P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Courtyard Apartment in the Spanish Colonial Revival style built in 1927. The building is irregular in plan. Exterior walls are stucco. Ornamentation is minimal and consists of clay tile attic vents and wood corbels. An arched wrought iron sign spans the central walkway and reads, "Alfred Apartments." A metal lantern is suspended from the center of the arch. The building has a side-gabled and flat roof clad in clay tile with flush eaves and rafter tails. There is an exterior stucco chimney at the north end of the east elevation. Windows consist of multi-light wood casements arranged individually as well as in pairs and groups. Entryways to the building or individual units are not visible from the public right-of-way. The building has a front yard area with drought-tolerant landscaping. A common space and walkway lined with plantings runs through the center of the building providing access to units.

*B5. Architectural Style: Spanish Colonial Revival

*B6. Construction History: (Construction date, alterations, and date of alterations)

Constructed, 1927. Balcony repair, 1998. Window bars installed at an unknown date.

*B7. Moved? ☒ No ☐ Yes ☐ Unknown Date: Original Location:

*B8. Related Features:

B9a. Architect: Unknown B9b. Builder: Unknown

*B10. Significance: Theme Courtyard Apartments; Prewar Courtyard Apartments; Period Revival: Spanish Colonial Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Courtyard Apartment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Prewar Courtyard Apartment property type and Spanish Colonial Revival style, but is not a fully realized example and lacks distinguishing architectural detailing when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1 to 4-story Postwar Apartment House (Type B) with Sea Ranch influences built in 1975. The property consists of a complex of four buildings that are generally rectangular in plan. Exterior walls are clad in wood siding and brick. The roofs are flat. There is a wide rectangular chimney for each individual unit, adding visual interest to the roofline. Large, single-light fixed and sliding windows create expanses of glass punctuating the wood siding. Individual units are accessed from exterior walkways. Entrances consist of single wood-paneled doors. The complex of four buildings is surrounded with integrated brick planters lining common walkways, stairways, and the front of the property. There is a pool at the west end of the property.

Period of Significance: 1963-1980

Property Type: Residential

Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Apartment House.

1033 Hancock Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood that embodies the distinctive characteristics of 1970s multi-family construction inspired by the Sea Ranch complex. As the property was constructed less than 50 years ago, it appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Postwar Apartment House (Type B) property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the latter half of the twentieth century, West Hollywood faced a housing shortage like much of Southern California. Factors such as the rising cost of land, growing populations, opposing views on zoning, increased multi-family construction, and rent control, and a high percentage of renters helped cause and complicate the issue. Recognizing the need for more localized government, residents voted to incorporate the City of West Hollywood in November 1984. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): As changes in zoning and land prices curtailed lower density construction, the postwar apartment house type emerged. They often boasted larger unit sizes and features like en suite bathrooms, interior double-loaded corridors, and subterranean or podium parking that reflected key demographic and cultural shifts. Others had a more modular design, formed by multiple individual units. Features borrowed from Mid-Century and Late Modern architecture helped to convey a sense of contemporary luxury to the otherwise simple and boxy construction.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 3 to 4-story Postwar Courtyard Apartment in the Mid-Century Modern style built in 1959. The building has an irregular plan. Exterior walls are stucco. Ornamentation consists of stylized railing along balconies and exterior walkways as well as geometric scored cladding on the central portion of the building. The roof is flat with overhanging boxed eaves. The roof overhang above the center of the west elevation forms a zig-zag shape that is echoed by the projecting balconies below. Sliding aluminum windows of various sizes are arranged in stacked formations throughout the building. Individual units are accessed from exterior walkways. Entrances consist of single wood doors. Balcony entrances are aluminum-framed sliding glass doors. Parking is subterranean. Landscaping consists of terraced planters with shrubs along the primary elevation. There is a common pool at the front of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

1134-1140 N. Clark Street appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment property type designed in the Mid-Century Modern style. Due to minor alterations, it appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Postwar Courtyard Apartment property type and Mid-Century Modern style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Mid-Century Modern style evolved from various prewar expressions of modernism. A "second generation" of architects, inspired by the work of early local Modernists like Richard Neutra, Rudolph Schindler, and Frank Lloyd Wright, developed a regional style popularized in part by the Art and Architecture magazine's pivotal Case Study Program. The style is characterized by clear expression of structure and materials, an emphasis on horizontality, large expanses of glass, and seamless indoor-outdoor spaces.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment House (Type B) in the Tudor Revival style built in 1927. The building is U-shaped in plan. Exterior walls are stucco and brick. Ornamentation consists of decorative half-timbering. The high-pitched hipped roof is clad in composition shingles with flush eaves. The roof also includes conical roofs over rounded turrets. Original windows consists of multi-AB12light, diamond-light, and leaded glass wood casements. Some windows have been replaced with vinyl. Visible entryways consist of single partially glazed wood-paneled doors. Narrow French doors open onto balconettes. There is an attached garage to the north of the main building. The building has a communal manicured lawn surrounded by concrete and brick stairs and walkways. Small shrubs are located against the building in brick lined planters.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House and Tudor Revival style.

1150 N Curson Avenue appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Tudor Revival style.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants.

Like the Craftsman style, Tudor Revival has ties with the Arts and Crafts movement. Tudor Revival architecture draws inspiration from domestic architecture of the late medieval period in England, ranging from large manors to modest cottages. It emerged on the East Coast as early as the 1890s and became widely popular in Southern California by the 1920s. (See continuation sheet.)

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1922. The building has a rectangular plan. Exterior walls are wood clapboard and wood shingle. The building has a crossed-gable roof clad in composition shingles with overhanging open eaves, exposed rafter tails, and knee brackets. Visible windows are single-light wood fixed windows with diamond-light transoms. The main entryway is sheltered within a recessed porch supported by turned wood posts. The door is obscured by a wood-framed screen door.

The building has a front yard area with shrubs, grass, and mature trees. A central concrete walkway provides access to the main entry porch. The front of the property is enclosed by a wood fence and gate.

Period of Significance: 1895-1925; 1906-1931 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of the Craftsman style.

1263 N. Curson Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Single-Family Residence property type and Craftsman style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet).

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 4-story multi-family residential building with Hollywood Regency influences constructed in 1957. The building is rectangular in plan. Exterior walls are stucco. The mansard roof is clad in composition shingles with boxed eaves. A flat roof covers the rear portion of the building. The roof is accentuated by four arched roof dormers. Windows consist of multi-light paired casements, including in the dormers. Visible entrances consist of paneled doors. There is soft-story parking beneath the front of the building. Above the parking there is a sign reading "The Cynthia Townhomes." The building has limited landscaping. Staggered planters with shrubs flank the staircases at the east and west sides of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of postwar multi-family residential development and Hollywood Regency influences.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. It does not embody any particular architectural style, and it is not a fully realized example of any multi-family property type; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Courtyard Apartment.

8200 De Longpre appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood, and as a fully realized example of the Late American Colonial Revival style and Postwar Courtyard property type. Due to minor alterations, the property may not meet state or national thresholds for integrity.

It possesses most character-defining features of Late American Colonial Revival style and Postwar Courtyard property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing. During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Late American Colonial Revival is more stripped-down than its earlier counterparts, lending itself well to post-war construction. The style is characterized by symmetrical facades, pediments, and simplified features.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

8200 De Longpre Avenue was also evaluated as part of a potential district in the De Longpre Study Area; however, while the block of De Longpre Avenue between Sweetzer Avenue and Harper Avenue is somewhat visually unified by street trees and multi-family residential buildings of roughly similar size, massing, and construction date, it does not appear to be meaningfully differentiated from its surroundings in such a way that would constitute a historical significance.

Period of Significance: 1920-1945; 1906-1931 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of early multi-family residential development dating to 1910.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Research indicates that the building was originally constructed as a single-family residence and converted to apartments in the early 1950s. The property possesses some character-defining features of the Craftsman style, but is an unremarkable example with diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and materials have been diminished by alterations including installation of vinyl windows and changes to door and window openings on the front elevation.

B10 Area: West Hollywood

Period of Significance: 1956-1980

Property Type: Residential

Applicable Criteria: Local: A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a High-Rise Apartment Tower.

838 N. Doheny Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development under local criterion A3 for representing residential and cultural patterns that comprised the postwar residential growth of West Hollywood. As an unremarkable example of Modern architecture, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the High-Rise Apartment Tower property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

In 1956, Los Angeles County residents voted to repeal the 13-story height limit for residential construction, which led to an increase in high-rise construction in the following years. In West Hollywood, this activity was concentrated near Sunset Boulevard and Doheny Road and high-rise office buildings. Constructed and marketed as luxury rentals with an array of amenities, high-rise apartment towers have often been converted to condominiums.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a multi-family residence built in 1922. It is a bungalow court consisting of four, 1-story, two-unit bungalows; two, 1-story, one-unit bungalows; and one, 2-story, one-unit building arranged in a U-shape. Exterior walls are wood siding. The bungalows are square in plan, the rear building is L-shaped in plan, and each has a flat roof with a raised parapet. Windows consist of one-over-one double-hung wood windows. Entrances are obscured by metal screen doors. The entrances are sheltered by shallow pent overhangs and accessed by a small set of concrete steps.

