Trinomial _____

***NRHP Status Code** 6Z

Page 2 of 27

***Resource Name or #:** (Assigned by recorder) Crescent Heights Study Area

D1. Historic Name: None D2. Common Name: None

***D3. Detailed Description:** (Discuss overall coherence of the district, its setting, visual characteristics, and minor features. List all elements of district.)

The study area was assessed as a potential historic district in response to public comment. On this block, Crescent Heights Boulevard is a wide thoroughfare with two lanes of traffic in each direction. It is lined with street trees and has contemporary infrastructure, including sidewalks, curb cuts, signage, and lighting.

There are 16 properties within the study area constructed between 1928 and 1985, with a majority dating to the immediate postwar period. The buildings in the study area include examples of Prewar Apartment Houses and Postwar Courtyard Apartments but there is no prevailing architectural style. The buildings have a generally uniform setback and height, but vary greatly in width and massing along their street-facing elevations.

***D4 Boundary Description:**

The study area includes the first parcel on both the east and west sides of Crescent Heights Boulevard between Norton Avenue to the south and Fountain Avenue to the north.

***D5. Boundary Justification:**

The boundaries of the study area were defined through public comment.

D6. Significance: Theme Pre- and Post-War Multi-Family Residential Development Area West Hollywood

Period of Significance 1925-1965 Applicable Criteria N/A

(Discuss district's importance in terms of its historical context as defined by theme, period of significance, and geographic scope. Also address the integrity of the district as a whole.)

This block of Crescent Heights as a whole does not appear to constitute a historic district that would be eligible for listing in the National Register or California Register, or for local designation through survey evaluation (6Z).

The present-day location of the study area was historically part of the Crescent Heights tract, which was filed in 1905 with the Title Insurance & Trust Company listed as the owner. Lots were advertised and sold by the Norton & Hay company, a partnership between William H. Hay and C.E. Norton. The large tract was bounded by Sunset Boulevard to the north, Fairfax Avenue to the east, Santa Monica Boulevard to the south, and Sweetzer Avenue to the west. Advertising for the tract emphasized the "villa"-sized lots, proximity to streetcar lines, scenic views, and "frostless" climate. By 1919, the area was sparsely developed with 1- and 2-story single-family residences, and all the lots were reportedly sold by 1921.

In a 1938 aerial photograph, more single-family residences are shown mid-block and two larger multi-family buildings—La Fontaine and Villa Italia—are visible at the intersections with Fountain Avenue and Norton Avenue. By 1950, the next year shown in Sanborn Maps, multi-family development is interspersed with the single-family homes. By 1960, all of the extant buildings in the study area appear on the Sanborn Map, except for the 1985 building at 1274 Crescent Heights Boulevard. (See continuation sheet.)

***D7. References:** (Give full citations including the names and addresses of any informants, where possible.)

See continuation sheet.

***D8. Evaluator:** Amanda Duane

D6. Significance (Continued from Page 2):

This review of historic maps, photographs, and contemporary newspaper articles indicates that the construction of extant buildings within the study area took place gradually over time, consistent with the overall citywide patterns of development. Initial construction comprised single-family residences on individual lots, which were demolished and replaced with higher-density multi-family buildings in a piecemeal fashion over the next several decades. 1274 Crescent Heights Boulevard reflects another wave of redevelopment, with the 1985 building replacing an earlier multi-family building, which had replaced a single-family residence.

The study area is associated with multi-family development trends in West Hollywood, but research did not reveal any evidence to suggest that it is an important or direct association that would rise to the level of historic significance, or differentiate it from any number of other blocks of apartment buildings in the vicinity. Of the properties in the study area, two were previously listed individually in the local register (Villa Italia and La Fontaine). Five were previously evaluated in 2008 as appearing eligible for local listing as part of the Garden Court Thematic Grouping and were re-evaluated as individual resources as part of the 2022-2023 multi-family survey update. The updated evaluations concluded that two appear individually eligible and three do not. Although there are individually eligible and designated properties within the study area, the intervening properties are generally unremarkable examples of their respective multi-family residential property types. Many do not embody a specific architectural style, and several have diminished integrity. While the study area is consistently multi-family residential in use, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 5-story Prewar Apartment House (Type B) in the Italianate style built in 1931. The building is roughly rectangular in plan. Exterior walls are brick. Ornamentation consists of quoins, balconettes, string courses, decorative mullions, and bas-relief medallions. The building has a low-pitched hipped roof clad in composition shingles with overhanging eaves. The roof is accentuated by decorative corbels. Windows consist of arched and rectangular multi-light wood casements. Individual unit entrances are accessed via interior corridors. The main entrance consists of a fully glazed metal door with sidelights and a transom window within a large arched opening. The entrance is accessed by two mirrored sets of concrete steps. Landscaping is limited and consists of foundation plantings. There is a vehicular entrance on the south edge of the property along Norton Avenue.

