surrounded by a parapet, framed in wood, and finished in stucco. Fenestration consists mostly of one-over-one wood sash windows flanked by wood shutters and set in wood frames with projecting wood sills; some upper sash are divided-light. The main façade is asymmetrically composed, with small single and paired windows and a clay-tile-clad, shed roof over a small one-story portion at the front. A wood gate within an arched opening in a wing wall to the north leads to the entrances. Other features include ornamental vent grilles set in two deep rectangular frames on the south half of the primary façade, near the parapet. The building is in good condition and has fair to good integrity. No original building permit was located in the City of West Hollywood's property records, but county tax assessor records indicate that it was built in 1922. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment House (Type B) in the French Revival style built in 1938. The building is L-shaped in plan. Exterior walls are stucco. Ornamentation consists of belt courses, wrought iron railings, wood window shutters, and corbels beneath projecting volumes. The building has a hipped roof clad in composition shingles with boxed eaves. The roof is accentuated by arched attic vents that echo the appearance of dormers. There are two interior, stucco chimneys. Multi-light wood casement or fixed windows are arranged individually, in pairs, and in groups of three. Visible entryways consist of single wood-paneled doors within decorative pedimented surrounds. Individual units appear to be accessed by interior corridors.Landscaping on the property includes a front lawn area, communal walkway, mature trees, and foundation plants. The front edge of the property is enclosed by a low brick wall and metal fence.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story Single-Family Residence in the Craftsman style built in 1912. The building is rectangular in plan. Exterior walls are wood siding. The building has a cross-gable roof clad in composition shingles with open eaves. Windows consist of narrow multi-light wood casements and one-over-one double-hung wood windows. The primary entryway is located under a projecting porch and consists of a single, partially glazed Dutch door. The porch is supported by wood posts and accessed by shallow brick steps. There is a one-story detached garage to the rear of the building. Landscaping consists of a front yard area with a lawn, shrubs, mature trees and a central walkway. The front of the property is enclosed with a brick and picket fence.

Period of Significance: 1895-1925 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing ineligible for listing as an individual resource. It was re-surveyed as part of the 2022-2023 multi-family survey update and re-evaluated due to its age.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although mostly intact, it is an unremarkable example of a single-family residence that does not embody any particular style of architecture and does not appear to have an important association with early residential development in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

Parcel No. 4340004008

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This single-family residence is vernacular in design although its materials share characteristics with the contemporaneous Craftsman style. Oriented to the west, the house is one story tall and is topped by a side gable roof covered with composition roofing. Exterior walls are sheathed with narrow clapboard. The main facade is assymetrically composed; its primary feature is a partial-width gablefront porch that rests atop to simple square columns. The front door, located on the south side of the facade, is sheltered by the porch; a three-part window fills the northern half of the facade. Both the door and the window have simple flat wooden surrounds and no other ornamentation. Windows are covered with metal security grilles.

This property is not a representative example of a Craftsman bungalow. It is associated with the history of Sherman after 1910. It does not appear to be individually eligible for listing at the federal, state, or local level.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1915. The building is rectangular in plan. Exterior walls are wood siding and wood shingle. The building has a cross-gabled roof clad in composition shingles with open eaves, exposed rafter tails, and brackets. Visible Fenestration consists of one-over-one double-hung windows Anda a diamond-light awning window in the gable end. The primary entryway is sheltered under a projecting porch and consists of a single, partially glazed wood door. The partial-width projecting porch is supported by square wood posts. A trellis extends north of the porch above a picture window. The property is surrounded by a tall metal fence, obscuring the yard and landscaping from view.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

8953 Keith Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Single-Family Residence property type and Craftsman style as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet).

***Date of Evaluation:** 8/26/2023

(This space reserved for official comments.)

Sketch Map with north arrow required.

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone alterations but retains sufficient integrity to convey its local significance.

Parcel No. 4340016004

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This Craftsman bungalow is a single-family residential structure oriented to the south. The property is bordered with a lattice fence and landscaped trees, shrubs and small plantings, which partially obscures the building from the public right of way. Constructed in 1915, the building is rectangular in plan and has a separate garage structure at the rear of the parcel. The front gable face features a small, wood-frame window with a Queen Anne design. The second gable to the north features a screened vent at the gable peak. it features gable roofs, wood shingle and clapboard siding, and wood, one-over-one, double-hung windows. A partial-width porch is located at the west end of the main façade. Alterations to the building included the enclosure of the porch at one end and extension of the porch at the other end.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. Although relatively few in number in relationship to their historic significance, classic Craftsman bungalows still exist in both the historic Sherman area and the eastern portion of the city that shares a developmental history with adjacent Hollywood. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 3-story Stucco Box/Dingbat with Mid-Century Modern influences built in 1951. The building is rectangular in plan. Exterior walls are stucco and concrete block. Ornamentation consists of geometric hollow concrete block patterning along the ground floor. The building has a front-gabled roof clad in composition shingles with boxed eaves. Windows consist of single-light wood fixed and awning windows arranged in horizontal bands and in the gable end. Entrances to units are not visible from the public right-of-way. There is a projecting balcony on the second floor with angled wood siding and post-and-beam supports. Landscaping is limited and includes a concrete block planter and mature trees and shrubs at the north and south ends of the property. The south end of the property is paved in concrete, providing access to soft-story parking on street level.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for listing as an individual resource though the text of the conclusion on the DPR form is cut off. As such, it was re-surveyed as part of the 2022-2023 multi-family survey update.

The property is an example of the work of architect Edward Fickett, FAIA; however, City Council denied the local designation of 1128 Larrabee as an individual resource on April 4, 2011. No new information was revealed as a part of this updated evaluation; therefore, the property is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z).

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

Parcel No. *5560-022-005*

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story vernacular modernist apartment building is rectangular in plan, framed in wood, and finished in stucco. It is covered by a front-facing gabled roof with overhanging eaves. Open parking garages occupy the street grade, stacked down the length of the building along a driveway that runs perpendicular to the street. This lower level is partially screened at the street by a concrete block wall with some pierced concrete blocks arranged within it. The upper stories that contain the apartments are elevated above the street and cantilevered over the garage level to the south. Stairs to the main entrance are located along the north side of the building. Fenestration on the primary façade consists of horizontal groupings of square, wood-frame, fixed and awning windows; they are arranged in a single band on the first floor and stacked in a double band on the second floor. The primary façade is asymmetrically composed, with fenestration, a long, canted false balcony front, and a canopy concentrated toward the south side of the façade. The low-pitched canopy has exposed braces and shades first floor windows in addition to providing a modest horizontal decorative element. The building is in fair to good condition and has good integrity. Although no original building permit was located at the City of West Hollywood, county tax assessor records indicate that it was built in 1951. It has been attributed to the architect Edward Fickett.

Edward Fickett, FAIA designed several buildings within the City of West Hollywood, including four within the survey area. After graduating from the University of Southern California and working with local architect Sumner Spaulding, Fickett received a master's degree in city planning from the Massachusetts Institute of Technology. After returning from military service in World War II, he formed a partnership with Francis J. Heusel before opening his own practice in 1947. Fickett's work in the postwar years included commercial, multi-family housing and single-family tract housing projects. Fickett was the recipient of professional honors and recognition throughout his career, including the National Association of Home Builders Awards of Merit throughout the 1950s, the Progressive Architecture Design Award in 1954, AIA merit award in 1956 and 1957 and House and Home Magazine awards in 1956 and 1957. He was finally named a Fellow of the American Institute of Architects (AIA) in 1969. He died in 1999.