The bungalows are arranged around a central concrete walkway lined with foundation plantings and shrubs. There does not appear to be any vehicular accommodation on the property.

Period of Significance: 1910-1940 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Bungalow Court.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although generally intact, the site planning and landscaping is rudimentary and limited to circulation. The property does not represent a fully realized example of a bungalow court; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

In 2003, 1215 N. Fairfax Avenue was nominated for designation as part of a proposed Bungalow Court Thematic Grouping. West Hollywood City Council denied designation of the grouping and the resolution stipulated that a new nomination could not be filed for the subject property until after June 23, 2008.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Postwar Courtyard Apartment in the Mid-Century Modern style built in 1956. The building is O-shaped in plan. Exterior walls are stucco with volcanic rock veneer. Ornamentation consists of a belt course. The building has a flat roof. Windows consist of aluminum sliding windows and jalousie windows. The main entrance is within a recessed opening and enclosed by a decorative geometric metal gate. The gate is accessed by a set of concrete steps with a volcanic rock planter and metal handrails. Individual units are accessed by single wood doors surrounding the courtyard.

The central courtyard includes a pool and tropical plantings with dense shrubs, mature trees, and brick walkways. There is a vehicular entrance on the ground floor leading to subterranean parking. The building has a front yard area with volcanic rock planters, trees, and tropical plantings.

*B10. Significance: Theme Apartment Houses: Dingbat/Stucco Box B10 Area: West Hollywood

Period of Significance: 1945-1962 Property Type: Residential Applicable Criteria: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Dingbat/Stucco Box.

1223 N. Flores Street appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of postwar West Hollywood and as an excellent and rare example of a Stucco Box exhibiting quality of design. As this type of building is ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Dingbat/Stucco Box property type as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the Dingbat/Stucco Box emerged as an economical and efficient multi-family housing type that was well-suited for increasing density through infill construction. The simple buildings were accentuated with signage and ornamentation that resembled glyphs in typesetting called "dingbats." Although popular, they were short-lived, as new parking regulations in the mid-1960s rendered the characteristic tuck-under or soft-story parking inadequate. (See continuation sheet.)

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment House (Type B) in the Chateausque style built in 1938. The building is L-shaped in plan. Exterior walls are stucco. Ornamentation consists of quoins, balconettes, stringcourses, and bas-relief panels. The building has a high hip roof clad in artificial slate shingles with flush eaves. The roof is accentuated by turrets. Wood windows include single-light fixed and casements arranged individually and in pairs, and diamond-light casements. There are two entryways on the west-facing elevation consisting of wood-paneled doors within decorative surrounds. Individual units are accessed by exterior doors. Visible entrances on the side elevation have decorative cast-stone surrounds.

The building has a front yard area with a lawn, mature trees, and foundation plantings. The yard is enclosed by a metal fence. There is a brick walkway leading to unit entrances and a concrete driveway running along the north edge of the property. There is a one-story carport at the rear of the property.

*NRHP Status Code 3S/3CS/5S3

*Resource Name or #: (Assigned by Recorder) 1248 N Flores St

B1. Historic Name: Flores House B2. Common Name:

B3. Original Use: Multiple Dwelling B4. Present Use: Multiple Dwelling

*B5. Architectural Style: Chateausque

*B6. Construction History: (Construction date, alterations, and date of alterations)

Constructed, 1938. Converted to condominium c. 1981. No digital exterior alteration permits on file.

*B7. Moved? ☒ No ☐ Yes ☐ Unknown Date: Original Location:

*B8. Related Features:

B9a. Architect: Unknown B9b Builder: Unknown

*B10. Significance: Theme Apartment Houses; Prewar Apartment Houses; Period Revival: French Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1926-1941 Property Type: Residential Applicable Criteria: A/C; 1/3; A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House.

1248 N. Flores Street appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Chateausque style.

It possesses most character-defining features of Prewar Apartment House (Type B) property type and the French Revival (Chateausque) architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like La Fontaine) helped to attract tenants. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): French Revival is a broad term that describes architecture influenced by a variety of French buildings, ranging from the ornate (Chateausque) to the modest (French Provincial). The style is characterized by features such as steeply pitched roofs with dormers, turrets, and towers, decorative finials, cornice lines, and stringcourses.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment Building (Type A) constructed in 1926. The building is rectangular in plan. Exterior walls are brick. Ornamentation consists of contrasting colored brick trim surrounding the windows, doors, parapet, and corners of the building. The building has a flat roof with a raised parapet. Windows consist of wood casements and double-hung windows. Some windows on the second story have vinyl replacements. The main entryway is recessed under an arched opening and consists of a fully glazed metal door with sidelights. The building is constructed to the lot lines and there is no on-site landscaping. There is a concrete walkway surrounded by two-story staircases at the rear of the parcel.

Period of Significance: 1920-1945 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House (Type A).

1154 N. Formosa Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and B as a fully realized example of a Prewar Apartment House rare example of a 20th century masonry building in West Hollywood. The property appears unlikely to meet state or national thresholds for significance due to minor alterations. Additionally, this type of building is rare in West Hollywood but ubiquitous throughout the region.

It possesses most character-defining features of Prewar Apartment House (Type A), as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants. P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment House (Type B) in the Spanish Colonial Revival style built in 1924. The building is irregular in plan. Exterior walls are stucco. Ornamentation consists of ceramic tile and cast stone detailing, and wrought iron balconettes and grilles. The building has a flat roof with gabled and shed roof portions clad in clay tile. Windows include multi-light wood casements, multi-light fixed windows in arched openings, and hung vinyl replacements. Individual units are accessed from the exterior and consist of single wood doors. Entrances are sheltered by shallow pent roof overhangs. There are two tilt-up garage doors on the west elevation.

The building has a front yard area with mature trees and shrubs, enclosed by a wood fence. The edges of the building are lined with foundation plantings. There is a concrete driveway running along the east edge of the property.

Period of Significance: 1895-1925; 1906-1931 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing ineligible for listing as an individual resource. It was re-surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it is an unremarkable example of the Craftsman and Dutch Colonial Revival styles, and does not appear to have an important association with residential development in West Hollywood; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment House (Type B) built in 1937. The two buildings are roughly L-shaped in plan. Exterior walls are stucco with a band of wood siding between the first and second stories. There are stucco chimneys on the primary elevation. The buildings have hipped roofs clad in composition shingles with shallow boxed eaves. Windows consist of multi-light wood windows and sliding metal and vinyl windows. Units are accessed from the exterior via single wood doors with metal screens. There are detached 1-story garages to the rear of the property, as well as a 2-story building that has soft-story parking on the ground floor and appears to have an additional unit on the second floor. There is a lawn surrounded by a low, concrete retaining wall as well as concrete walkways, hedges, and mature trees planted near the buildings.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 4-story multi-family residential building in the Tudor Revival style built in 1926. The building is irregular in plan. Exterior walls are stucco. Ornamentation consists of faux half-timbering and balconettes. The building has a cross-gabled roof clad in composition shingles with shallow, open eaves. There is a high-pitched conical roof over a rounded tower near the center of the front elevation. Windows consist of multi-light wood windows and vinyl windows. The main entryway is located on the porch on the first floor and consists of an arched wood door with a stained glass transom window. A pair of wood French doors provides access to a deck on the second floor. Landscaping is limited. The front of the property consists of a wide concrete driveway that provides access to soft-story parking at street level.

Period of Significance: 1920-1945; 1924-1942 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Pre-War Apartment House.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). While it possesses character-defining features of the Tudor Revival architectural style and Pre-War Apartment House property type, it lacks the aspects of integrity essential to conveying this potential significance.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and material have been diminished by the removal of original windows, modifications to exterior cladding, and a porch enclosure.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Spanish Colonial Revival style built in 1921. The building has a rectangular plan. Exterior walls are smooth stucco. The building has a crossed-gable roof clad in clay tiles with flush eaves. Windows include a multi-light picture window in a reverse ogee arched opening, multi-light wood casements, and hung vinyl replacements. The main entryway is a wood-paneled door sheltered underneath a deeply recessed porch supported by wood posts and partially enclosed by a low, stucco wall. The porch is accessed by a set of concrete steps.

The building has a sloped front yard with mature trees lined by a concrete retaining wall. A side concrete driveway runs along the east edge of the property.

Period of Significance: 1895-1925; 1922-1949 Property Type: Residential Applicable Criteria: Local: A1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of the Spanish Colonial Revival style.

8363 Fountain Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Architectural Styles under local criterion A1 as a fully realized example of the Spanish Colonial Revival style applied to a single-family residence. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

*B5. Architectural Style: Craftsman

*B6. Construction History: (Construction date, alterations, and date of alterations)

Constructed, 1922. Rear patio removed and three sets of stairs on main house repaired, 2016.

*B7. Moved? ☒ No ☐ Yes ☐ Unknown Date: Original Location:

*B8. Related Features:

B9a. Architect: Unknown B9b Builder: Unknown

*B10. Significance: Theme Single-Family Residences and Secondary Dwellings; Craftsman B10 Area: West Hollywood

Period of Significance: 1895-1925; 1906-1931 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Craftsman single-family residence.