1201 N. Crescent Heights Boulevard, Villa Italia, is individually listed as a local landmark and was designated in 1994.

1201 N. Crescent Heights Boulevard was also evaluated as part of a potential district in the Crescent Heights Study Area; however, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

This is a 2-story multi-family residence with Late American Colonial Revival influences built in 1950. The building is L-shaped in plan. Exterior walls are vertical wood siding and brick veneer. Ornamentation consists of a scalloped edge to the wood siding between the first and second story and wrought iron railings. The building has a cross-gabled roof clad in composition shingles with shallow open eaves. Windows consist of multi-light paired metal casements. Individual unit entrances are accessed from the courtyard and consist of single wood-paneled doors. A 2-story ancillary building with soft-story parking and what appears to be additional dwelling unit(s) is located at the rear of the property. Landscaping consists of a brick planter along the street-facing elevation with trees and shrubs and a shared courtyard with a swimming pool.

1227 N. Crescent Heights Boulevard was evaluated as part of a potential district in the Crescent Heights Study Area; however, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

This is a 2-story multi-family residence with Mid-Century Modern influences built in 1950. The building is U in plan. Exterior walls are stucco. The building has a hipped roof clad in composition shingles with overhanging boxed eaves. Windows are a mix of single-light, hung vinyl windows and narrow fixed windows divided by vertical fins along the front elevation and interior courtyard. Individual unit entrances are not visible from the public right-of-way. Inset entryway is located adjacent to the driveway. A 1-story, ancillary building is located at the rear of the property. Landscaping includes a front yard area with grass lawn, shrubs, and shallow brick planter, as well as a courtyard area with concrete walkways, brick retaining walls, trees, shrubs, and grass lawn.

1233 N. Crescent Heights Boulevard was evaluated as part of a potential district in the Crescent Heights Study Area; however, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment House (Type B) in the Chateausque style built in 1941. The building is I-shaped in plan. Exterior walls are stucco. Ornamentation consists of quoins, balconettes, stringcourses, and bas-relief panels. The building has a high hip roof clad in artificial slate shingles with flush eaves. The roof is accentuated by turrets and finials and arched attic vents that echo the appearance of dormers. Multi-light wood windows are primarily fixed or casement in operation and are arranged in pairs, bays, and groups. There are two entryways on the west-facing elevation consisting of wood-paneled doors within decorative surrounds. Individual units appear to be accessed from interior corridors. The building has a communal landscaped area with mature trees, shrubs, a fish pond, and walkways.

B9a. Architect: Unknown B9b Builder: Unknown

*B10. Significance: Theme Apartment Houses; Prewar Apartment Houses; Period Revival: French Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1926-1941 Property Type: Residential Applicable Criteria: A/C; 1/3; A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Prewar Apartment House property type as defined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

1234 N. Crescent Heights Boulevard appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Chateausque style.

It possesses most character-defining features of Prewar Apartment House (Type B) property type and the French Revival (Chateausque) architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like La Fontaine) helped to attract tenants. French Revival was a popular style for prewar apartment buildings. French Revival is a broad term that describes architecture influenced by a variety of French buildings, ranging from the ornate (Chateausque) to the modest (French Provincial). The style is characterized by features such as steeply pitched roofs with dormers, turrets, and towers, decorative finials, cornice lines, and stringcourses.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

1234 N. Crescent Heights Boulevard was also evaluated as part of a potential district in the Crescent Heights Study Area; however, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

It possesses most character-defining features of the Postwar Courtyard Apartment property type and Late American Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts..

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing. During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Late American Colonial Revival is more stripped-down than its earlier counterparts, lending itself well to post-war construction. The style is characterized by symmetrical facades, pediments, and simplified features.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

1241 N. Crescent Heights Boulevard was also evaluated as part of a potential district in the Crescent Heights Study Area; however, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

*B10. Significance: Theme Courtyard Apartments: Postwar Courtyard Apartments B10 Area: West Hollywood

Period of Significance: 1945-1969 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Postwar Courtyard Apartment property type, but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design and materials have been diminished by the installation of non-original vinyl windows.

1251 N. Crescent Heights Boulevard was also evaluated as part of a potential district in the Crescent Heights Study Area; however, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Courtyard Apartment in the Early American Colonial Revival style built in 1939. The two buildings are rectangular in plan. Exterior walls are stucco. Ornamentation consists of decorative window and door surrounds, quoins, and belt courses. The buildings have hipped roofs clad in composition shingles with boxed eaves and decorative molding. Multi-light wood windows are fixed, double-hung, or casement in operation. They are arranged individually and in tripartite bays. There is a multi-light octagonal window above the entry on the primary elevation. Visible entrances on the primary elevations consist of single wood-paneled doors within decorative pedimented surrounds with fluted pilasters. Individual units appear to be accessed from interior corridors. There is a front yard with mature trees and a concrete walkway separating the two buildings.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 4-story Prewar Apartment House (Type B) in the Chateausque style built in 1928. The building is L-shaped in plan. Exterior walls are brick. There are multiple interior chimneys. Ornamentation consists of quoins, string courses, and a dentilled cornice. The building has a steeply pitched hipped and mansard roof clad in slate tiles with flush eaves. The roof is accentuated by rounded and gabled dormers, wall dormers, wrought iron cresting, and finials. Windows consist of multi-light wood casements with transoms. Individual unit entrances are accessed via interior corridors. Entrances to the building are obscured from the public right-of-way by heavy vegetation. Landscaping consists of a grass lawn, walkways, and a water feature at the front of the property. There are mature trees and hedges throughout. The front landscaping is above-grade and is enclosed by a low brick wall with a cast stone balustrade. There is an entrance to subterranean parking on the east edge of the property.