Fickett designed several apartment buildings in West Hollywood, Hollywood, and Los Feliz in the 1940s and 1950s in addition to designing house plans for tract developments throughout greater Los Angeles. The architect incorporated what became known as characteristic "Fickett" elements in these designs low pitched or broad sloping roofs and high ceilings with exposed beams, generous use of plate glass set into deep wood framing and a mix of natural and synthetic materials including stone, stucco, fiberglass, steel and wood. Most of these are designed with a focus on interior patios with swimming pools surrounded by lush subtropical plantings including banana trees, palms, yuccas, and giant bird of paradise. The subject property does not appear to represent the characteristic work of Fickett and no additional documentation was found to confirm Fickett as the architect of record. The property does not appear individually eligible for listing on the National or California Register; however, it may be

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 3-story Postwar Courtyard Apartment with Mid-Century Modern influences built in 1956. The building is O-shaped in plan. Exterior walls are stucco The building has a flat roof with boxed, overhanging eaves. Fenestration consists of jalousie windows and horizontal bands of single-light. The main entrance is recessed beneath the second story and consists of a single fully glazed wood door flanked by sidelights. Individual units are accessed by exterior walkways around the courtyard and consist of single wood slab doors. The front of the property has stucco planters with mature trees, shrubs, and drought-tolerant plantings. Near the center of the west elevation there is an entrance to subterranean parking with a sliding wood door. The interior courtyard includes a concrete patio and a swimming pool.

Period of Significance: 1945-1969; 1949-1967 **Property Type:** Residential **Applicable Criteria:** Local: D

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 and a status code of 6Z was assigned; however, the DPR 523 B form was not attached so the conclusion of the evaluation could not be reviewed. It was re-surveyed as part of the 2022-2023 multi-family survey update.

1145 Larrabee appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant under local criterion D for representing the work of architect Edward Fickett, FAIA. Because the property does not appear to be an important work of Fickett's, the property appears unlikely to meet state or national thresholds for significance under Criterion C/3.

It possesses most character-defining features of the Postwar Courtyard Apartment property type and Mid-Century Modern architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet).

***Required Information**

B10. Significance (Continued from Page 2): The Mid-Century Modern style evolved from various prewar expressions of modernism. A “second generation” of architects, inspired by the work of early local Modernists like Richard Neutra, Rudolph Schindler, and Frank Lloyd Wright, developed a regional style popularized in part by the Art and Architecture magazine’s pivotal Case Study Program. The style is characterized by clear expression of structure and materials, an emphasis on horizontality, large expanses of glass, and seamless indoor-outdoor spaces.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

Parcel No. 5560023072

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This multi-unit, vernacular modernist apartment building has a rectangular-shaped plan that wraps around a large courtyard with a pool. The courtyard, however, appears limited to a narrow walkway adjacent to the small pool area and contains minimal plantings. The building is two stories above a basement and is covered by a flat roof that terminates in a short eave overhang. Exterior wall facing material is stucco. The majority of the east (primary) façade projects beyond the north end of the building. A two-story band of ganged, fixed sash windows set above louvers is a prominent design feature and stretches across most of the primary façade. Windows that punctuate other points of the facades are single and paired fixed sash; red, canvas awnings shade almost all windows on the primary façade. The main entrance is located near the north corner of the primary façade. Single-lite, fixed sash windows at the second story crown the entrance door. To the immediate north of the entrance door is a series of thin, wood slats that support the cantilevered roof overhang two stories above. A prominent garage parking entrance is cut into the façade near the south corner of the primary façade at the basement level. Wide, raised planter boxes delineated by walls sheathed in stucco buffer the building from the street; mature trees and low bushes offer dense greenery to the building. The building was designed by Alfred March in 1956 for owner Jack Charney and constructed for $100,000. The pool was also installed in 1956 for $3,000.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Postwar Courtyard Apartment property type but does not reflect a particular style of architecture and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design and materials have been diminished by the installation of non-original vinyl windows.

Parcel No. 5554011026

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This vernacular modernist apartment building is roughly C-shaped in plan, two stories in height with a basement in the rear under the eastern portion, and covered by a hipped roof with a low pitch, a shallow eave overhang, and prominent fascia. Round-headed vents project from the roof at various points. Exterior wall facing material is stucco at the first floor and horizontal wood boards at the second floor. The south (primary) façade faces away from the street and is distinguished by a second-floor balcony that overlooks a courtyard below. Pilasters, which are fluted only at the second floor, divide the facades into bays. Windows are six-over-six, double-hung wood sash. Canvas awnings shade first floor windows and provide a modest decorative element. Entrances are located off the courtyard at the south façade. A driveway to the south provides vehicular access to both a basement garage at the rear and a detached single-story garage to the east. Landscaping consists of large lawns, dense bushes at the base of the west (street-facing façade), and mature trees. The building was designed in 1948 by Edith Northman for owner Dr. Harold B. Senter and constructed for $82,000. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

It was reclassified as an example of the Prewar Apartment House property type as defined in the 2023 Historic Context Statement.

1401 N. Laurel Avenue appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Chateauesque style.

It possesses most character-defining features of the Prewar Apartment House (Type B) property type and Chateauesque architectural style, as outlined in the 2023 Historic Context Statement.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received. (See continuation sheet).

Sketch Map with north arrow required.

***Required Information**

B10. Significance (Continued from Page 2): Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like La Fontaine) helped to attract tenants.

French Revival is a broad term that describes architecture influenced by a variety of French buildings, ranging from the ornate (Chateauesque) to the modest (French Provincial). The style is characterized by features such as steeply pitched roofs with dormers, turrets, and towers, decorative finials, cornice lines, and stringcourses.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This three-story, Norman Revival style apartment building is L-shaped in plan with the short side of the L located at the rear of the plan, creating a courtyard-like space with the building running along two sides of it. The building is capped by steep hipped roofs covered in composition shingle. The building is framed in wood, clad in stucco, and has fenestration of multi-light wood casement windows often flanked by wood shutters. Upper floors have balconies adorned with decorative metal railings. The occasional metal awnings with scalloped edges may be later additions. A flagstone stair leads to the landscaped courtyard. The building is in good condition and has good integrity. It was built in 1936 for owner Ley Brothers for $28,000; there is no architect is listed on the building permit. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment Building (Type B) in the French Revival style built in 1940. The building is L-shaped in plan. Exterior walls are stucco and fieldstone. Ornamentation consists of finials, wood window shutters, wrought iron railings, a belt course, and fluted and quoin detailing at the corners of the building. The building has a hipped roof clad in composition shingles with shallow boxed eaves. The roof is accentuated by gabled attic vents that echo the appearance of dormers. Windows consist of multi-light steel casements arranged in groups, pairs, and rounded bays as well as four-over-four double-hung wood windows. Individual unit entrances appear to be accessed via exterior walkways and consist of single wood-paneled doors, some of which are sheltered beneath Juliet awnings. There is a 1- and 2-story detached building to the rear with soft-story parking. There is also soft-story parking along the rear of the main building. Landscaping consists of a front yard area surrounded by a fieldstone retaining wall as well as a communal landscaped area with lawn, shrubs, mature trees, and fieldstone steps and walkways. A side driveway runs along the south edge of the property.

Period of Significance: 1920-1945; 1926-1941 **Property Type:** Residential **Applicable Criteria:** Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

1417 N. Laurel Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as an example of the French Revival style. As a more modest example of the style when compared to similar properties in West Hollywood, the property may not meet state or national thresholds for integrity.

It possesses most character-defining features of Prewar Apartment House (Type B) and the French Revival (Chateauesque) style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants. (See continuation sheet.)