935 N. Gardner Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and Craftsman architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1923. It was converted to a duplex between 1926 and 1950. The building is rectangular in plan. Exterior walls are wood clapboard. The building has a cross-gabled roof clad in composition shingles with shallow boxed eaves. Windows consist of fixed and four-over-one double-hung wood windows. Individual unit entrances are multi-light glazed doors with multi-light sidelights and screens.

The building is surrounded by foundation plantings, shrubs, and small trees. The majority of the front yard area is paved with concrete. A side driveway runs along the south edge of the property. The front of the property is enclosed by a wood and metal fence.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1921. The building is rectangular in plan. Exterior walls are wood clapboard. Ornamentation includes a trellis along the front elevation. The building has a side-facing jerkinhead roof clad in composition shingles with shallow boxed eaves. Windows consist of double-hung and multi-light fixed (or casement) wood windows. The main entrance is sheltered underneath a projecting porch covered by a jerkinhead roof and supported by turned wood posts. The porch is accessed by a set of concrete steps.

The building has a front yard area with gravel, shrubs, mature trees, and a central concrete walkway lined with hedges that leads to the porch. A side driveway runs along the south edge of the property. The front of the property is enclosed by a low wood picket fence.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Spanish Colonial Revival Fourplex.

1126 N. Gardner Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Fourplex property type and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains all necessary aspects of integrity from the period of significance.

Constructed, 1923. Repair stucco and wood siding, 1999. Restucco wall, 2001.

*B7. Moved? ☒ No ☐ Yes ☐ Unknown Date: Original Location:

*B8. Related Features:

B9a. Architect: Unknown B9b Builder: Unknown

*B10. Significance: Theme Apartment Houses: Duplexes and Fourplexes; Period Revival: Spanish Colonial Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Spanish Colonial Revival Fourplex.

1132 N. Gardner Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Fourplex property type and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story duplex in the Spanish Colonial Revival style built in 1930. The building is square in plan. Exterior walls are stucco. Ornamentation consists of wrought iron railings, punched screens, and a decorative scalloped motif beneath a shallow second-story overhang. The building has a cross-gabled roof clad in clay tile with shallow eaves and exposed rafter tails. Windows consist of multi-light wood fixed and casement windows. Entrances to each unit are located within recessed arched entryways and consist of a single wood door. There is a two-story detached building to the rear of the main building. The property has a front lawn area with hedges, shrubs, and concrete walkways.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Spanish Colonial Revival duplex.

918 Genesee Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the duplex property type and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

B10. Significance (Continued from Page 2): Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Early American Colonial Revival dates to the prewar period and is characterized by symmetrical facades and ornamentation such as pediments and wood window shutters.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1921. The building has a rectangular plan. Exterior walls are wood clapboard. Ornamentation includes wood window shutters and a cornice. The building has a side-facing jerkinhead roof clad in composition shingles with shallow boxed eaves. There is an exterior brick chimney on the north elevation. Wood windows are casements with divided lights in the upper half, and one-over-one double-hung windows. The main entryway is centered under a shallow front-gabled roof with an eave return, suggesting a pediment. The entry is a single wood-paneled door and is accessed by a set of concrete steps.

The building has a front yard area with a lawn, shrubs, and shrubs. A fieldstone walkway leads to the front entry. There is a concrete driveway along the south edge of the property.

As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and a combination of features of the Craftsman and Early American Colonial Revival styles, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet.)

B10. Significance (Continued from Page 2): Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Early American Colonial Revival dates to the prewar period and is characterized by symmetrical facades and ornamentation such as pediments and wood window shutters.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1920. The building has a rectangular plan. Exterior walls are wood clapboard. Ornamentation includes a cornice. The building has a side-gabled roof clad in composition shingles with shallow open eaves. There is an interior brick chimney on the north end of the roof. Visible windows are double-hung wood. The main entryway is centered under an arched overhang supported by carved brackets. The entry is a single wood-paneled door and is accessed by a set of tiled steps.

The building has a front yard area with a lawn and shrubs and enclosed by a concrete retaining wall. A tiled walkway leads to the front entry. There is a brick paver driveway along the south edge of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Craftsman and Early American Colonial Revival single-family residence.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Single-Family Residence property type and Craftsman and Early American Colonial Revival architectural styles, but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of workmanship and feeling have been diminished by the replacement of original cladding and windows.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment House (Type B) in the Streamline Moderne style built in 1939. The building is rectangular in plan. Exterior walls are stucco. Ornamentation consists of vertical fins between windows and horizontal banding. The building has a low hip roof clad in composition shingles with flush eaves. Windows consist of multi-light steel casement windows arranged in groups around curved corners and double-hung wood windows. Individual units appear to be accessed from the exterior rather than an interior corridor. Visible entryways consist of single doors sheltered beneath flat, curved canopies. The canopies extend outward from the horizontal banding that wraps around each elevation. Entries are accessed by fieldstone stairs with curved metal railings. Landscaping on the property includes mature trees and shrubs and a small front yard surrounded by manicured hedges.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House and Streamline Moderne style.

1126 N. Hacienda Place embodies the distinctive characteristics of the Streamline Moderne style as applied to a Prewar Apartment House. It appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Streamline Moderne style.

It possesses most character-defining features of the Prewar Apartment House (Type B) property type and the Streamline Moderne architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like La Fontaine) helped to attract tenants. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Streamline Moderne style emerged in the 1930s as part of a larger architectural trend that sought inspiration from the future rather than the past. The short-lived style used sweeping lines and smooth surfaces to evoke an aerodynamic sense of movement and speed. The style is further characterized by a horizontal emphasis, rounded edges, horizontal speedlines, and steel casement windows.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Spanish Colonial Revival Duplex.

937 Hammond Street appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Duplex property type and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1920. The building is rectangular in plan. Exterior walls are wood siding. The building has a cross-gabled roof clad in composition shingles with clipped gables, shallow open eaves, exposed rafter tails, and projecting beams. Windows along the primary elevation consist of paired multi-light wood casement windows. The primary entryway is located under the covered porch and consists of a fully glazed, multi-light wood door. The porch is supported by round wood columns. There is a one-story detached building located to the rear of the main building. The property has a front yard with mature trees and shrubs with a walkway and side driveway. The front yard is enclosed by a stucco and brick wall with metal gates at the walkway and driveway.

Period of Significance: 1895-1925; 1906-1931 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was included in 2017 in the Lexington-Curson Residential Historic Resources Survey study. It was re-surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

7615 Hampton Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and the Craftsman style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

***Resource Name or #:**(Assigned by Recorder) 7615 Hampton Ave

Recorded By: Amanda Duane **Date:** 8/26/2023 ☒ Continuation ☐ Update

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1910. The building has a rectangular plan. Exterior walls are wood shingle. Ornamentation includes decorative carved board-and-batten in the gable-end. The building has a gable-on-hipped roof clad in composition shingles with shallow, open eaves and exposed rafter tails. There is an exterior stone chimney on the south elevation. Visible windows are eight-over-one double-hung wood windows. The main entryway is sheltered within a recessed porch supported by a wood post. The porch is partially enclosed by a low stucco wall. The entry is a multi-light wood door with multi-light sidelights. The porch is accessed by a set of concrete steps.

The building has a front yard area with a lawn and foundation plantings. A central concrete walkway leads to the front porch. There is an asphalt side driveway along the north edge of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Craftsman single-family residence.

985 Hancock Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and Craftsman architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

Research indicates that the property was nominated for designation as part of the Old Sherman Thematic Grouping in 1990. During a City Council hearing on September 16, 1991, City Council indicated that the property should be considered as part of the Craftsman Thematic Grouping, as it was located within the boundaries of the other thematic district. The 1993 designation of the Craftsman Thematic Grouping did not include 985 N. Hancock for consideration.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built c. 1906 and moved to this location. It was converted to a duplex after 1950. The building has a rectangular plan. Exterior walls are wood clapboard. Ornamentation includes a decorative gable-end screen. The building has a cross-gabled roof clad in composition shingles with shallow, open eaves, projecting beams, and knee brackets. Visible windows are single-light fixed or one-over-one double-hung wood windows. The main entryway is sheltered under a projecting porch supported by wood posts. The porch is partially enclosed by a rock face concrete block wall. The entry is a multi-light wood door with multi-light sidelights. The porch is accessed by a set of concrete steps.

The building has a front yard area with shrubs and enclosed by a concrete retaining wall. A central concrete walkway and steps lead to the front porch. There is a concrete side driveway along the south edge of the property.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

In 1993, the then-owner of 989 Hancock Avenue appealed designation as part of the Craftsman Thematic Grouping, indicating that the building was moved to its current location in 1906 and asserting that it was therefore not associated with early development in Sherman. City Council granted the appeal; however, 989 Hancock Avenue is now being considered as an individual resource 30 years after the appeal, and relocation would not preclude the property from being locally eligible under Criterion A1 as a good example of Craftsman architecture.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1993, the West Hollywood Cultural Heritage Advisory Board voted to recommend designation of this property as part of the Craftsman Thematic Grouping to City Council. The then-owner appealed the decision and City Council granted the appeal. It was re-surveyed as part of the 2022-2023 multi-family survey update and re-evaluated because 30 years after the appealed decision, there are now fewer examples of Craftsman residences within the City of West Hollywood and comparable properties have since been designated and evaluated as appearing eligible.