1285 N. Crescent Heights Boulevard, La Fontaine, is individually listed as a local landmark and was designated in 1991.

1285 N. Crescent Heights Boulevard was also evaluated as part of a potential district in the Crescent Heights Study Area; however, the block of Crescent Heights Boulevard between Fountain Avenue and Norton Avenue is not a definable geographic area that is meaningfully differentiated from its surroundings, and the properties within are not visually or historically unified in such a way that would constitute a historic district.

Page 2 of 18

***Resource Name or #:** (Assigned by recorder) De Longpre Study Area

D1. Historic Name: None D2. Common Name: None

***D3. Detailed Description:** (Discuss overall coherence of the district, its setting, visual characteristics, and minor features. List all elements of district.)

The study area was assessed as a potential historic district in response to public comment. On this block, De Longpre Avenue is perpendicular to Sweetzer and Harper Avenues and has one lane of traffic in each direction. It is lined with jacaranda, Canary Island date palm, weeping fig, and black acacia street trees and has contemporary infrastructure, including sidewalks, curb cuts, signage, and lighting.

There are 10 properties within the study area constructed between 1950 and 1964. The buildings in the study area include examples of Postwar Apartment Houses, Stucco Boxes, and Postwar Courtyard Apartments but there is no prevailing architectural style. The buildings have a generally uniform setback and height, but vary in width and massing along their street-facing elevations.

***D4 Boundary Description:**

The study area includes the first parcel on both the north and south sides of De Longpre Avenue between Sweetzer Avenue to the west and Harper Avenue to the east, excluding 1401 N. Harper Avenue, which is a single-family residence constructed in 1917.

***D5. Boundary Justification:**

The boundaries of the study area were defined through public comment.

D6. Significance: Theme Post-War Multi-Family Residential Development Area West Hollywood
Period of Significance 1946-1965 Applicable Criteria N/A

(Discuss district's importance in terms of its historical context as defined by theme, period of significance, and geographic scope. Also address the integrity of the district as a whole.)

This block of De Longpre Avenue as a whole does not appear to constitute a historic district that would be eligible for listing in the National Register or California Register, or for local designation through survey evaluation (6Z).

The present-day location of the study area was historically part of the Crescent Heights tract, which was filed in 1905 with the Title Insurance & Trust Company listed as the owner. In 1913, the area bounded by Sunset Boulevard to the north, Harper Avenue to the east, Fountain Avenue to the west, and Sweetzer Avenue to the west was resubdivided as Tract No. 2266 for Sidney L. Briggs and the Price Estate Company. In the original tract map, De Longpre Avenue is Wilson Avenue. Newspaper archive research did not reveal information about any marketing or lot sales for the tract.

In the 1919 Sanborn Map, Wilson Avenue was renamed De Longpre Avenue, and five single-family residences are shown, four of which are on the south side of the block. In a 1938 aerial photograph, both sides of the street appear to be fully developed with single-family residences.

By 1950, the next year shown in Sanborn Maps, the block is still predominantly single-family. The single-family residence at the southwest corner of De Longpre and Harper Avenues (present-day 8200 De Longpre Avenue) is demolished and the lot is shown as vacant. Multi-family residential development is interspersed among single-family residence along streets in the vicinity, including Havenhurst Drive. (See continuation sheet.)

***D7. References:** (Give full citations including the names and addresses of any informants, where possible.)

See continuation sheet.

D6. Significance (Continued from Page 2):

In the 1955 Sanborn Map, there are just three apartment buildings on the south side of De Longpre Avenue, but by 1960, there are eight. In the 1961 and 1962 Sanborn Maps, all of the present-day apartment buildings are present apart from 1330 N. Sweetzer Avenue, which was constructed in 1964. Similar patterns are observed along the streets in the vicinity.

This review of historic maps and aerial photographs indicates that the construction of extant buildings within the study area took place over the course of approximately a decade, consistent with the overall citywide patterns of development. Initial construction comprised single-family residences on individual lots, which were demolished and replaced with higher-density multi-family buildings in a piecemeal fashion between 1950-1964.

The study area is associated with multi-family development trends in West Hollywood, but research did not reveal any evidence to suggest that it is an important or direct association that would rise to the level of historic significance, or differentiate it from any number of other blocks of apartment buildings in the vicinity. Of the properties in the study area, one was evaluated as an individual resource and appears to be eligible for local listing (8200 De Longpre Avenue). Although there is an individually eligible property within the study area, the intervening properties are generally unremarkable examples of their respective multi-family residential property types. Many do not embody a specific architectural style, and several have diminished integrity. While the study area is consistently multi-family residential in use, the block of De Longpre Avenue between Sweetzer Avenue and Harper Avenue is not meaningfully differentiated from its surroundings in terms of development. While the street has some visual cohesion with consistent street trees and similar setbacks, the properties within are not visually or historically unified in such a way that would constitute a historic district.