***Required Information**

B10. Significance (Continued from Page 2): French Revival is a broad term that describes architecture influenced by a variety of French buildings, ranging from the ornate (Chateauesque) to the modest (French Provincial). The style is characterized by features such as steeply pitched roofs with dormers, turrets, and towers, decorative finials, cornice lines, and stringcourses.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story, fifteen-unit Minimal Traditional style building has stucco walls and steeply pitched roofs. The landscaped courtyard of the L-shape building opens to the east, with the short leg of the L at the east of the complex, and the courtyard opening to the south. The building is raised above the street, with wide, flagstone steps leading up to the courtyard. Garages are at the rear of the site in a separate building. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing ineligible for listing as an individual resource but was included in 2017 in the Lexington-Curson Residential Historic Resources Survey study. It was re-surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

This property is not fully visible from the public right-of-way due to heavy vegetation and could not be fully described or re-evaluated for potential significance.

Integrity could not be fully assessed as the property was not visible from the public right-of-way at the time of survey.

Parcel No. 5530006019

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This Craftsman bungalow, constructed in 1919 with Colonial Revival influences, is situated on the north side of Lexington Avenue and oriented to the south. The building is partially obscured by tall trees and shrubs in the front yard of the parcel. Rectangular in plan, the building features a side-gable roof clad with asphalt shingles, and wood, horizontal, clapboard siding. The main façade is symmetrically composed with a central gable-front porch. Simple, rounded columns with Doric capitals frame the porch entry, which is accessed via a short flight of brick steps. Small, ornamental modillions wrap around the porch gable. The main entrance contains a wood paneled door with four lights. To the east of the porch is a wood, one-over-one, double hung window with lamb's tongues. The upper portion of the double-hung window feature Craftsman-style muntins that form small squares at the corners of the window. Sanborn Fire Insurance maps indicate a separate garage structure located at the rear of the parcel. No major alterations were noted.

This property does not appear to be an individually signficant example of its architectural style or type, nor is it associated with the historical development of Sherman. This property does not appear to be individually eligible for historic designation at the local, state, or federal level. This is not a representative example of a classic Craftsman bungalow.This property has not been evaluated as part of any district, geographic or thematic.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1912. The building is rectangular in plan. Exterior walls are wood siding and wood shingle. The building has a front-gabled roof clad in composition shingles with open eaves, exposed rafter tails, projecting beams, and bargeboards. Windows consist of one-over-one hung vinyl replacements. The primary entrance consists of a single partially glazed wood door within a recessed partial-width porch. The porch is supported by narrow wood posts. There is a two-story detached building to the rear of the main residence. Landscaping consists of a front yard area with a lawn, shrubs, mature trees, and central concrete walkway. The front of the property is enclosed by a chain-link fence. There is a side driveway along the west edge of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of a potential Craftsman Thematic and was included in 2017 in the Lexington-Curson Residential Historic Resources Survey study. It was re-surveyed as part of the 2022-2023 multi-family survey update and evaluated as an individual resource.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses character-defining features of the Craftsman architectural style and Single-Family Residence property type, but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design and materials have been diminished by the replacement of windows and porch supports.

Parcel No. 5530011021

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

Constructed in 1912, this Craftsman bungalow has a rectangular plan and is oriented to the north. The main elevation is partially obscured by trees and shrubs in the front yard of the parcel. The building features gable roofs with asphalt shingles and wide eave overhangs, wood, horizontal siding, and non-original vinyl, one-over-one, double-hung windows. Latticed vents are located at the gable peaks. A partial-width, recessed porch with slender, squared porch supports is located at the east end of the main facade. To the east of the porch is a pair of double-hung windows with vinyl sashes. Alterations to the building include window replacements and decorative tiles at the porch. A two-story dwelling unit is located at the rear of the parcel. Both the condition and integrity of the property are good.

Period of Significance *1912* **Property Type** *Bungalow* **Applicable Criteria** *A1, A3*

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. Although relatively few in number in relationship to their historic significance, classic Craftsman bungalows still exist in both the historic Sherman area and the eastern portion of the city that shares a developmental history with adjacent Hollywood. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-and-a-half-story single-family residence in the Craftsman style built in 1914. The building is rectangular in plan. Exterior walls are wood siding and wood shingle. The building has a cross-gabled roof clad in composition shingles with open eaves and projecting roof beams. Windows consist of fixed and one-over-one double-hung wood windows. The primary entrance consists of a single partially glazed wood door within a partial-width recessed porch. The porch is supported by a study wood post and concrete piers. There is a one-story detached building to the rear. Landscaping consists of a front yard area with a lawn, small shrubs, and a concrete driveway and walkway.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping, and was included in 2017 in the Lexington-Curson Residential Historic Resources Survey study. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

7616 Norton Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Single-Family Residence property type and Craftsman architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet.)

Sketch Map with north arrow required.

B10. Significance (Continued from Page 2): Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

Parcel No. 5530011020

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This one-story Craftsman bungalow, oriented to the north, is rectangular in plan and was constructed in 1914. It features wood shingle cladding and a sweeping, low-pitched side gable roof with a central gabled dormer. Two sets of triple window arrangements extend across the main façade and include one-over-one, double-hung windows. Sanborn Fire Insurance maps indicate two small secondary structures, a workshop and a garage, located at the rear of the parcel, though these were not visible from the public right of way.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

Constructed in 1915, this one-story Craftsman bungalow has a rectangular plan and is oriented to the north. Tall shrubs and plantings in the front yard of the parcel obscure its main elevation. The building features a gablefront roof, wood, horizontal siding, and some original wood sash windows. The eastern portion of the main façade features an enclosed partial-width porch with a brick-clad closed rail and pedestals. A latticed vent extends across the gable peak. The porch and windows have been covered with metal security grilles. A small dwelling unit is located at rear of property.

***B10. Significance: Theme** Single-Family Residences and Secondary Dwellings; Craftsman **B10 Area:** West Hollywood

Period of Significance: 1895-1925; 1906-1931 **Property Type:** Residential **Applicable Criteria:** N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Craftsman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses character-defining features of the Craftsman style but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and materials have been diminished by the installation of vinyl windows and changes to cladding.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This one-story multi-family, residential Craftsman bungalow, constructed in 1917, is situated near the southwest corner of its block with its main facade oriented north. The building is roughly rectangular in plan and features wood, horizontal siding and a low-pitched, hipped roof. The main façade features non-original vinyl fixed and one-over-one, double hung windows. A porch extends across the main façade and sits atop two squared piers with pedestals and a gable motif. A wood balustrade encloses the porch at the west end. The main entrance, located in the center of the main façade, features a front entry door with a four-light upper portion and a four-panel bottom portion. Alterations to the building include window and siding replacements. The front of the lot is landscaped with trees and shrubs and enclosed within a wood fence. A driveway borders the west end of the property. According to 1953 Sanborn Fire Insurance maps, the parcel also contains a two-story duplex at the rear.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Craftsman style was extremely popular in Southern California residential architecture from 1910 to the mid-1920s, with its zenith in the 1910s. The Arts & Crafts movement, of which Craftsman style architecture was a part, represents the first popular wave of modernist influence in American architecture. Although distinctly a modern--that is, ahistorical--style, the underpinnings of the style are founded on a rejection of the industrial and an embrace of the handcrafted. The residential work of Greene & Greene exemplifies the very best of Craftsman style architecture, although landmark quality examples of the style can be found throughout Southern California. The style was widely popularized in architectural and popular journals, certainly the most popular vernacular building style of the 1910s. Vernacular examples of the style are typically identified simply as "bungalows." Architectural historian Robert Winter has characterized this type of house as a "California bungalow" although that nomenclature has come to be associated almost exclusively with the Craftsman style. However, despite this association, Winter identifies the bungalow's form and function as the primary defining attributes of the type that underlie its stylistic character. Its "fundamental idea" was one of a convenient little house with style" and "[i]n its conception, the bungalow suggested California-its style of life, its mild climate, its casual living with nature." The Craftsman bungalow was a ubiquitous element of the Southern California landscape in the first decades of the twentieth century. Craftsman-style buildings typically found within the survey population are characterized by compact massing and plans, gable roofs with overhanging eaves, exposed rafters and purlins, wood clapboard or shingle siding, porches with secondary gables, and windows with stylized muntin patterns. Although relatively few in number in relationship to their historic significance, classic Craftsman bungalows still exist in both the historic Sherman area and the eastern portion of the city that shares a developmental history with adjacent Hollywood. This property does not appear to be an individually significant example of its architectural style or property type. It does not appear to be individually eligible for historic designation at the state or federal level. Although it has suffered alterations, it may be eligible for listing as part of a local thematic grouping of Craftsman style houses and bungalows or, individually, under local Criterion B.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This (7738 Norton Avenue) is a 1-story single-family residence in the Craftsman style built in 1915. The building is rectangular in plan. Exterior walls are wood shingle. The building has a front-gabled roof clad in composition shingles with open eaves, exposed rafter tails, and projecting beams. Wood windows consist of single-light fixed and multi-light casements. The main entrance is a partially glazed wood door behind a metal screen door. The property has a front yard area with some plantings and a centered concrete walkway.