995 Hancock Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criterion A1 as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Craftsman single-family residence.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Single-Family Residential property type and Craftsman and Early American Colonial Revival styles, but lacks distinguishing architectural detailing when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story duplex in the Spanish Colonial Revival style built in 1927. The building has a rectangular plan. Exterior walls are smooth stucco. Ornamentation includes a wing wall in a Mission belltower (espadaña) shape and decorative arched openings. The building has a flat roof with a raised parapet and clay tile coping. Windows are multi-light casements arranged in pairs. Unit entrances are sheltered in a projecting vestibule with draped-arched openings.

The building has a front yard area with mature trees enclosed by a hedge. A central tiled walkway leads to the front entrances. There is a side concrete driveway along the east edge of the property that runs under a porte-cochere formed by the decorative wing wall.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Spanish Colonial Revival Duplex.

1015 N. Harper Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Duplex property type and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

☒ Continuation ☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Fourplex in the Spanish Colonial Revival style built in 1923. The building is square in plan. Exterior walls are stucco. Ornamentation is limited to tile detailing around the entrance. The building has a flat roof with raised parapet and clay tile coping. There are hipped roof overhangs clad in clay tile. Windows consist of single-light fixed and casement wood windows. Entrances to each unit are located within a recessed entryway and on the ground floor and consist of multi-light wood doors. Landscaping is limited to raised planters with gravel, palm trees, and drought-tolerant plants.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although it possesses character-defining features of the Fourplex property type, it is an unremarkable example of the Spanish Colonial Revival style and does not appear to have an important association with multi-family residential development in West Hollywood. In addition, it has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship and materials have been diminished by the infilling of original window openings and installation of incompatible new windows.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

1227 N. Harper Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment type. As the building is an unremarkable example of Mid-Century Modern architecture, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Postwar Courtyard Apartment property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Mid-Century Modern style evolved from various prewar expressions of modernism. A "second generation" of architects, inspired by the work of early local Modernists like Richard Neutra, Rudolph Schindler, and Frank Lloyd Wright, developed a regional style popularized in part by the Art and Architecture magazine's pivotal Case Study Program. The style is characterized by clear expression of structure and materials, an emphasis on horizontality, large expanses of glass, and seamless indoor-outdoor spaces.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

*B10. Significance: Theme Apartment Houses: Duplexes and Fourplexes; Period Revival: Tudor Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1924-1942 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Tudor Revival duplex. Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses character-defining features of the Tudor Revival style and Duplex property type, but lacks distinguishing architectural detailing when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Fourplex with Neoclassical influences built in 1922. The building is U-shaped in plan. Exterior walls are stucco. The building has a flat roof with a raised parapet and flat overhang with carved brackets. Windows consist of multi-light wood casement windows. There are three entrances on the projecting volume at the center of the primary elevation. The north-facing entrance consists of a wood-paneled door flanked by sidelights with a decorative surround. The surround includes a triangular pediment and pilasters. Two side-facing entrances on the same volume consist of partially glazed wood-paneled doors with triangular pediments. The entrances are accessed by a set of shallow concrete steps with a walkway surrounded by wrought iron railing. Landscaping includes small shrubs and trees with gravel. The fourplex shares a parcel with an unremarkable example of a Stucco Box constructed in 1954 that is not included in this evaluation.

*B6. Construction History: (Construction date, alterations, and date of alterations)

Constructed, 1922. Reroof, 1992. Window bars installed at an unknown date.

*B7. Moved? ☒ No ☐ Yes ☐ Unknown Date: Original Location:

*B8. Related Features:

B9a. Architect: Unknown B9b Builder: Unknown

*B10. Significance: Theme Apartment Houses: Duplexes and Fourplexes; Neoclassicism B10 Area: West Hollywood

Period of Significance: 1920-1945; 1895-1940 Property Type: Residential Applicable Criteria: Local: A3/B

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House and example of the Neoclassical style. The Neoclassical style is rare enough in West Hollywood that a theme was not developed for the context statement update; therefore, it was assessed using the Los Angeles Citywide Historic Context Statement.

9006 Harratt Street (legal address 971 Hammond Avenue) appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criterion A3 for representing residential and cultural patterns that comprised the growth of West Hollywood. The building also appears eligible under local criterion B as a rare example of the Neoclassical style in West Hollywood. Due to minor alterations, the property may not meet state or national thresholds for integrity.

It possesses most character-defining features of the Fourplex property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. Character-defining features related to the Neoclassical style include the symmetrical arrangement, smooth stucco cladding, flat roof with frieze and carved brackets, multi-light wood windows, and triangular pediment with pilasters around the primary entrance.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet).

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants.

The Neoclassical style emerged in the late nineteenth century as architects reinterpreted Greek and Roman architectural precedents. Its monumental appearance lent itself well to larger designs like public buildings and banks. In the early twentieth century, it was applied more frequently to domestic architecture. The style is characterized by symmetrical arrangements and Classical detailing, including pediments, parapets, and columns.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Triplex in the Egyptian Revival style built in 1923. The building is rectangular in plan. Exterior walls are stucco. The building has a flat roof with clay tile coping and hipped clay tile overhangs. Windows consist of single-light wood casements in singles, pairs, or groups of three. The primary entrance is recessed in an entryway with battened sides and a cavetto cornice. There is a two-story building located at the rear of the property. The property has a hardscaped tiled front yard surrounded by a stucco and metal fence and hedges.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment as an example of the Egyptian Revival style. The Egyptian Revival style is rare enough in West Hollywood that a theme was not developed for the context statement update; therefore, it was assessed using the Los Angeles Citywide Historic Context Statement.

900 Havenhurst Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. While distinguishing architectural features were removed around 2021, including a winged orb motif above the primary entrance, residential examples of the Egyptian Revival style are very rare throughout the region. It is significant under local criteria A1 and B as a rare remaining example of the Egyptian Revival style applied to a residential building. Due to alterations, the property may not meet state or national thresholds for integrity.

It possesses most character-defining features of the Duplex/Fourplex property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. Character-defining features include the characteristic battened entryway with cavetto cornice, stucco exterior, and flat roof.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. ☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand.

In the Los Angeles region, Egyptian Revival was a rare and short-lived architectural trend in the Los Angeles region that became even more popular after the discovery of King Tutankhamen's tomb in 1922. The style shared many similarities with the architecture of the Art Deco movement, including the use of vibrant colors, abstracted nature motifs, and stepped forms. Although fanciful, the style was somewhat impractical, which contributed to its decline in popularity.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone alterations but retains sufficient integrity to convey its local significance.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House.

1226 Havenhurst appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of a Prewar Apartment House and Spanish Colonial Revival Style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Prewar Apartment House (Type A) and Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Prewar Courtyard Apartments were the next evolution of the courtyard housing type after bungalow courts. Multiple units in one or two larger buildings were arranged around a central courtyard or open space. Many examples were thoughtfully designed by architects, which reflected the increasing wealth of residents living in multi-family housing during this period. Architects including Arthur and Nina Zwebell and F. Pierpont and Walter Davis were highly influential, helping to shape the designs of the property type through the 20th century. (See continuation sheet).

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a multi-family residence built in 1924. It is a bungalow court consisting of five, 2-story, two-unit bungalows arranged in a U-shape. Exterior walls are stucco. The bungalows are rectangular in plan and each has a flat roof with a hipped overhang clad in clay tile. Windows consist of pairs of multi-light wooden casements. The buildings are arranged around a dual-ribbon driveway that leads to a rear parking area. Unit entrances are partially glazed wood doors, some of which have decorative cast stone surrounds. The rear 2-story building forms a porte-cochere over the driveway. Landscaping includes mature trees, shrubs, and foundation plantings in paver-lined planters.

*B10. Significance: Theme Courtyard Apartments; Bungalow Courts; Period Revival: Spanish Colonial Revival B10 Area: West Hollywood

Period of Significance: 1910-1940; 1922-1949 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Bungalow Court.

1238 Havenhurst Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the bungalow court property type with automobile access incorporated into the design of the property with a central driveway and porte-cochere in the rear building. As the buildings themselves are an unremarkable example of the Spanish Colonial Revival style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Bungalow Court property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet).

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The bungalow court is a multi-family property type consisting of free-standing units thoughtfully arranged around a common landscaped open space. It emerged in Southern California in the early twentieth century and was popular prior to World War II. For developers, they allowed for greater density on a lot while being less expensive to construct than an apartment house; for residents, they made a detached home more affordable while creating a sense of community.

The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Postwar Courtyard Apartment in the Mid-Century Modern style built in 1957. The building is U-shaped in plan. Exterior walls are stucco with volcanic rock veneer. The building has a flat roof with overhanging eaves. Windows consist of steel-frame casements and jalousie windows. The main entrance is within a recessed opening and consists of paired metal-frame windows with sidelights. Individual units are accessed from the exterior by single wood doors surrounding the courtyard.

The central courtyard includes a pool and tropical plantings. There is a vehicular entrance on the ground floor facing the street leading to subterranean parking. The building has a front yard area with volcanic rock planters, trees, and tropical plantings.

Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Postwar Courtyard Apartment property type and Mid-Century Modern architectural style, but lacks architectural distinction when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment in the Mid-Century Modern style.