Period of Significance: 1945-1969; 1940-1965 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Courtyard Apartment.

8200 De Longpre appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood, and as a fully realized example of the Late American Colonial Revival style and Postwar Courtyard property type. Due to minor alterations, the property may not meet state or national thresholds for integrity.

It possesses most character-defining features of Late American Colonial Revival style and Postwar Courtyard property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing. During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Late American Colonial Revival is more stripped-down than its earlier counterparts, lending itself well to post-war construction. The style is characterized by symmetrical facades, pediments, and simplified features.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

8200 De Longpre Avenue was also evaluated as part of a potential district in the De Longpre Study Area; however, while the block of De Longpre Avenue between Sweetzer Avenue and Harper Avenue is somewhat visually unified by street trees and multi-family residential buildings of roughly similar size, massing, and construction date, it does not appear to be meaningfully differentiated from its surroundings in such a way that would constitute a historical significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)
This is a 2-story apartment house with French Revival influences built in 1950. The building is rectangular in plan. Exterior walls are stucco. Ornamentation consists of quoins and a string course. The building has a hipped roof clad in composition shingles with boxed eaves. Fenestration consists of multi-light casement windows. Individual units appear to be accessed via interior corridors. The main entrance to the building consists of a single wood-paneled door under a rounded canvas awning. The entrance is accessed by a set of shallow steps.

The building has a front yard area with a lawn and foundation plantings. The yard is enclosed by a low metal fence. There are concrete walkways leading to a unit entrance on the front elevation and along the west side of the property. There is a concrete driveway running along the east edge of the property. There is a one-story carport and soft-story parking at the rear of the property.

8210 De Longpre Avenue was evaluated as part of a potential district in the De Longpre Study Area; however, while the block of De Longpre Avenue between Sweetzer Avenue and Harper Avenue is somewhat visually unified by street trees and multi-family residential buildings of roughly similar size, massing, and construction date, it does not appear to be meaningfully differentiated from its surroundings in such a way that would constitute a historical significance.

e. Other Locational Data: (e.g., parcel #, directions to resource, etc. as appropriate) APN: 5554-019-060

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 5-story Postwar Apartment House (Type A) in the Mid-Century Modern style built in 1964. The building is roughly rectangular in plan. Exterior walls are stucco. The building has a flat roof with a parapet and a standing-seam metal mansard roof at the northeast corner. Fenestration consists of ribbons of fixed and sliding aluminum windows. Individual units are accessed by interior corridors. There are balconies for individual units on the south and west elevations. The main entrance to the building consists of a fully glazed metal door sheltered under a flat canopy with signage reading "SUNSET PENTHOUSE."

Landscaping consists of foundation plantings as well as trees and shrubs at the rear of the building. There is a vehicular entrance on the south elevation along De Longpre Avenue and another on the west elevation along Sweetzer Avenue.

1400 N. Sweetzer Avenue was evaluated as part of a potential district in the De Longpre Study Area; however, while the block of De Longpre Avenue between Sweetzer Avenue and Harper Avenue is somewhat visually unified by street trees and multi-family residential buildings of roughly similar size, massing, and construction date, it does not appear to be meaningfully differentiated from its surroundings in such a way that would constitute a historical significance.

DISTRICT RECORD

Primary # _____
HRI # _____
Trinomial _____

***NRHP Status Code** 5S3

Page 2 of 38

***Resource Name or #:** (Assigned by recorder) Vista Street Residential Historic District

D1. Historic Name: None D2. Common Name: None

***D3. Detailed Description:** (Discuss overall coherence of the district, its setting, visual characteristics, and minor features. List all elements of district.)

The Vista Street Residential Historic District is located on N. Vista Street between Santa Monica Boulevard and Fountain Avenue (see Location Map on page 3). On this block, Vista Street is oriented north-south apart from a gentle curve north of Lexington Avenue. The street has uniform street trees including tipu, crape myrtle, jacaranda, and water gum, and contemporary infrastructure, including sidewalks, curb cuts, signage, and lighting.

There are 27 properties within the district boundaries, five of which are non-contributing because they were either constructed outside the period of significance or lack integrity due to extensive alterations. The contributing buildings date from 1917 to 1938 and include single family residences, duplexes, fourplexes, and apartment houses. Craftsman and Spanish Colonial Revival are the most predominant architectural styles, and several of the buildings within the district are also individually significant. The five properties on the east side of Vista Street are already designated as the Plummer Park Apartment Grouping. Each contributor to the Vista Street Residential Historic District has a shallow to moderate setback that forms a front yard, as well as a side driveway leading to the rear of the property and detached ancillary buildings. The majority of ancillary buildings and secondary dwellings are not visible from the public right-of-way; therefore, they were not included in the count of contributors and non-contributors. However, many were constructed during the period of significance and are considered to contribute to the significance of the district provided that they retain physical integrity.