To the rear of the property (1116 N. Genesee Avenue) there is a 1-story duplex in the Spanish Colonial Revival style built in 1915. The duplex is rectangular in plan. Exterior walls are stucco. The duplex has a flat roof with raised parapet. Windows consist of single-light and multi-light double-hung wood windows as well as hung vinyl windows. The two entry doors are sheltered under shallow gabled overhangs clad with clay tile and consist of wood-paneled doors behind metal security doors.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing ineligible for listing; however, the evaluation only addressed the Spanish Colonial Revival duplex to the rear (1116 N. Genesee). 7738 Norton Avenue was included in 2017 in the Lexington-Curson Residential Historic Resources Survey study. It was re-surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). While it possesses character-defining features of the Craftsman architectural style and Single-Family Residence property type, it lacks the aspects of integrity essential to conveying this potential significance.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and material have been diminished by the removal of an original projecting porch, a key character-defining feature of the Craftsman style.

Parcel No. 5530011001

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

County Tax Assessor Records indicate that this building was constructed in 1915, although its Spanish Revival style suggests a later date of construction. This property was historically associated with the adjacent Craftsman bungalow to the north at 7720 Norton. The building is a duplex, oriented to the west, and features a rectangular plan and a flat roof. A short, stepped parapet is lined with red clay tiles. Clad in stucco siding, The main facade is symmetrically composedl. The duplex has two entrances topped with clay-tile gabled porticoes that are supported with brackets. Main entrances are accessed via flights of steps. Fenestration on the main facade consists of a pair of windows at the center of the building and single windows flanking each entrance. Windows consist of four-over-one, double-hung wood sash. The parcel is landscaped with trees and shrubs. The south elevation looks out onto a parking lot. No major alterations were noted. Both the condition and integrity of this property are good.

This property's style and construction do not reflect the County's recorded construction date, 1915, and therefore does not appear significant as representative of that early period of development. It does not appear individually eligible for historical designation at the local, state, or federal level. This property has not been evaluated as part of any district, geographic or thematic.

Period of Significance: 1920-1945; 1922-1949 **Property Type:** Residential **Applicable Criteria:** Local: A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Fourplex property type as defined in the 2023 Historic Context Statement.

7953-7959 Norton Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. The two fourplexes are significant in the context of Multi-Family Residential Development under local criteria A3 for representing residential and cultural patterns that comprised the growth of West Hollywood. However, as the buildings are unremarkable examples of the Spanish Colonial Revival style, the property appears unlikely to meet state or national thresholds for significance.

The two buildings possess most character-defining features of the Fourplex property type, as outlined in the 2023 Historic Context Statement.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

***Required Information**

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

Parcel No. 5554011014

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

7953-7959 Norton Ave consists of two identical, four-unit, two-story buildings with stucco walls and a flat roof with red tile on the parapet. The buildings are located at the west edge of the property, running north south, in line with each other. There is a landscaped courtyard lining the length of the east side of the lot. There are no garages, or parking on the property. The two buildings are designed in a simplified Spanish Colonial Revival vocabulary. The small projecting bays have shed red tile roofs on the second story, and each building has a small, pitched, red-tile roof over the central entrance to each building. The east-facing entrance facades for both buildings are symmetrical. The building is in good condition and retains good integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

It was reclassified as an example of the Prewar Apartment House property type as defined in the 2023 Historic Context Statement.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. It is an unremarkable example of a Prewar Apartment House that does not embody any particular style of architecture and does not appear to have an important association with early residential development in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

Parcel No. 5554013019

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This fourteen-unit, Modern Vernacular building is two stories with a smooth-plaster finish and wood casement windows. The building has a pitched gabled roof. The building runs north south, with a courtyard running the length of the building and open to the north, Norton façade of the building. There is a single, shallow, squared bay at the east side of the north façade. The building has a two-story porch that runs almost the length of the east façade. The plan of the building is rectangular and runs north-south, with a slightly projecting bay to the east at the southern end of the building. The roof of the porch is sloped at a gentler pitch than the roof of the building itself. The porch is supported by regularly spaced two-story posts, which are stuccoed like the rest of the building. The building has suffered some degree of alteration to its original architecture, including new metal railings and re-stucco of some exterior surfaces and elements. However, the building retains the key character-defining features that make it potentially eligible for the courtyard thematic grouping: the strong relationship between the porch running the length of the building, facing the landscaped courtyard that runs along with it, open to and clearly visibly from the street, and the simple physical form of the building. The form, a two-story open gallery running nearly the length of the building, open to the garden the entire length, is a basic courtyard form, yet one that is rare in West Hollywood. The building is in fair condition and retains a fair degree of integrity. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1 and 2-story Prewar Apartment House (Type B) in the Minimal Traditional style built in 1939. The building is rectangular in plan. Exterior walls are stucco. Ornamentation consists of stripped-down quoins and a dentilled cornice. The building has a hipped roof clad in composition shingles with flush eaves. Fixed and double-hung multi-light wood windows are arranged individually and in groups as well as tripartite projecting bays. Individual units are accessed from the exterior. Visible entrances consist of wood-paneled doors. The northernmost entrance is sheltered beneath a scalloped metal awning with wrought iron supports. The building has a shallow front lawn with mature trees and foundation plants. 8028 and 8022 Norton Avenue are mirrored and a wide concrete walkway separates the two buildings.

Parcel No. 5554014002

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This twelve-unit, multi-family complex was designed in the Minimal Traditional style and constructed in 1939. The buildings are sited near the southwest corner of the block on a wide lot. Roughly rectangular-shaped in plan, the buildings are detached, but mirror images of each other. The pair of buildings, single story near the street and two stories at the rear, embrace a rectangular-shaped courtyard that opens toward the north and is shared with the buildings located at 8022 Norton. The roofs are hipped, have a moderate pitch and an extended eave, and are covered with composition shingles. Exterior wall facing material is stucco. Fenestration patterns are symmetrical on both buildings and contain double-hung, multi-lite, wood sash windows and entrance doors. Entrances are located at the off the courtyard and at east and west alley-facing facades. The primary facades face the courtyard and contain small balconies that overlook the garden below. The north, street-facing facades are highlighted by large bay windows and corner quoins. Cornices with dentil molding, stringcourses between stories, and balconets at the alley-facing facades visually enhance the building. The courtyard appears to be landscaped and dense with foliage. Two, single-story, automobile garages, rectangular in plan, are located behind the buildings at the rear of the lot. The street-facing yard is landscaped with narrow strips of lawn, shaped shrubbery, and mature trees. No original building permit was located in the City of West Hollywood's property records. (See continuation sheet.)

Period of Significance: 1895-1925; 1898-1909 **Property Type:** Residential **Applicable Criteria:** Local: A1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible as an individual resource. It was re-surveyed as part of the 2022-2023 multi-family survey update.