1417 Havenhurst Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment property type. As the building is a typical example of the Mid-Century Modern style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Postwar Courtyard Apartment property type and some features of the Mid-Century Modern style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Mid-Century Modern style evolved from various prewar expressions of modernism. A "second generation" of architects, inspired by the work of early local Modernists like Richard Neutra, Rudolph Schindler, and Frank Lloyd Wright, developed a regional style popularized in part by the Art and Architecture magazine's pivotal Case Study Program. The style is characterized by clear expression of structure and materials, an emphasis on horizontality, large expanses of glass, and seamless indoor-outdoor spaces.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

*B10. Significance: Theme Courtyard Apartments: Postwar Courtyard Apartments; Modernism and Mid-Century Modernism: Mid-Century Modern

B10 Area: West Hollywood

Period of Significance: 1945-1969; 1949-1967

Property Type: Residential

Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

1227 N. Harper Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment type. As the building is an unremarkable example of Mid-Century Modern architecture, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Postwar Courtyard Apartment property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Mid-Century Modern style evolved from various prewar expressions of modernism. A "second generation" of architects, inspired by the work of early local Modernists like Richard Neutra, Rudolph Schindler, and Frank Lloyd Wright, developed a regional style popularized in part by the Art and Architecture magazine's pivotal Case Study Program. The style is characterized by clear expression of structure and materials, an emphasis on horizontality, large expanses of glass, and seamless indoor-outdoor spaces.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 3-story Prewar Courtyard Apartment with Spanish Colonial Revival style influences built in 1929. The building is roughly O-shaped in plan. Exterior walls are stucco. The building has a flat roof with clay tile coping and a hipped overhang along the front elevation. Windows consist of paired multi-light wood casements. The primary entryways are located inside the building. Individual units appear to be accessed via interior corridors, with French doors opening out into the courtyard on the ground floor. The building has a communal courtyard area paved in concrete with planters and a fountain. The front of the property has a front yard area with a lawn, shrubs, trees, and foundation plantings. At the center of the front elevation there is an entrance to subterranean parking flanked by two tiled stairways leading to arched wood doors.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Courtyard Apartment.

1345 N. Hayworth Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Prewar Courtyard Apartment property type. As the building is an unremarkable example of the Spanish Colonial Revival style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Prewar Courtyard Apartment property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Prewar Courtyard Apartments were the next evolution of the courtyard housing type after bungalow courts. Multiple units in one or two larger buildings were arranged around a central courtyard or open space. Many examples were thoughtfully designed by architects, which reflected the increasing wealth of residents living in multi-family housing during this period. Architects including Arthur and Nina Zwebell and F. Pierpont and Walter Davis were highly influential, helping to shape the designs of the property type through the 20th century. (See continuation sheet).

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its significance.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Bungalow Court.

1410 N Hayworth Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the bungalow court property type. As the buildings themselves are an unremarkable example of the Spanish Colonial Revival style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Bungalow Court property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

The bungalow court is a multi-family property type consisting of free-standing units thoughtfully arranged around a common landscaped open space. It emerged in Southern California in the early twentieth century and was popular prior to World War II. For developers, they allowed for greater density on a lot while being less expensive to construct than an apartment house; for residents, they made a detached home more affordable while creating a sense of community. This is a 2-story Triplex with Mediterranean Revival influences built in 1920. The building is square in plan. Exterior walls are stucco. The building has a hipped roof clad in composition shingles with shallow eaves. Windows consist of single-light fixed wood windows and non-original vinyl hung and sliding windows. Entrances to individual units are sheltered under a projecting porch with a triangular pediment and arched opening. The doors are fully glazed wood doors. Landscaping consists of a shallow front yard with lawn and central walkway. The front of the property is paved for surface parking. The triplex shares a parcel with two additional residential buildings to the rear.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the triplex property type, but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and materials have been diminished by installation of incompatible windows and removal of clay tile roofing.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment House (Type B) in the French Revival style built in 1938. The building is L-shaped in plan. Exterior walls are stucco. Ornamentation consists of belt courses, wrought iron railings, wood window shutters, and corbels beneath projecting volumes. The building has a hipped roof clad in composition shingles with boxed eaves. The roof is accentuated by arched attic vents that echo the appearance of dormers. There are two interior, stucco chimneys. Multi-light wood casement or fixed windows are arranged individually, in pairs, and in groups of three. Visible entryways consist of single wood-paneled doors within decorative pedimented surrounds. Individual units appear to be accessed by interior corridors. Landscaping on the property includes a front lawn area, communal walkway, mature trees, and foundation plants. The front edge of the property is enclosed by a low brick wall and metal fence.

*B10. Significance: Theme Apartment Houses; Prewar Apartment Houses; Period Revival: French Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1926-1941 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Prewar Apartment House property type as defined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses character-defining features of the Prewar Apartment House property type and French Revival architectural style, but is an unremarkable example when compared to similar properties in West Hollywood.

Research indicates that the property was briefly associated with the author F. Scott Fitzgerald around the time of his death; however, this association does not rise to the level of significance necessary to be eligible under Criterion B/2/C.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Courtyard Apartment in the Spanish Colonial Revival style built in 1924. The building is U-shaped in plan. Exterior walls are stucco. Ornamentation consists of quoin detailing around arched entryways, wrought iron details, and wood window shutters. The building has a flat roof with a parapet and clay tile coping. There is a clay tile overhang along the front elevation of the two front-facing volumes of the U-shape. Visible windows consist of one-over-one double-hung wood windows arranged individually and in pairs. Some windows on side elevations may have been replaced with vinyl hung windows. Entrances on the two front-facing elevations are obscured within recessed arched entryways. in an inset porch and on the side elevation facing the central driveway. Entrances on side elevations consist of single wood-paneled doors beneath hipped-roof overhangs. The buildings are lined with planter beds with shrubs and foundation plantings. There is a concrete paver driveway at the center of the "U" shape that leads to the rear of the property.

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). While it possesses some character-defining features of the Spanish Colonial Revival architectural style and Prewar Courtyard Apartment property type, it lacks the aspects of integrity essential to conveying this potential significance.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and materials have been diminished by a major remodeling.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1924. The building is irregular in plan. Exterior walls are wood siding. The building has a cross-gable roof clad in composition shingles with clipped gables and shallow, open eaves. Fenestration consists of fixed windows with a multi-light upper portion on the primary elevation. The primary entrance is located under a projecting porch and consists of a single wood door flanked by sidelights. The porch is supported with square wood posts. The property has a front yard area with lawn, shrubs, and mature trees. There is a central walkway and the front of the property is enclosed with a stone retaining wall and white picket fence. There is a side driveway at the south end of the property. There are two to three ancillary buildings to the rear of the property that are not visible from the public right-of-way.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Courtyard Apartment in the Early American Colonial Revival style built in 1938. The apartment consists of two L-shaped buildings around a central courtyard. Exterior walls are stucco. Ornamentation consists of a dentilled cornice, stringcourse, quoins, dentilled window headers, Juliet awnings, pedimented door surrounds, and decorative wrought iron railings. The building has a low-pitched hipped roof clad in composition shingles with flush eaves. Fenestration consists of multi-light fixed windows; one-over-one and multi-light double-hung wood windows; and octagonal diamond-pane fixed windows. Individual units are accessed by exterior doors and consist of wood-paneled doors with decorative surrounds.

The building is surrounded by foundation plantings, trees, and shrubs. It has a central courtyard with a concrete walkway branching off to the individual entrances. There is a driveway running along the south edge of the property that provides access to soft-story parking at the rear of the building.

*B10. Significance: Theme Courtyard Apartments; Prewar Courtyard Apartments; Period Revival: Early American Colonial Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1919-1939 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Courtyard Apartment.

8714 Holloway Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of a Prewar Courtyard Apartment. As the building is an unremarkable example of the Early American Colonial Revival style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Prewar Courtyard Apartment property type and some features of the Early American Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Prewar Courtyard Apartments were the next evolution of the courtyard housing type after bungalow courts. Multiple units in one or two larger buildings were arranged around a central courtyard or open space. Many examples were thoughtfully designed by architects, which reflected the increasing wealth of residents living in multi-family housing during this period. Architects including Arthur and Nina Zwebell and F. Pierpont and Walter Davis were highly influential, helping to shape the designs of the property type through the 20th century.

American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Early American Colonial Revival dates to the prewar period and is characterized by symmetrical facades and ornamentation such as pediments and wood window shutters.

B9a. Architect: Unknown B9b Builder: Unknown

*B10. Significance: Theme Apartment Houses: Stucco Boxes/Dingbats B10 Area: West Hollywood

Period of Significance: 1945-1962 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Stucco Box/Dingbat property type, but lacks distinguishing architectural detailing. The Polynesian influence is limited to carved bargeboards and a tiki statue in the front yard. Originally, the building may have had more Tiki/Polynesian features for a more cohesive design, such as signage, landscaping, and lava rock veneer.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and materials have been diminished by the removal of original details and installation of non-original cladding and balcony enclosures.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-and-a-half-story duplex in the Tudor Revival style built in 1938. The building is rectangular in plan. Exterior walls are stucco. Ornamentation consists of decorative half-timbering. The building has a flat roof with a shed roof overhang around the rear, and side-gabled roof forms at the front of the property with gabled dormers. The roof planes are clad in composition shingles with shallow, open eaves and exposed rafter tails. Windows consists of paired wood diamond-light casements and hung vinyl windows. There is a two-story detached garage with a dwelling unit on the second story to the rear of the property. The property has limited landscaping, consisting of a walkway and planter lining the front of the property, and a concrete driveway along the south edge of the property.