***D4 Boundary Description:**

The Vista Street Historic District includes early and pre-war residential properties on the east (1109 to 1257) and west (1124-1144) sides of N. Vista Street.

***D5. Boundary Justification:**

The district boundary encompasses those parcels that were subdivided as part of Tract Nos. 1554 and 5576 and are occupied by early single- or multi-family residential properties while omitting those at the north and south ends of the street that lack integrity and/or post-date the period of significance.

D6. Significance: Theme Early and Pre-War Multi-Family Residential Development Area West Hollywood

Period of Significance 1895-1945 Applicable Criteria Local: A2/A3

(Discuss district's importance in terms of its historical context as defined by theme, period of significance, and geographic scope. Also address the integrity of the district as a whole.)

The Vista Street Residential Historic District appears eligible for designation as a West Hollywood Cultural Resource (5S3) as a historic district through survey evaluation. It is significant in the context of Early and Pre-War Multi-family Residential Development under local criteria A2 and A3 as a geographically definable area unified by physical development that represents cultural patterns that comprised the early growth of West Hollywood. While there are numerous streets in West Hollywood that contain a range of single- and multi-family residential properties, the Vista Street Residential Historic District as a whole has a notable level of integrity, concentration of duplexes, and boundaries that coincide with historic tract maps. The district also has few instances of the larger-scale postwar construction that interrupts the consistency of size, height, and massing of similar streets throughout the city. As these types of neighborhoods are rare in West Hollywood but ubiquitous throughout the region, the district appears unlikely to meet state or national thresholds for significance.

The present-day location of the Vista Street Residential Historic District was historically part of the extensive land holdings of Eugene R. Plummer, a prominent early citizen and for whom Plummer Park is named. Plummer's primary holdings—approximately 100 acres—were bounded by Sunset Boulevard to the north, La Brea Boulevard to the east, Santa Monica Boulevard to the south, and Gardner Avenue to the west. Plummer's land gradually dwindled to three acres through a series of sales and subdivisions, the last few acres of which was transferred to Los Angeles County in 1937. The district includes portions of Tract No. 1554 and Tract No. 5576, which were filed in 1912 and 1922, respectively. (See continuation sheet).

***D7. References:** (Give full citations including the names and addresses of any informants, where possible.)

See continuation sheet.

D6. Significance (Continued from Page 2):

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. The earliest buildings within the Vista Street Residential District were completed by 1917 and 1918, making up part of the concentration of development adjacent to Hollywood. They are shown in the 1919 Sanborn Map as six single-family residences with detached garages.

In 1919, Vista Street did not yet connect between Fountain Avenue and Santa Monica Boulevard. It ended at the southern boundary of Tract No. 1554, approximately 300 feet from Fountain Avenue. The 1922 plat of Tract No. 5576 extended Vista Street through to Santa Monica Boulevard. After Tract No. 5576 was platted, construction of the remaining district contributors, all multi-family, was completed within the next 16 years. This development on Vista Street coincided with the rising demand for housing in West Hollywood in the pre-war years. While increased density was at odds with the general cultural preference for single-family development during this time, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received. Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. As higher-density luxury construction became more of a priority, two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants.

By 1950, the next year shown in Sanborn Maps, both sides of Vista Street are shown fully developed apart from the open space associated with Plummer Park. The properties on the west side of Vista Street continue uninterrupted between Fountain and Santa Monica; however, by 1955, Lexington Avenue was extended to Plummer Park from Gardner Street. Two properties, 1200 N. Gardner Street (a 2-story apartment house) and 1203 N. Vista Street (a 1-story duplex) were removed to facilitate the connection. All properties within the Vista Street Residential Historic District boundaries that were illustrated on the 1950-1955 Sanborn Fire Insurance Maps are extant, except for 1147-1149 N. Vista Street, a 1-story duplex, which was demolished and replaced with a 1961 stucco box.

The predominant architectural styles in the Vista Street Residential Historic District are Craftsman and Spanish Colonial Revival. The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The Craftsman style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors. The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The Spanish Colonial Revival style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

As indicated in the table and map on the following pages, properties within the district possess character-defining features of the Single-Family Residence, Duplex, Fourplex, and Pre-War Apartment House (Type A) property types, as well as the Craftsman and Spanish Colonial Revival architectural styles as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. All but five contribute to the district's historic character. Two have undergone some alterations that have diminished their integrity of materials, but they retain sufficient integrity to contribute to the overall historic character of the district.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story Duplex with Craftsman influences built in 1924. The building is irregular in plan. Exterior walls are wood siding. The building has a cross-gabled roof clad in composition shingles with open eaves and exposed rafter tails. Windows are aluminum sliders behind metal security bars. The entrance to the north unit is a single wood-paneled door within a recessed porch. The entrance to the south unit is obscured by a metal security door. Landscaping includes a front yard area with lawn, shrubs, and mature trees surrounded by a cinder block and metal fence. There is a concrete walkway leading to the north unit entrance and there is a side driveway running along the south edge of the property. There is a detached, 1-story ancillary building located at the rear of the property that was constructed in 1924 according to assessor's records. It is shown on the 1950 Sanborn Map as a garage and dwelling unit.