9209 Norton Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 as a fully realized example of a Vernacular Cottage. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Single-Family Residence and Vernacular Cottage property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

Sketch Map with north arrow required.

B10. Significance (Continued from Page 2): Vernacular Cottages were a common house type that began to emerge in the late 1800s with the proliferation of new construction techniques, mail order catalogs, and railroad shipping capabilities. The standardized form could easily be adapted to personal taste by adding features borrowed from popular styles like Queen Anne, Eastlake, and Neoclassical architecture, particularly around the prominent front porch.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This single-family residence is a good example of a Queen Anne style cottage. Oriented to the south, the building has a square plan and sits on a raised foundation. The building rises one story tall and is topped by a pyramidal hipped roof. Exterior walls are clad with narrow wood clapboards; the roof is sheathed with composition roofing. The building's primary facade is two bays wide and is asymmetrically composed. A small porch with a cross-gable roof projects from the eastern half of the facade and wraps the southeastern corner of the building. providing shelter to the front door. The pedimented porch roof is supported by two Doric columns atop a solid balustrade. The front door has two horizontal panels at its base with glazing on its upper half; a single sidelight is located to the left side. A three-part bay window projects from the western half of the main facade. Windows and doors on the main facade are framed by simple flat wood surrounds. Additional fenestration appears to consist of double-hung wood sash. There are no visible alterations to this building's exterior. The condition of the building is fair; the integrity of the property is excellent.

Sanborn Fire Insurance Maps indicate that a secondary, freestanding one-story dwelling is located at the rear of the main house. The existence of a secondary building was confirmed in the field; however, it was not sufficiently visible to confirm condition or integrity.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Queen Anne style was popular throughout the United States, in residential architecture, between 1880 and 1910. It is the Queen Anne style that is known popularly as simply "Victorian." In its truest execution, this style is characterized by its vertical emphasis, irregular and often complex massing and form, complex roof forms with dominant front-facing gables, and prominent porches. Equally characteristic of the style is the use of decorative woodwork such as spindlework and decorative shingle patterns.

In Southern California, a vernacular expression of this style is seen in small cottages built between 1890 and 1910. These cottages are precursors to the Craftsman style bungalows that grew in popularity in subsequent years. Queen Anne cottages (sometimes called simply "vernacular cottages" are characterized by a one-story massing and hipped roof. A partial or full-width porch is typically recessed below the main roof. Siding is generally wood clapboard. A projecting bay window is also typical.

The subject property is an excellent intact example of a Queen Anne cottage, a style and type characteristic of the earliest period of development in Southern California. However, the property does not appear to be an individually significant example of the style or type and, thus, does not appear to be eligible for listing on the National or California Register. However, as it exemplifies the earliest period of settlement outside the Sherman area and, with only one other comparable property within the survey population, it does appear to meet local criteria A.1, A.3, and B.

Parcel No. 5530-014-012

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This single-family bungalow is designed in the Craftsman style. Oriented to the west, the structure is square in plan and one story tall. A side-gable roof is covered with composition roll roofing. Exterior walls are clad with shingles that appear original. The main façade is divided into two bays. The wall of the northern bay projects out from the main façade; it contains no windows and is sheltered by a shed-roof above exposed rafter tails. The southern bay consists of a pair of original multi-light wood casements flanked on the north by original French doors and on the south by a non-original single louvered window. A full-height porch is recessed under the primary roof and extends the width of the southern bay; a small wood gate and wood lattice wall, attached to a triad of wood posts, now enclose the porch. The front entry is located at the north end of the porch. A rectangular secondary structure is located at the northeast corner of the parcel. Both the condition and integrity of the building are good.

B10. Significance continued:

Constructed in 1921, this bungalow is typical of Craftsman style bungalows. The Craftsman style was extremely popular in Southern California residential architecture from 1910 to 1926, with its zenith in the 1910s. The design of Craftsman residences constructed during the 1920s, like the subject property, was influenced by the rising popularity of the Colonial Revival and Neoclassical styles. Such structures retained the compact plans, gable roofs with overhanging eaves, exposed rafters and purlins, and windows associated with the Craftsman style. Porches, while still prominent, tended to reflect changing stylistic tastes with Colonial Revival or Neoclassical elements such as pediments, and round columns with classical capitals. Throughout the Craftsman period, the style was used in the design of both single-family and multi-family residences including duplexes, fourplexes, and bungalow courts.

No original building permit was located in the City of West Hollywood's property records. According to County of Los Angeles Tax Assessor records, this single-family residence was originally constructed in 1921.

The building is located on the 1926 (revised to 1950) Sanborn map of Los Angeles (Volume 20). According to the 1926/1950 map, the building was located on a west-facing block of primarily single-family residences. The opposing, east-facing block was composed of ten parcels that, in 1950, were comprised of eleven single-family residences.

This single-family residence appears intact with minimal evidence of alterations (with the exception of a single non-original louvered window, reversible lattice wall and posts). The building retains its integrity of location, setting, design, materials and workmanship, feeling and association.

Based on information identified as part of this survey, this building does not appear to be individually significant for its historic association with any person, significant event, or broad pattern of events. While this building does not represent the work of a master, this property does embody the distinguishing characteristics of a building style and type- the Craftsman bungalow. However, fieldwork has revealed a number of structures of comparable quality, style and type that retain equal level of integrity located within the City of West Hollywood. The property does not appear to be an individually significant or rare example of the type.

Therefore, the property does not appear eligible for individual listing on the National or California Registers or as a City of West Hollywood Cultural Resource.

The building at 1026 Ogden does not qualify individually for the National or California Registers or at the local level. It should be noted that this property is part of a cluster of intact buildings on the 1000 block of Ogden. This cluster, however, does not seem to meet the standards of a district. Due to an intrusion of infill development and/or a loss of material integrity of surrounding buildings of the same period, this area does not generally meet the standards of a district but the City should be aware of its existence and location. (Furthermore, the Spaulding Square district, a City of Los Angeles Historic Preservation Overlay Zone located due north of the city boundary, represents a substantially more intact district that reflects the same pattern of development and architectural styles.)

N.B. In September 2005, ARG was contracted by the City of West Hollywood to conduct a historic resources survey of all R-2, R-3, and R-4 zoned parcels in the City. These parcels are generally developed with multi-family housing of various eras, styles, and density; however, some parcels with these zoning designations contain older single-family residences. During the course of the survey, the City has periodically requested that ARG conduct an expedited historical assessment for those properties included in the survey area that have pending demolition permits.

With reconnaissance fieldwork and preliminary research related to historic contexts completed (February 2006), there appears to be minimal potential for historic districts containing older single-family residences to exist in the areas zoned multi-family. During the reconnaissance phase approximately 525 single-family residences were found throughout the multi-family zoned survey area. There does not appear to be a significant cluster of single-family resources that retains integrity within the survey area due to the intrusion of infill, larger-scaled development and the incremental loss of original materials on many of these older single-family residences. There may be potential historic districts or clusters of significant single-family resources outside of the multi-family zoned areas of the city. ARG did not survey these areas, nor were contexts associated with single-family development in greater Los Angeles County explored.

For purposes of this expedited review prepared after completion of fieldwork, ARG did not conduct ownership or tenancy research on this single-family property as it has been found that little historical data is generally available with regard to owner or occupant. Additionally, it was determined that there was minimal chance that this information would lead to a determination of individual significance.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for local listing as part of the Sherman Thematic Grouping. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

918 Palm Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is an unremarkable example of the Craftsman style, but it is significant in the context of Residential Development under local criterion A3 for representing residential and cultural patterns that comprised the early growth of Sherman/West Hollywood. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Single-Family Residence property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

***Required Information**

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

According to Los Angeles County Tax Assessor records, this property was constructed in 1910. The house is vernacular in design, exhibiting elements of both the Queen Anne and Craftsman styles. Oriented to the west, the building has an essentially rectangular plan, is one story tall and clad with wooden clapboard siding. A pyramidal hipped roof covers the main body of the building. A gable-front roof, supported by paired columns at each end, covers a partial-width porch on the southern half of the main facade. Exposed rafter tails are visible on the hosues secondary facades. Fenestation is composed of fixed and double-hung wooden sash. A two-story dwelling is located at the rear of the property.