*B10. Significance: Theme Apartment Houses: Duplexes and Fourplexes; Period Revival: Tudor Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1924-1942 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Tudor Revival Duplex.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Duplex property type and Tudor Revival architectural style, but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design and materials have been diminished by the installation of non-original vinyl windows.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1923. The building has a rectangular plan. Exterior walls are wood clapboard. Ornamentation includes louvered wood shutters. The building has a cross-gabled roof clad in composition shingles with shallow open eaves. There is an exterior chimney on the north elevation. Visible windows are multi-light double-hung wood windows. The main entryway is centered under a partial-width projecting porch. The porch is supported by turned wood posts. The entry is a partially glazed wood-paneled door accessed by a set of brick steps.

The building has foundation plantings around the porch and a front yard area landscaped with scored concrete. A side driveway runs along the south edge of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Spanish Colonial Revival Fourplex.

834 Huntley Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Fourplex property type and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Fourplex in the Spanish Colonial Revival style built in 1929. The building is rectangular in plan. Exterior walls are stucco. Ornamentation consists of wood railings, turned wood supports, and carved brackets for a balconette. The building has a side-gabled roof clad in clay tile with shallow, open eaves and exposed rafter tails. Visible fenestration consists of single-light wood casement windows arranged in pairs and groups of three. The main entrance to the building consists of a multi-light, fully glazed arched wood door under a canvas canopy. Landscaping includes a number of mature trees, shrubs, and vines that obscure the front of the building, as well as brick hardscaping. There are no ancillary buildings visible from the public right-of-way.

Period of Significance: 1895-1925 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). While it possesses character-defining features of the American Foursquare architectural style and Single-Family Residence property type, it lacks the aspects of integrity essential to conveying this potential significance.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and material have been diminished by the removal of original features and installation of incompatible new windows, awnings, and a porch enclosure.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 3-story Postwar Apartment House (Type B) with Sea Ranch influences built in 1980. The building is roughly rectangular in plan. Exterior walls are diagonal wood siding, wood shingle, and stucco. Ornamentation is minimal. The building has multiple gable and shed-roof forms clad in composition shingles with flush eaves. Visible fenestration consists of single-light metal or vinyl casements. Entrances to individual units are accessed via exterior walkways and consist of single wood slab doors. Landscaping includes mature trees and shrubs in planters around concrete hardscaping. Exterior wood stairs lead from the street to unit entrances.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it is an unremarkable example of the property type and is unlikely to meet the exceptional significance thresholds for properties less than 50 years old.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Apartment House (Type B).

950 Kings Road appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under national criterion A, state criterion 1, and local criteria A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of Postwar Apartment House (Type B).

It possesses most character-defining features of the Postwar Apartment House (Type B) property type with Sea Ranch influences, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the latter half of the twentieth century, West Hollywood faced a housing shortage like much of Southern California. Factors such as the rising cost of land, growing populations, opposing views on zoning, increased multi-family construction, and rent control, and a high percentage of renters helped cause and complicate the issue. Recognizing the need for more localized government, residents voted to incorporate the City of West Hollywood in November 1984. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): As changes in zoning and land prices curtailed lower density construction, the postwar apartment house type emerged. They often boasted larger unit sizes and features like en suite bathrooms, interior double-loaded corridors, and subterranean or podium parking that reflected key demographic and cultural shifts. Others had a more modular design, formed by multiple individual units. Features borrowed from Mid-Century and Late Modern architecture helped to convey a sense of contemporary luxury to the otherwise simple and boxy construction.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story single-family residence in the Spanish Colonial Revival style built in 1935. The building is irregular in plan. Exterior walls are stucco. Ornamentation includes wrought iron grilles. The building has hipped and gabled roofs clad in clay tile with open eaves and exposed rafter tails. There is a prominent stucco chimney at the northwest corner. Fenestration consists of single-light and multi-light wood casement windows and a stained glass oeil-de-boeuf window on the upper floor. The primary entrance is within a recessed opening and consists of a single wood-paneled door. There are two one-story detached ancillary buildings to the rear of the main residence and an arched porte-cochere leads to the back of the property. The property has a front yard area with a fieldstone driveway, mature trees and shrubs, and a lawn surrounded by a brick retaining wall. The front edge of the property is lined with tall cypress trees.

Period of Significance: 1895-1925; 1922-1949 Property Type: Residential Applicable Criteria: Local: A1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of the Spanish Colonial Revival style.

1146 La Cienega Boulevard appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Architectural Styles under local criterion A1 as a fully realized example of the Spanish Colonial Revival style applied to a single-family residence. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 3-story multi-family residence built in 1958. The building is generally rectangular in plan. Exterior walls are stucco. Ornamentation is reminiscent of Creole townhouses of New Orleans and consists of decorative wrought iron railings around the balconies, wood shutters, and exaggerated window and door frames. The building has a flat and gabled roof clad in composition shingles. Windows consist of full-height single-light wood casement windows, multi-light wood casement windows, sliding aluminum and vinyl windows. The primary entryway consists of a single, partially glazed wood door with a circular stained glass window. There is soft-story parking at the street level of the west elevation. At the rear of the property there is a swimming pool.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment with Hollywood Regency influences.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Postwar Courtyard Apartment property type and Hollywood Regency style, but lacks distinguishing architectural detailing when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

This is a 2-story Postwar Courtyard Apartment with Late American Colonial Revival influences built in 1950. The building is roughly U-shaped in plan. Exterior walls are stucco and brick. Ornamentation consists of decorative wrought iron detailing, fluted pilasters around the main entrance, and applied signage that reads "The Terrace." The building has a hipped roof clad in composition shingles with overhanging boxed eaves. Fenestration consists of multi-light steel casements. Individual units are accessed via exterior walkways and consist of single wood-paneled doors. There is a one-story detached garage to the rear of the building. Landscaping consists of a front yard area surrounded by a brick retaining wall with a lawn, shrubs and mature trees. There is a central brick walkway with steps. There is a small communal courtyard with hedges, shrubs, and concrete walkways and steps.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment with Hollywood Regency influences.

1245 N. Laurel Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment property type. As an unremarkable example of the Hollywood Regency style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Postwar Courtyard Apartment property type, and some features of the Hollywood Regency architectural style as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

Page 3

***NRHP Status Code 5S3**

***Resource Name or #:**(Assigned by Recorder) 1245 N Laurel Ave

Recorded By: Amanda Duane **Date:** 8/26/2023 ☒ Continuation ☐ Update

B10. Significance (Continued from Page 2): Hollywood Regency architecture combines the clean lines of the modernism movement with stylized Classical detailing. The style was popularized, especially among the Hollywood elite, in part by the work of John Woolf, and was often utilized in remodeling existing homes. Hollywood Regency architecture often features a mansard roof and is characterized by an emphasis on verticality and tall, narrow features, including double-height entrances, thin columns, pediments, pilasters, and ornate wrought iron railings.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Postwar Courtyard Apartment in the Mid-Century Modern style built in 1953. The building is U-shaped in plan. Exterior walls are stucco with volcanic rock veneer. Ornamentation consists of exaggerated balcony supports. The building has a low-pitched front-gabled roof with open eaves and projecting beams. Fenestration consists of wood clerestory windows in the gable end, steel casements, vinyl single-hung windows, and aluminum sliding windows. A breezeway leads to the central courtyard. Individual units appear to be accessed from the exterior surrounding the courtyard.

The central courtyard includes a pool and tropical plantings. There is soft-story parking along the south edge of the building. The building has a front yard area with volcanic rock planters, tropical plantings, trees, and shrubs.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Courtyard Apartment. It was also identified for evaluation through public comment.

7517 Lexington Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of a Prewar Courtyard Apartment. As the building is an unremarkable example of the Tudor Revival style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Prewar Courtyard Apartment property type and some features of the Tudor Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Prewar Courtyard Apartments were the next evolution of the courtyard housing type after bungalow courts. Multiple units in one or two larger buildings were arranged around a central courtyard or open space. Many examples were thoughtfully designed by architects, which reflected the increasing wealth of residents living in multi-family housing during this period. Architects including Arthur and Nina Zwebell and F. Pierpont and Walter Davis were highly influential, helping to shape the designs of the property type through the 20th century.

Like the Craftsman style, Tudor Revival has ties with the Arts and Crafts movement. Tudor Revival architecture draws inspiration from domestic architecture of the late medieval period in England, ranging from large manors to modest cottages. It emerged on the East Coast as early as the 1890s and became widely popular in Southern California by the 1920s.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style with Early Colonial Revival influences built in 1920. The building is rectangular in plan. Exterior walls are wood siding. There is an exterior brick chimney. Ornamentation includes dentilled detailing along the front of the entry porch. The building has a cross-gabled roof clad in composition shingles with shallow, open eaves and extended rafter tails. A trellis extends over the side driveway. Windows are obscured behind security bars but appear to consist of aluminum sliders. The main entrance consists of a single entry door obscured behind a metal security door. The entrance is centered within a partial-width projecting porch supported by round wood columns. If present, any ancillary buildings are not visible from the public right-of-way or on satellite imagery. Landscaping includes a front yard area with a central walkway, mature trees, and shrubs. The front of the property is enclosed by a chain-link fence. A side driveway runs along the east edge of the property.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story Prewar Courtyard Apartment in the Spanish Colonial Revival style built in 1924. The building is U-shaped in plan. Exterior walls are stucco. Ornamentation includes carved wood brackets and wall extensions with arched openings. The building has a flat roof with clay tile coping. Windows consist of multi-light wood casements. Individual unit entrances are accessed via a central concrete walkway and consist of single wood-paneled doors with metal screens. Each entrance is sheltered beneath a shallow shed-roof overhang clad in clay tile. There is a 1-story detached building to the rear of the property with paired metal doors for storage or parking. Landscaping includes a front yard area surrounded by hedges with mature trees and shrubs as well as trees, shrubs, and foundation plantings along the edges of the building.