1123 N. Vista St possesses most character-defining features of the Duplex property type and some character-defining features of the Craftsman style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Fourplex in the Spanish Colonial Revival style built in 1929. The building is rectangular in plan. Exterior walls are brick. There are two exterior brick chimneys. Ornamentation includes wrought iron railings and a turret with a weathervane. The building has a hipped roof clad in clay tile at the front and a flat roof with a parapet to the rear. Windows include multi-light wood casements and one-over-one double-hung wood windows as well as a distinctive catenary arched picture window. The main entrance is a wood-paneled catenary arched door. On the second story there is a projecting balcony with wood supports and carved wood beams. Individual unit entrances are not visible from the public right-of-way. Landscaping includes a front yard area with a lawn, foundation plantings, and a concrete walkway leading to the main entrance. There is a detached 2-story ancillary building to the rear that post-dates the period of significance according to assessor's records (1957). It is shown on the 1960 Sanborn Map as two additional dwelling units.

1124 N. Vista St possesses most character-defining features of the Fourplex property type and the Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

1124 N. Vista Street is also one of five contributors to the local Plummer Park Apartment Grouping district that was designated in 1991 for its distinctive and cohesive architecture.

*B10. Significance: Theme Apartment Houses: Duplexes and Fourplexes; Exotic Revival: Egyptian Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1920-1945 Property Type: Residential Applicable Criteria: Local: A1/B

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment as an example of the Egyptian Revival style. The Egyptian Revival style is rare enough in West Hollywood that a theme was not developed for the context statement update; therefore, it was assessed using the Los Angeles Citywide Historic Context Statement.

1127 N. Vista Street appears eligible for designation as a West Hollywood Historic Resource as an individual property and as a contributor to the Vista Street Residential Historic District (5B) through survey evaluation. (See District Record.) While distinguishing architectural features were removed around 2021, including a winged orb motif above the primary entrance, residential examples of the Egyptian Revival style are very rare throughout the region. It is significant under local criteria A1 and B as a rare remaining example of the Egyptian Revival style applied to a residential building. As a modest example, the property may not meet state or national thresholds for integrity.

It possesses most character-defining features of the Duplex/Fourplex property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. Character-defining features include the characteristic battened entryway with cavetto cornice, stucco exterior, small window openings, and flat roof.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand.

In the Los Angeles region, Egyptian Revival was a rare and short-lived architectural trend in the Los Angeles region that became even more popular after the discovery of King Tutankhamen's tomb in 1922. The style shared many similarities with the architecture of the Art Deco movement, including the use of vibrant colors, abstracted nature motifs, and stepped forms. Although fanciful, the style was somewhat impractical, which contributed to its decline in popularity.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance. It also retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Pre-War Apartment House (Type A) in the Spanish Colonial Revival style built in 1924. The building is rectangular in plan. Exterior walls are stucco. Ornamentation includes wrought iron balconettes and clay tile overhangs above second-story windows. The building has a flat roof with a raised parapet. Windows consist of multi-light casements with arched and rectangular openings and vinyl hung windows. Individual units are accessed by single wood doors within a recessed porch at the center of the primary elevation. Landscaping is limited to a front lawn area with grass, shrubs, and a central concrete walkway. There is a 2-story ancillary building to the rear. The year of construction is not indicated in the assessor's records, but it is shown on the 1950 Sanborn Map as two additional dwelling units.

1131 N. Vista St possesses most character-defining features of Prewar Apartment House (Type A) and the Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story Duplex in the Craftsman style with Early American Colonial Revival influences built in 1923. The building is rectangular in plan. Exterior walls are wood siding. The building has a cross-gabled roof clad in composition shingles with boxed eaves and eave returns. Windows consists of paired, multi-light wood casements and one-over-one wood double-hung windows. Individual unit entrances are centered under projecting porches and consist of single wood doors flanked by sidelights. The porches are supported by round wood columns. There are two, 1-story detached garages at the rear of the main building. The property has a front yard area with shrubs and mature trees. There is a brick paver driveway running along the north and south edges of the property.

*B10. Significance: Theme Apartment Houses: Duplexes and Fourplexes; Craftsman; Period Revival: Early American Colonial Revival B10 Area: West Hollywood

Period of Significance: 1895-1925; 1906-1931; 1919-1939 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Duplex.

1141 N. Vista Street appears eligible for designation as a West Hollywood Historic Resource as an individual property and as a contributor to the Vista Street Residential Historic District (5B) through survey evaluation. (See District Record.) It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a good example of the Craftsman and Early American Colonial Revival styles as applied to a duplex. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Duplex property type and Craftsman and Early Colonial Revival architectural styles, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Early American Colonial Revival dates to the prewar period and is characterized by symmetrical facades and ornamentation such as pediments and wood window shutters.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance. It also retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Fourplex in the Spanish Colonial Revival style built in 1930. The building is rectangular in plan. Exterior walls are brick. There are two exterior brick chimneys. Ornamentation includes wood window shutters, punched screens, and a turret with a weathervane. The building has a hipped roof clad in clay tile at the front and a flat roof with a parapet to the rear. Windows include multi-light wood casements. The main entrance is a pair of partially glazed wood doors. There is a projecting balcony on the second story with wood railings and supports and carved wood beams. Individual unit entrances are not visible from the public right-of-way. Landscaping includes a front yard area with a lawn, brick planter, foundation plantings, and a concrete walkway leading to the main entrance. There is a detached 2-story ancillary building to the rear of the property constructed in 1933 according to assessor's records. It is shown on the 1950 Sanborn Map as two additional dwelling units.