B10. Significance: **Theme** *Architecture, Settlement* **Area** *West Hollywood (Sherman)*

Period of Significance *1910* **Property Type** *Residence* **Applicable Criteria** *A3*

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Sherman was originally settled on 12 acres of land north of the railway tracks along Santa Monica Boulevard. The former barley fields were purchased from Thomas and Leander Quint by E. H. White in 1896 and subdivided for the townsite. The town grew in response to the need for worker housing for those men who worked in the Sherman railyards, proving housing for many of the railway craftsmen who worked in the yards, metal shops and barns. By 1910, the community that had grown to a population of 900. Modest wood-frame, turn-of the-century cottages and small Craftsman bungalows were typical of this early period of development.

In 1919, "West Hollywood" was generally considered the area bounded by Beverly, La Brea, Sunset, and Doheny which included Sherman. Although the nearby town of Hollywood was annexed to the City of Los Angeles 1910, the town of Sherman voted against annexation by a narrow majority in 1924. The following year, the town of Sherman voted to change its name to "West Hollywood," both maintaining its individual identity and merging its future that of its neighbors to the east.

The subject property represents a vernacular cottage associated with the early growth of the Sherman area in the first decade of the twentieth century. It does not appear to be individually significant as an example of its style or type, or for its association with the growth and development of Sherman at the state or federal level. However, within the survey population, there are relatively few intact examples of properties associated with the history of Sherman. Therefore, it may be eligible for listing at the local level, as part of an expanded Sherman thematic district or, individually, under Criterion B.

Parcel No. 4339017021

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

According to Sanborn Fire Insurance maps, this property contains two houses on a single lot. The main house has a rectangular plan and is one story tall. It is topped by a pyramical hipped roof with composition shingles. A recessed porch extends the full width of the main facade, with a series of simple posts and decorative horizontal members between the solid balustrade and the roof. Sanborn maps indicate a partial roof on this historic structure; the current appearance may be an alteration. Non-original stucco covers the exterior walls. Although partially obscured from view, field notes indicate that windows are typically one-over-one wooden sash. A secondary house is located at the southwest corner of the property, behind the main house.

Period of Significance *1905* **Property Type** *Cottage* **Applicable Criteria** *A3*

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Sherman was originally settled on 12 acres of land north of the railway tracks along Santa Monica Boulevard. The former barley fields were purchased from Thomas and Leander Quint by E. H. White in 1896 and subdivided for the townsite. The town grew in response to the need for worker housing for those men who worked in the Sherman railyards, proving housing for many of the railway craftsmen who worked in the yards, metal shops and barns. By 1910, the community that had grown to a population of 900. Modest wood-frame, turn-of the-century cottages and small Craftsman bungalows were typical of this early period of development.

In 1919, "West Hollywood" was generally considered the area bounded by Beverly, La Brea, Sunset, and Doheny which included Sherman. Although the nearby town of Hollywood was annexed to the City of Los Angeles 1910, the town of Sherman voted against annexation by a narrow majority in 1924. The following year, the town of Sherman voted to change its name to "West Hollywood," both maintaining its individual identity and merging its future that of its neighbors to the east.

The subject property represents a hipped cottage associated with the early growth of the Sherman area in the first decades of the twentieth century. It does not appear to be individually significant as an example of its style or type, or for its association with the growth and development of Sherman at the state or federal level. However, within the survey population and the city as a whole, there are relatively few intact examples of properties associated with the early history of Sherman. Therefore, it may be eligible for listing at the local level, as part of an expanded Sherman thematic district or, individually, under Criterion B.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story Duplex in the Craftsman style with Early Colonial Revival influences built in 1926. The building is rectangular in plan. Exterior walls are wood siding. There is an interior stucco chimney. The building has a side-gabled roof clad in composition shingles with open eaves, exposed rafter tails, and projecting beams. Fenestration consists of one-over-one double-hung wood windows and tripartite groupings with a fixed wood window flanked by one-over-one double-hung wood windows. Individual unit entrances consist of wood-paneled doors underneath rounded wall dormers with overhangs. The property has a front yard area with shrubs surrounded by a concrete retaining wall. There are two detached 1-story buildings to the rear. Side driveways run along the north and south edges of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated as appearing eligible as an individual resource as part of an expedited review in the 2008 survey. It was evaluated as part of another expedited review during the 2022-2023 multi-family survey update.

1019 San Vicente Boulevard appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a good example of the Craftsman and Early American Colonial Revival styles as applied to a duplex. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Single-Family Residence property type and Craftsman and Early Colonial Revival architectural styles, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

Sketch Map with north arrow required.

***Required Information**

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Early American Colonial Revival dates to the prewar period and is characterized by symmetrical facades and ornamentation such as pediments and wood window shutters.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains all necessary aspects of integrity from the period of significance.

Parcel No. *4340-001-006*

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

Constructed in 1926, this duplex is a late example of the Craftsman style with influences of the popular Colonial Revival style. The one-story structure has a rectangular plan and is capped by a cross-gable roof. The peak of the rear cross-gable pierces the roofline of the main side-gable element, just behind a short chimneystack. Deep open eaves reveal exposed beams and rafter tails. Exterior walls are clad with narrow wooden clapboards; the roof is sheathed with composition roofing. The main façade is symmetrically composed. An archtop portico, supported by smooth columns with Doric capitals, shelters the paneled front entrance of each of the two dwelling units. Concrete steps rise parallel to the building at each entry. Two tripartite windows fill the wall between the entries. Each wood frame window is composed of a fixed center sash with divided upper lights and flanking narrow one-over-one double-hung sash. Simple flat surrounds frame each window. Fenestration throughout the building appears to be original. A freestanding garage is located at each corner of the parcel, to the rear of the main structure. The condition and integrity of the building are good.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Constructed in 1926, this duplex is a late example of the Craftsman style with influences of the popular Colonial Revival style. The Craftsman style was extremely popular in Southern California residential architecture from 1910 to 1926, with its zenith in the 1910s. The design of Craftsman residences constructed during the 1920s, like the subject property, was influenced by the rising popularity of the Colonial Revival and Neoclassical styles. Such structures retained the compact plans, gable roofs with overhanging eaves, exposed rafters and purlins, and windows associated with the Craftsman style. Porches, while still prominent, tended to reflect changing stylistic tastes with Colonial Revival or Neoclassical elements such as pediments, and round columns with classical capitals. Throughout the Craftsman period, the style was used in the design or both single-family and multi-family residences including duplexes, fourplexes, and bungalow courts.

No original building permit was located in the City of West Hollywood's property records. According to County of Los Angeles Tax Assessor records, this duplex was constructed in 1926. The parcel is indicated as vacant on the 1910 Sanborn map of Sherman; the building does appear on the 1926 Sanborn map of Los Angeles (Volume 20). According to that map, the building was located on a block of primarily single-family residences, of which roughly half were constructed prior to 1910.

Tax Assessor records show the property owner as Al Horowitz in 1924. Horowitz owned the property until 1932. There is no listing for Horowitz in the City Directory from 1926. No information was found concerning Horowitz on the Los Angeles Public Library's California Index. (See continuation sheet.)

B11. Additional Resource Attributes: *Duplex* *HP3 - Multiple Family Property*

B12. References:

See continuation sheet.

B13. Remarks:

B14. Evaluator: *Katie Wollan*
Architectural Resources Group

Date of Evaluation: *11/16/05*

(This space reserved for official comments.)