*B10. Significance: Theme Courtyard Housing; Period Revival: Spanish Colonial Revival B10 Area: West Hollywood

Period of Significance: 1910-1969; 1922-1949 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of courtyard housing.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it is an unremarkable example of the Spanish Colonial Revival style. It possesses some features of a Prewar Courtyard Apartment and Bungalow Court, but is not a fully realized example of either property type; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1920. The building is rectangular in plan. Exterior walls are wood siding. The building has a cross-gabled roof clad in composition shingles with shallow, boxed eaves. Visible windows consist of single-light wood casements arranged individually, in pairs, and groups of three. The primary entrance consists of a single wood-paneled door centered beneath a partial-width projecting porch. The porch is supported by round wood columns and accessed by a set of brick steps. There is a one-story detached garage to the rear of the building. Landscaping consists of a hardscaped patio at the front of the property, mature trees, and shrubs. The front of the property is partially enclosed by a wood or metal fence. A side driveway runs along the east edge of the property.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This (7738 Norton Avenue) is a 1-story single-family residence in the Craftsman style built in 1915. The building is rectangular in plan. Exterior walls are wood shingle. The building has a front-gabled roof clad in composition shingles with open eaves, exposed rafter tails, and projecting beams. Wood windows consist of single-light fixed and multi-light casements. The main entrance is a partially glazed wood door behind a metal screen door. The property has a front yard area with some plantings and a centered concrete walkway.

To the rear of the property (1116 N. Genesee Avenue) there is a 1-story duplex in the Spanish Colonial Revival style built in 1915. The duplex is rectangular in plan. Exterior walls are stucco. The duplex has a flat roof with raised parapet. Windows consist of single-light and multi-light double-hung wood windows as well as hung vinyl windows. The two entry doors are sheltered under shallow gabled overhangs clad with clay tile and consist of wood-paneled doors behind metal security doors.

*B10. Significance: Theme Single-Family Residences and Secondary Dwellings; Craftsman B10 Area: West Hollywood

Period of Significance: 1895-1925; 1906-1931 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as appearing ineligible for listing; however, the evaluation only addressed the Spanish Colonial Revival duplex to the rear (1116 N. Genesee). 7738 Norton Avenue was included in 2017 in the Lexington-Curson Residential Historic Resources Survey study. It was re-surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). While it possesses character-defining features of the Craftsman architectural style and Single-Family Residence property type, it lacks the aspects of integrity essential to conveying this potential significance.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and material have been diminished by the removal of an original projecting porch, a key character-defining feature of the Craftsman style.

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: Local: A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. It was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. It was reclassified as an example of the Fourplex property type as defined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

7953-7959 Norton Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. The two fourplexes are significant in the context of Multi-Family Residential Development under local criteria A3 for representing residential and cultural patterns that comprised the growth of West Hollywood. However, as the buildings are unremarkable examples of the Spanish Colonial Revival style, the property appears unlikely to meet state or national thresholds for significance.

The two buildings possess most character-defining features of the Fourplex property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1- and 2-story single-family residence in the Spanish Colonial Revival style built in 1930. The building has a T-shaped plan. Exterior walls are stucco. Ornamentation consists of louvered wood window shutters. The building has a hipped roof clad in clay tile with shallow open eaves and exposed rafter tails. Visible fenestration consists of multi-light paired wood casements, arched multi-light fixed wood windows, and leaded-glass casement windows. The main entryway is situated in a small projecting vestibule and consists of an arched wood-paneled door.

The building has a front yard area surrounded by a concrete retaining wall with a curvilinear brick walkway, grass, foundation plantings, and trees. The main entry patio is enclosed by a low stucco wall with a wrought iron gate. A side driveway runs along the east edge of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Spanish Colonial Revival Duplex.

7961 Norton Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Duplex property type and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

Period of Significance: 1920-1945 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property is nearly identical to 8028 Norton Avenue, which was evaluated in 2008 as potentially eligible for local listing as a contributor to the Garden Court Thematic District. 8028 Norton Avenue was re-surveyed and evaluated as an individual resource as part of the 2022-2023 multi-family survey update. Due to their similarity, the evaluation also applies to this property.

Upon further research and evaluation, 8022 Norton Avenue is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it is an unremarkable example of a Prewar Apartment House and lacks the architectural distinction and unique amenities of its counterparts that would have been competing for tenants as West Hollywood became an increasingly fashionable and desirable place to live.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

Period of Significance: 1895-1925; 1898-1909 Property Type: Residential Applicable Criteria: Local: A1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was previously evaluated in 2008 as potentially eligible as an individual resource. It was re-surveyed as part of the 2022-2023 multi-family survey update.

9209 Norton Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 as a fully realized example of a Vernacular Cottage. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Single-Family Residence and Vernacular Cottage property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Vernacular Cottages were a common house type that began to emerge in the late 1800s with the proliferation of new construction techniques, mail order catalogs, and railroad shipping capabilities. The standardized form could easily be adapted to personal taste by adding features borrowed from popular styles like Queen Anne, Eastlake, and Neoclassical architecture, particularly around the prominent front porch.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

8258 and 8262 Norton Avenue are connected by decorative arch that spans between the front elevations and over a concrete walkway and driveway.

8258 Norton Avenue is a 2-story Prewar Apartment House (Type A) in the Spanish Colonial Revival style built in 1934. The building is rectangular in plan. Exterior walls are stucco. The building has a shed roof clad in clay tile at the front and a flat roof with clay tile coping at the rear. Fenestration consists of paired multi-light casement wood windows, some within pointed arched openings. There is a pair of French doors on the north elevation, but individual unit entrances are not visible from the public right-of-way. There is a 1-story detached garage to the rear of the property. Landscaping includes a small front yard area enclosed by a stucco wall, a mature tree, and brick planters with hedges and foundation plantings in a lining the building.

8262 Norton Avenue is a 2-story Prewar Apartment House (Type A) in the Monterey Revival style built in 1931. The building is rectangular in plan. Exterior walls are stucco with vertical wood siding. The building has a shed roof clad in clay tile at the front and a flat roof with clay tile coping at the rear. Fenestration consists of paired multi-light casement wood windows. Individual units appear to be accessed via interior corridors. The main entrance is centered on the north elevation and consists of a fully glazed multi-light wood door with sideline in an arched opening. A second-story balcony is supported by wood posts and carved wood brackets and enclosed with a wrought iron railing. Landscaping includes a small front patios enclosed by stucco walls and brick planters with hedges lining the building.

B9a. Architect: Unknown B9b Builder: Unknown

*B10. Significance: Theme Apartment Houses; Prewar Apartment Houses; Mediterranean and Indigenous Revival; Monterey Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment as an example of the Monterey Revival style. The Monterey Revival style is rare enough in West Hollywood that a theme was not developed for the context statement update; therefore, it was assessed using the Los Angeles Citywide Historic Context Statement.

8258 and 8262 Norton Avenue appear eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 for representing residential and cultural patterns that comprised the early growth of West Hollywood. While 8258 Norton Avenue is an unremarkable example of the Spanish Colonial Revival style, 8262 Norton Avenue is a good example of the Monterey Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

8258 and 8262 Norton Avenue possess most character-defining features of Prewar Apartment House (Type A), as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. Character-defining features related to the Monterey Revival style include 8262 Norton Avenue's 2-story height, clay tile roof, stucco and vertical wood cladding, cantilevered gallery with wood supports, rectangular window and door openings, and multi-light wood windows.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants.

Monterey Revival architecture takes inspiration from the combination of Spanish and American Colonial detailing that occurred as nineteenth century Anglo-American settlers began modifying existing adobe houses. The style was popular in the late 1920s until the onset of World War II and was predominantly applied to residential buildings. It is characterized by 2-story height, balconies or galleries, a combination of cladding materials, and rectangular openings, and often features American Colonial Revival ornamentation such as wood window shutters.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Fourplex in the Mediterranean Revival style built in 1930. The building is rectangular in plan. Exterior walls are stucco. Ornamentation consists of carved wood brackets, wrought iron railing and brackets along the balcony, cast stone entry surround, and shield motifs. The building has a shed roof clad in clay tile at the front and a flat roof with clay tile coping at the rear. Fenestration consists of single-light fixed picture windows in arched openings and multi-light wood casements. The primary entryway is located within a recessed arched entryway and consists of a single, partially glazed wood door. There is a one-story detached garage to the rear of the main building. Landscaping includes a front yard area with a lawn, shrubs, and central concrete walkway, enclosed by a stucco wall and wrought iron gates. A side driveway runs along the north edge of the property.