1144 N. Vista St possesses most character-defining features of the Fourplex property type and the Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

1144 N. Vista Street is also one of five contributors to the local Plummer Park Apartment Grouping district that was designated in 1991 for its distinctive and cohesive architecture.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 3-story Stucco Box built in 1961. The building is rectangular in plan. Exterior walls are stucco. The building has a hipped (front) and gabled (rear) roof clad in composition shingles with shallow, boxed eaves. Windows consist of aluminum sliding, double-hung, and casement windows. Individual unit entrances, obscured by metal security doors, appear to be along the side elevation and are accessed by an exterior stair and walkway. Individual units have exterior balconies. The balcony on the front elevation is sheltered by a metal awning. There is soft-story parking at the front and south side of the building. Landscaping includes a geometric concrete block planter with shrubs flanking the exterior stair. A concrete driveway runs along the south edge of the property.

1147 N. Vista was constructed outside the period of significance (1917-1938) and does not contribute to the historic character of the Vista Street Residential Historic District.

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House (Type A).

1153 N. Vista Street appears eligible for designation as a West Hollywood Historic Resource as an individual property and as a contributor to the Vista Street Residential Historic District (5B) through survey evaluation. (See District Record.) It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Prewar Apartment House (Type A) and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance. It also retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story Duplex in the Spanish Colonial Revival style built in 1923. The building is rectangular in plan. Exterior walls are stucco. The building has a flat roof with stepped parapet and clay tile coping. Visible windows consist of multi-light, double-hung, fixed, and casement wood windows behind metal security bars. Individual unit entrances are sheltered under projecting porches with arched openings and consist of fully glazed multi-light wood doors. The north unit entrance is flanked by multi-light sidelights. Landscaping is limited to a front yard area with shrubs and trees surrounded by a metal fence, and there is a concrete walkway leading to both of the unit entrances. A concrete side driveway runs along the south edge of the property. There is a detached, 1-story ancillary building located at the rear of the property. The year of construction is not indicated in the assessor's records, but it is shown on the 1950 Sanborn Map as a garage.

1157 N. Vista St possesses most character-defining features of the Duplex property type and Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the style built in 1923. Research indicates that it was originally a duplex and had two units through at least 1962. The building is rectangular in plan. Exterior walls are stucco. Ornamentation includes a wood trellis over the main entrance. The building has a flat roof with raised parapet. Windows are fixed, sliding, and hung vinyl. The entrance is located at the center of the primary elevation and consists of a fully glazed three-light metal door. Landscaping includes shrubs and foundation plantings. The front of the property is partially enclosed by a low stucco wall, and there is a concrete side driveway that runs along the north edge of the property. There is a detached, 1-story ancillary building at the rear of the property. The year of construction is not indicated in the assessor's records, but it is shown on the 1950 Sanborn Map as a garage.

1211 N. Vista was substantially remodeled in 2022 and it no longer possesses sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

e. Other Locational Data: (e.g., parcel #, directions to resource, etc. as appropriate) APN: 5531-001-022

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story Duplex in the Spanish Colonial Revival style built in 1925. The building is rectangular in plan. Exterior walls are stucco. The building has a flat roof with raised parapet and clay tile coping. Windows are aluminum sliding and fixed. Individual unit entrances are sheltered within recessed entryways with arched openings and consist of fully glazed multi-light wood doors. Landscaping includes a front yard area with lawn, trees, hedges, and a concrete walkway leading to the south unit entrance. There is a side driveway that runs along the north edge of the property. There is a detached 2-story ancillary building at the rear of the property constructed in 1925 according to assessor's records. It is shown on the 1950 Sanborn Map as an additional dwelling unit.

1215 N. Vista has been altered, including incompatible changes to the cladding and windows. It no longer possesses sufficient physical integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story Duplex in the Spanish Colonial Revival style built in 1923. Based on what is visible, the building is rectangular in plan. Exterior walls are stucco. The building has a shed roof clad in clay tile at the front and a flat roof with clay tile coping at the rear. Visible windows include multi-light paired casements and vinyl sliding windows. Individual unit entrances are not visible from the public right-of-way due to a large hedge surrounding the front of the building. Landscaping consists of tall hedges at the front of the property and a side driveway runs along the north edge of the property. There is a detached 1-story ancillary building to the rear of the property. The year of construction is not indicated in the assessor's records, but it is shown on the 1950 Sanborn Map as a garage.