(Sketch Map with north arrow required.)

B10. Significance continued:

This duplex appears largely intact with minimal evidence of alterations (with the possible exception of front door replacements). The building retains its integrity of location, design, materials and workmanship. However, the building now stands among larger apartment buildings and across the street from a high-rise hotel. As a result, its integrity of setting is greatly diminished. Integrity of feeling and association are also partially diminished as a result of the loss of its surrounding context.

Based on information identified as part of this survey, this building does not appear to be historically significant for its association with any person. However, this building is a good and intact example of a Colonial Revival style Craftsman duplex. Fieldwork completed to date has revealed only three other Colonial Revival Craftsman duplexes of comparable integrity within the City of West Hollywood's R2, R3, and R4 zones. (A few additional examples are located within the City's R1 zone but these were not formally evaluated as part of this review.)

Therefore, the property appears eligible for listing as a City of West Hollywood cultural resource under criterion B as one of the few remaining examples of a Colonial Revival Craftsman duplex in the City. The property does not appear eligible for individual listing on the National or California Registers. The property has not been evaluated as a potential contributor to any district, geographic or thematic.

n.b. This evaluation has been made at the request of the City of West Hollywood as part of a citywide historic resources survey of R2, R3 and R4 properties. The City requested that an expedited review be made for those properties included in the survey that have pending demolition permits. Analysis is based upon fieldwork completed through October 2005 (representing approximately 80% of the total parcels to be surveyed) and available historical information and previous surveys provided by the City of West Hollywood. A historic context statement has not been fully developed to guide evaluations and potential districts have not yet been identified. As a result, the conclusions are considered preliminary, are necessarily cautious, and may change in the final analysis.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it does not represent any particular architectural style, and is not a fully realized example of any multi-family property type; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

Two buildings along an L-shaped, grassy, open court comprise this Minimal Traditional apartment complex; the building to the north is L-shaped, and that to the south is irregularly shaped. The court between them has grass, foundation plantings, and a few small trees, as well as one large tree that anchors the entrance at a low wall. The buildings are framed in wood and finished in stucco, and they feature many modernist characteristics such as an irregular plan, exaggeratedly broad and low-pitched gable roofs; some flat roofs; overhanging shed roofs with the upward sweep facing into the court; and horizontally-oriented multilight windows. A low garden wall clad in flagstone encloses the court, and the same material clads the small planters along some of the street façade. Some units open directly on to the sidewalk, and others are located off the court with entrance porches sheltered by flat canopies supported by simple metal poles. The building is in good condition and it has good integrity. It was designed in 1949 by Brandon Jonsten for the sum of $52,000; note that the designer's name is an approximation of what was hand-written on the permit, and the owner's name is not legible. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 2-story Prewar Courtyard Apartment building in the Tudor Revival style built in 1939. The building is e-shaped in plan. Exterior walls are stucco and brick. Ornamentation includes decorative half-timbering, horizontal wood siding in wall dormers, and balconettes with wrought iron railing. The building has a cross gable roof clad in composition shingles with flush eaves and multiple front-gabled wall dormers. There are two stucco chimneys and four brick chimneys. Visible windows are paired multi-light wood casements. A breezeway leads to the central courtyard. Entrances to individual units appear to be off the courtyard, but are not visible from the public right-of-way. There is a central courtyard with hardscaping, shrubs, mature trees, and walkways.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

1221 N. Sweetzer Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the bungalow court property type. As the building is an unremarkable example of the Tudor Revival style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Prewar Courtyard Apartment property type, as outlined in the 2023 Historic Context Statement.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Prewar Courtyard Apartments consist of multiple units in one or two larger buildings were arranged around a central courtyard. Many examples were architect-designed, reflecting the increasing wealth of multi-family residents during this period. Architects including Arthur and Nina Zwebell and F. Pierpont and Walter Davis were highly influential, helping to shape designs of the property type through the 20th century. (See continuation sheet.)

B10. Significance (Continued from Page 2): Like the Craftsman style, Tudor Revival has ties with the Arts and Crafts movement. Tudor Revival architecture draws inspiration from domestic architecture of the late medieval period in England, ranging from large manors to modest cottages. It emerged on the East Coast as early as the 1890s and became widely popular in Southern California by the 1920s.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance

Parcel No. 5554022019

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story, Tudor Revival, apartment building is rectangular in plan and covered by a flat roof; a hipped roof with exposed rafter tails, clad in composition shingle, caps the front portion. The building is framed in wood, clad in stucco, and has fenestration of double hung, multilight, wood frame windows. The east-facing primary façade has a two-story projecting bay window to the south, and a central bay with the entrance on the ground floor and a recessed balcony on the second floor. Wood shutters flank some smaller windows. The edges of the primary façade are lined with quoins. The building is in fair condition and it appears to have good integrity. It was designed in 1939 by George Lutz and constructed for $18,000. This building contributes to a Garden Court Thematic Grouping eligible at the local level under the City of West Hollywood Historic Preservation Ordinance by criteria established by the City Council (see Historic District DPR form).

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing ineligible for listing as an individual resource. It was re-surveyed as part of the 2022-2023 multi-family survey update and re-evaluated due to its age.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. It is an unremarkable example of a single-family residence. It does not embody any particular style of architecture and does not appear to have an important association with early residential development in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and materials have been diminished by alterations to the cladding and windows.

Parcel No. *5554-020-033*

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This single-family residence was designed as an example of the Colonial Revival style. Oriented to the west, the building is irregular in plan and two stories tall. Exterior walls are clad with textured stucco that does not appear original. A low-pitched hipped roof with boxed eaves appears to be covered with roll roofing. The main façade is symmetrical in composition. A multi-paneled wood front entry door is capped by an arch and is approached by a concrete stair. It is sheltered by a portico with simple entablature that is supported by two pairs of smooth attenuated columns with Doric capitals; it appears to be original. A stringcourse divides the first and second floors of the building. Windows on the first floor consist of two pairs of openings that flank the front entry. They are composed of paired wood casements set in wood surrounds and are capped by blind arches; they are located behind metal security bars. Wood casements are not typical of the Colonial Revival style and may be part of a later alteration; double-hung sash with multi-pane glazing are typically used as the Colonial Revival window prototype. Windows do not appear original. Openings on the second floor consist of a small central double-hung wood sash window flanked on either side by original double-hung wood sash windows; one has lost its original wood muntins and both appear to have non-original material in their lower sashes. A pair of shutters with decorative paneled bases flanks these outer windows. According to the 1950 Sanborn, a garage is located at the rear of the parcel. The condition of the building is good; the building's integrity is fair.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Constructed in 1916, this single-family residence is designed in the Colonial Revival style. The Philadelphia Centennial of 1876, coupled with the prevailing manifest destiny ideology of the era, launched a strong interest in the nation's colonial architectural heritage and the Colonial Revival movement emerged in the 1880s as a result. Successive waves of the Colonial Revival style were manifested through the late nineteenth and twentieth centuries with the most accurate depictions built in the years between 1915 and 1935 as a result of new printing methods and greater dissemination of photographs in books and periodicals. Character-defining features of the style include gabled or low-pitched hipped roofs, pairs of multi-pane windows with double-hung sashes, and an accentuated front entry highlighted by a pediment and attenuated columns. The style was a part of the broader period revival movement and was used in the design of primarily single-family residences in West Hollywood and Southern California in the 1920s.

No original building permit was located in the City of West Hollywood's property records. According to County of Los Angeles Tax Assessor records, this single-family residence was originally constructed in 1916.

The building is located on the 1919 (revised to 1950) Sanborn map of Los Angeles (Volume 10). According to the 1919/1950 map, the building was located on a west-facing block comprised of a combination of single-family residences, small apartment buildings, and duplexes. The opposing, east-facing block was composed of ten parcels that, in 1950, were occupied by twelve single-family residences, one duplex, nine small apartment buildings, and one store.

B14. Evaluator: *Katie Wollan & Jeni Rohlin*
Architectural Resources Group

Date of Evaluation: *11-22-06*

(This space reserved for official comments.)

B10. Significance continued:

This single-family residence appears intact in terms of massing and form but has had some alterations of materials, design, and workmanship. Second floor windows appear to have undergone minor alterations. The current cladding is not original. Decorative elements such as the first floor arches and the second floor shutters do not appear original. While the property retains its original location and setting, its integrity of design, materials, workmanship, feeling and association are partially diminished as a result of the alterations of materials. The property's overall integrity is fair.

Based on information identified as part of this survey, this building does not appear to be individually significant for its historic association with any person, significant event, or broad pattern of events. While this building does not represent the work of a master, this property does embody the distinguishing characteristics of a building style and type- the Colonial Revival single-family residence. However, fieldwork has revealed a number of structures of comparable quality, style and type that retain an equal or higher level of integrity located within the City of West Hollywood. The property does not appear to be an individually significant or rare example of the type.

Therefore, the property does not appear eligible for individual listing on the National or California Registers or as a City of West Hollywood Cultural Resource.

N.B. In September 2005, ARG was contracted by the City of West Hollywood to conduct a historic resources survey of all R-2, R-3, and R-4 zoned parcels in the City. These parcels are generally developed with multi-family housing of various eras, styles, and density; however, some parcels with these zoning designations contain older single-family residences. During the course of the survey, the City has periodically requested that ARG conduct an expedited historical assessment for those properties included in the survey area that have pending demolition permits.

With reconnaissance fieldwork and preliminary research related to historic contexts completed (February 2006), there appears to be minimal potential for historic districts containing older single-family residences to exist in the areas zoned multi-family. During the reconnaissance phase approximately 600 single-family residences were found throughout the multi-family zoned survey area. There does not appear to be a significant cluster of single-family resources that retains integrity within the survey area due to the intrusion of infill, larger-scaled development and the incremental loss of original materials on many of these older single-family residences. There may be potential historic districts or clusters of significant single-family resources outside of the multi-family zoned areas of the city. ARG did not survey these areas, nor were contexts associated with single-family development in greater Los Angeles County explored.

For purposes of this expedited review prepared after completion of fieldwork, ARG did not conduct ownership or tenancy research on this single-family property as it has been found that little historical data is generally available with regard to owner or occupant. Additionally, it was determined that there was minimal chance that this information would lead to a determination of individual significance.

This is a 3-story Postwar Courtyard Apartment in the Mid-Century Modern style built in 1952. The building is irregular in plan. Exterior walls are stucco. Ornamentation includes signage reading "SUNSET LANAI" and "1422." The building has a shed roof with overhanging eaves. Fixed, awning, and jalousie windows are arranged in horizontal bands around the building. Individual unit entrances are accessed from the exterior along walkways and upper-story balconies with canted metal and wood railings. Landscaping includes mature trees and shrubs throughout the property and a communal courtyard with a swimming pool.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing eligible for listing as an individual resource. In 2010, the West Hollywood Historic Preservation Commission voted to recommend designation of the resource to City Council. In 2012, City Council continued the item indefinitely.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story vernacular modernist apartment building is named the "Sunset Lanai." It is L-shaped in plan and set at roughly a thirty degree angle to the street, with the open part of the L oriented to the south to enclose a courtyard with a swimming pool. It is covered by a flat roof with wide overhanging eaves and finished in stucco. Fenestration consists of ganged metal fixed and casement sash windows that form horizontal banding across the façades. The central section of the façade is recessed. Second floor apartments are approached by a pair of stairs each flanked by a decorative hand-rail that continues across the second floor to form a decorative balcony front; apartment entries consist of multi-paneled wood doors. A retaining wall (possibly added later) composed of rough-textured concrete block lines the north half of the building and flanks the driveway. The building is in good condition and appears to have good integrity. No original building permit was located in the City of West Hollywood's property records, but county tax assessor records indicate that it was built in 1952.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Edward Fickett, FAIA designed several buildings within the City of West Hollywood, including four within the survey area. After graduating from the University of Southern California and working with local architect Sumner Spaulding, Fickett received a master's degree in city planning from the Massachusetts Institute of Technology. After returning from military service in World War II, he formed a partnership with Francis J. Heusel before opening his own practice in 1947. Fickett's work in the postwar years included commercial, multi-family housing and single-family tract housing projects. Fickett was the recipient of professional honors and recognition throughout his career, including the National Association of Home Builders Awards of Merit throughout the 1950s, the Progressive Architecture Design Award in 1954, AIA merit award in 1956 and 1957 and House and Home Magazine awards in 1956 and 1957. He was finally named a Fellow of the American Institute of Architects (AIA) in 1969. He died in 1999.

Fickett designed several apartment buildings in West Hollywood, Hollywood, and Los Feliz in the 1940s and 1950s in addition to designing house plans for tract developments throughout greater Los Angeles. The architect incorporated what became known as characteristic "Fickett" elements in these designs low pitched or broad sloping roofs and high ceilings with exposed beams, generous use of plate glass set into deep wood framing and a mix of natural and synthetic materials including stone, stucco, fiberglass, steel and wood. Most of these are designed with a focus on interior patios with swimming pools surrounded by lush subtropical plantings including banana trees, palms, yuccas, and giant bird of paradise.

As a representative work of a notable local architect, it appears individually eligible for listing on the National and California Registers (Criterion C, 3), at the local level of significance, and as a City of West Hollywood Cultural Resource (Criterion D).

P3a. Description: (Describe resource and its major elements. Include design, materials, condition,alterations, size, setting, and boundaries.)

This is a 1-story single-family residence built in the Craftsman style in 1913. The building is rectangular in plan. Exterior walls are horizontal wood siding and stucco. The building has a cross-gabled roof clad in composition shingles with open eaves and exposed rafter tails. Windows consist of multi-light wood fixed and casement windows and six-over-one double-hung wood windows. The main entryway consists of a partially glazed wood-paneled door accessed by a set of steps. There is a 1-story, detached garage to the rear of the main building. Landscaping consists of mature trees and shrubs in a front yard surrounded by a metal fence. A concrete walkway leads to the main entrance and there is a side driveway at the south end of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing ineligible for listing as an individual resource. It was re-surveyed as part of the 2022-2023 multi-family survey update and evaluated as part of an expedited review.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Single-Family Residence property type and Craftsman architectural style, but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design has been diminished by a front addition.

A Historic Resources Assessment was prepared for the property in 2019 in anticipation of a proposed redevelopment project. The assessment concluded that the property did not appear eligible for listing in the local, state, or national levels due to a lack of historical associations, architectural distinction, and integrity. GPA concurs with these findings.

e. Other Locational Data: (e.g., parcel #, directions to resource, elevation, etc., as appropriate)

Parcel No. *4340023023*

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This one-story Craftsman bungalow, constructed in 1913, is largely obscured from the public right of way by trees, shrubs, and small plantings in the front yard of the parcel. The building is oriented to the west and has an irregular plan. The northern portion of the structure is an addition. The southern portion of the building is the original structure, featuring a gable roof and wood, clapboard siding. The northern addition features a gable roof with stucco siding. The main entrance, accessed by a short flight of steps flanked by low, stepped walls, is located at the junction of these two portions, covered by a flat, curve-edged roof. North of the main entrance is a multi-lite casement window. A brick course runs along the foundation of the stucco addition.

This property is associated with the historical development of the town of Sherman but, due to alterations and additions, it does not currently convey that significance. This property does not appear individually eligible for historical designation at the local, state or federal level. Due to loss of integrity, this property does not appear eligible for listing as part of any thematic grouping of Craftsman style houses and bungalows.