1221 N. Vista St possesses most character-defining features of the Duplex property type and Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story Duplex in the Spanish Colonial Revival style built in 1924. The building is rectangular in plan. Exterior walls are stucco. Ornamentation includes fabric spearhead awnings. The building has a flat roof with raised parapet and clay tile coping. Windows include single- and multi-light wood casements with arched and rectangular openings. Individual unit entrances consist of partially glazed wood paneled doors. Landscaping includes a front yard area with a lawn, shrubs, and trees surrounded by a wood fence with gate. A side driveway runs along the south edge of the property. There is a detached 1-story ancillary building to the rear of the property. The year of construction is not indicated in the assessor's records, but it is shown on the 1950 Sanborn Map as a garage.

1227 N. Vista St possesses most character-defining features of the Duplex property type and Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story Triplex in the Spanish Colonial Revival style built in 1929. Research indicates that it was originally a duplex and had two units through at least 1962. The building is rectangular in plan. Exterior walls are stucco. The building has a flat roof with raised parapet and clay tile coping. Visible windows are sliding vinyl. There are two individual unit entrances on the primary elevation consisting of single wood-paneled doors. Landscaping consists of a front yard area with trees, shrubs, and enclosed with a wooden fence. A side driveway runs along the south edge of the property. There is a detached 2-story ancillary building to the rear of the property constructed in 1930 according to assessor's records. It is shown on the 1950 Sanborn Map as an additional dwelling unit.

1231 N. Vista St possesses most character-defining features of the Duplex/Fourplex property type and Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It has been altered, including the installation of new windows in original openings, but retains sufficient physical integrity to contribute to the historic character of the Vista Street Residential Historic District.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1917. The building is rectangular in plan. Exterior walls are wood siding. There is an exterior brick chimney. The building has a front-gabled roof clad in composition shingles with open eaves and exposed rafter tails. Visible windows are single-light wood fixed. The main entrance is sheltered beneath a projecting porch and consists of a single partially glazed wood slab door. The porch is supported by tapered wood posts with brick piers. Landscaping includes a front yard area with a lawn and shrubs and hedges that run along the north and south sides of the building. There is a dual ribbon side driveway that runs along the south edge of the property. There is a detached 1-story ancillary building located to the rear of the property that post-dates the period of significance according to assessor's records (1939). It is shown on the 1950 Sanborn Map as an additional dwelling unit.

1237 N. Vista St possesses most character-defining features of the single-family residence property type and Craftsman architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

1237 N. Vista Street is also individually listed as a local landmark and was designated in 2010.

This is a 1-story single-family residence in the Craftsman style built in 1917. The building is rectangular in plan. Exterior walls are wood siding. There is an exterior brick chimney. The building has a cross-gabled roof clad in composition shingles with open eaves, exposed rafter tails, projecting beams, and a gable-end truss. Visible windows are single-light wood fixed. The main entrance is sheltered beneath a projecting porch and consists of a single partially glazed wood slab door. The porch is supported by wood posts with brick piers. Landscaping includes a front yard area with a lawn and foundation plantings. There is a dual ribbon side driveway that runs along the south edge of the property. There is a detached 1-story ancillary building located to the rear of the property. The year of construction is not indicated in the assessor's records, but it is shown on the 1955 Sanborn Map as a garage.

1241 N. Vista St possesses most character-defining features of the single-family residence property type and Craftsman architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

This is a 1-story single-family residence in the Craftsman style built in 1918. Based on what is visible, the building is rectangular in plan. Exterior walls are wood siding. The building has a front-gabled roof clad in composition shingles with open eaves and exposed rafter tails. Visible windows consist of single-light fixed, one-over-one double-hung, and casement wood windows. The main entrance is sheltered beneath a projecting porch but is not visible from the public right-of-way. The porch is supported by wood posts with brick piers. Landscaping includes a front yard area with trees and shrubs surrounded by a wood fence. There is a dual ribbon side driveway that runs along the south edge of the property. There are two detached 1-story ancillary buildings located to the rear of the property. The larger of the two was constructed in 1923 according to assessor's records. The larger building is shown on the 1950 Sanborn Map as an additional dwelling unit and the smaller building is shown as a garage.

1247 N. Vista St possesses most character-defining features of the single-family residence property type and Craftsman architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story single-family residence in the Craftsman style built in 1917. The building is rectangular in plan. Exterior walls are wood siding. The building has a front-gabled roof clad in composition shingles with open eaves, exposed rafter tails, and projecting beams. Visible windows include one-over-one double-hung and single-light fixed wood windows. The main entrance is sheltered beneath a projecting porch and consists of a single partially glazed wood door. The porch is supported by battered/tapered wood posts with brick piers. Landscaping includes a front lawn area surrounded by a concrete retaining wall and wood fence as well as mature trees and shrubs planted along the south edge of a dual ribbon concrete driveway. There are two detached 1-story ancillary buildings located to the rear of the property. The larger of the two was constructed in 1923 according to assessor's records. The larger building is shown on the 1950 Sanborn Map as two additional dwelling units and the smaller building is shown as a garage.

1257 N. Vista St possesses most character-defining features of the single-family residence property type and Craftsman architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. It retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.