Period of Significance: 1920-1945; 1923-1939 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Fourplex.

929 N. Ogden Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood, and as a fully realized example of the Mediterranean Revival style and Fourplex property type. Due to minor alterations, the property may not meet state or national thresholds for integrity.

It possesses most character-defining features the Fourplex property type and Mediterranean Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Mediterranean Revival style shares stylistic and material elements with Spanish Colonial Revival, but is often less elaborate or fanciful in its application. The style is characterized by symmetry, hipped roofs, boxed eaves and brackets, arched openings, and cast concrete ornamentation, particularly around doors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

*B5. Architectural Style: Not Visible

*B6. Construction History: (Construction date, alterations, and date of alterations)

Constructed, 1921. No digital exterior alteration permits on file for 1124 ½ Ogden Drive.

*B7. Moved? ☒ No ☐ Yes ☐ Unknown Date: Original Location:

*B8. Related Features:

B9a. Architect: Unknown B9b Builder: Unknown

*B10. Significance: Theme The LGBTQ+ Community and the Media B10 Area: West Hollywood

Period of Significance: 1945-1980 Property Type: Residential Applicable Criteria: A; 1; C

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment for its association with Jeanne Córdova and The Lesbian Tide.

1124 ½ Ogden Drive is significant in the context of LGBTQ+ history as the publication location of an influential publication that made significant contributions to LGBTQ+ media under national criterion A, state criterion 1, and local criterion C. The Lesbian Tide originated as a newsletter for the lesbian rights organization Daughters of Bilitis (DOB). In late 1972, The Lesbian Tide split from the DOB and was published as an independent lesbian/feminist magazine. Córdova remained in a lead role as editor or publisher until the end of the magazine's run in 1980. 1124 ½ Ogden Drive is listed as the publication location for the earliest independent issues and until at least February of 1973. It is assumed that Córdova lived at this location while The Lesbian Tide was being published between 1972 and 1973, but this could not be confirmed with genealogical research. Additional information would be necessary to confirm this association and assess whether the subject property is also significant for its association with Córdova under national criterion B, state criterion 2, and local criterion C.

1124 ½ N. Ogden is the rear unit on the parcel and is not fully visible from the public right-of-way. As such, integrity could not be assessed. While the building is significant for its association with Cordova and The Lesbian Tide, confirmation that it retains sufficient integrity to convey this association would be necessary to determine if it is eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property.

Integrity could not be fully assessed as the property was not visible from the public right-of-way at the time of survey.

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it is an unremarkable example of a Prewar Apartment House and lacks the architectural distinction and unique amenities of its counterparts that would have been competing for tenants as West Hollywood became an increasingly fashionable and desirable place to live.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design and materials have been diminished by the installation of non-original vinyl windows.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Craftsman and Early American Colonial Revival single-family residence.

1224 N. Ogden appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman and Early American Colonial Revival styles. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and a combination of features of the Craftsman and Early American Colonial Revival styles, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Early American Colonial Revival dates to the prewar period and is characterized by symmetrical facades and ornamentation such as pediments and wood window shutters.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a multi-family residence built in 1922. It is a bungalow court consisting of five, 1-story, two-unit bungalows arranged in a U-shape. Exterior walls are stucco. Ornamentation includes a multi-draped arch over the central walkway. The bungalows are rectangular in plan and each has a flat roof with a stepped raised parapet. Visible fenestration consists of double-hung wood windows and wood casement windows in tripartite groupings. Individual unit entrances consist of a fully glazed multi-light wood doors. The entrances are sheltered by shallow pent overhangs clad in clay tile and accessed by a set of shallow quarry tile steps.

The bungalows are arranged around a central brick walkway lined with foundation plantings and shrubs. At the front of the property is a shallow front yards surrounded by a retaining wall. A set of quarry tiled steps and a concrete ramp lead to the central walkway. There does not appear to be any vehicular accommodation on the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Bungalow Court.

1249 N. Ogden Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the bungalow court property type with automobile access incorporated into the design of the property with a central driveway and porte-cochere in the rear building. As the buildings themselves are an unremarkable example of the Spanish Colonial Revival style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Bungalow Court property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. ☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The bungalow court is a multi-family property type consisting of free-standing units thoughtfully arranged around a common landscaped open space. It emerged in Southern California in the early twentieth century and was popular prior to World War II. For developers, they allowed for greater density on a lot while being less expensive to construct than an apartment house; for residents, they made a detached home more affordable while creating a sense of community.

The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

In 2003, 1249 N. Ogden Drive was nominated for designation as part of a proposed Bungalow Court Thematic Grouping. West Hollywood City Council denied designation of the grouping and the resolution stipulated that a new nomination could not be filed for the subject property until after June 23, 2008.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1921. The building has a rectangular plan. Exterior walls are wood clapboard. The building has a hipped and side-gabled roof clad in composition shingles with shallow open eaves and exposed rafter tails. There is an exterior brick chimney on the south elevation. Visible fenestration consists of one-over-one double-hung and eight-over-one fixed windows in tripartite groupings. The main entryway is centered under a shallow projecting porch with an arched roof. The porch is supported by turned wood posts and accessed by a set of shallow concrete steps. The entry is a fully glazed, multi-light wood door.

The building has a front and side yard with pavers and mature trees. The front of the property is enclosed by a metal railing. A side driveway runs along the south edge of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update.

1150 N. Orange Grove Avenue was previously approved for redevelopment in 2021, supported by a Historic Resource Assessment prepared by ASM Affiliates. No new information was revealed since that time as a part of this updated evaluation; therefore, the property remains ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z).

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design has been diminished by replacement windows.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment as an example of the Pueblo Revival style. The Pueblo Revival style is rare enough in West Hollywood that a theme was not developed for the context statement update; therefore, it was assessed using the Los Angeles Citywide Historic Context Statement.

In the Los Angeles region, Pueblo Revival became popular after the 1915 Panama-California Exposition in San Diego and drew inspiration from Native American pueblos in the desert Southwest. The style is characterized by cubic massing, flat roofs with parapets, stucco cladding mimicking an adobe finish, vigas, and minimal openings. While the property possesses some character-defining features of the style, it is not a fully realized example and has diminished integrity.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design and materials have been diminished by the installation of window bars, metal awnings, and wrought iron porch supports.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 3-story Prewar Apartment Building in the Spanish Colonial Revival style built in 1929. The building is rectangular in plan. Exterior walls are stucco. Ornamentation consists of punched screens and wrought iron balconette. There is a wrought iron fire escape at the center of the front elevation. The building has a shed and semi-octagonal roof clad in clay tile with exposed rafter tails at the front, and a flat roof with a parapet to the rear. Fenestration consists of multi-light, fixed wood windows in arched and rectangular openings. The primary entrance consists of a single-light, fully glazed wood door within a recessed arched opening. The entrance is accessed by a set of concrete steps with a wrought iron railing. Landscaping is limited to hedges along the perimeter of the building. There is a 1-story detached garage building to the rear and a side driveway running along the south edge of the property.

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House (Type A).

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it is an unremarkable example of the Spanish Colonial Revival style and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and material have been diminished by changes to the cladding and doors.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1921. The building has a rectangular plan. Exterior walls are wood clapboard. The building has a cross-gabled roof clad in composition shingles with shallow eaves. There is an exterior brick chimney on the south elevation. Visible fenestration consists of wood casements with geometric muntins in tripartite groupings. The main entryway is centered under a shallow projecting porch with a gabled roof. The porch is supported by turned wood posts and accessed by a set of shallow concrete steps. The entry is a wood-paneled door with full-height multi-light sidelights.

The building has a front yard with a central concrete walkway, grass, foundation plantings, shrubs and trees. The front of the property is enclosed by a wood picket fence. A side driveway runs along the south edge of the property.

Period of Significance: 1895-1925; 1906-1931; 1919-1939 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Craftsman and Early American Colonial Revival single-family residence.

1221 N. Orange Grove Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman and Early American Colonial Revival styles. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and a combination of features of the Craftsman and Early American Colonial Revival styles, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Early American Colonial Revival dates to the prewar period and is characterized by symmetrical facades and ornamentation such as pediments and wood window shutters.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Duplex and example of the Neoclassical style. The Neoclassical style is rare enough in West Hollywood that a theme was not developed for the context statement update; therefore, it was assessed using the Los Angeles Citywide Historic Context Statement.

1227 N. Orange Grove Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criterion A3 for representing residential and cultural patterns that comprised the growth of West Hollywood. The building also appears eligible under local criterion A1 and B as a rare example of the Neoclassical style in West Hollywood. Due to minor alterations, the property may not meet state or national thresholds for integrity.

It possesses most character-defining features of the Duplex property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. The Neoclassical style is rare enough in West Hollywood that a theme was not developed for the context statement update. Character-defining features include the symmetrical arrangement, dentilled cornices, eave returns, triangular pediment, ionic columns, fluted pilasters, and turned wood balustrade.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. ☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants.

The Neoclassical style emerged in the late nineteenth century as architects reinterpreted Greek and Roman architectural precedents. Its monumental appearance lent itself well to larger designs like public buildings and banks. In the early twentieth century, it was applied more frequently to domestic architecture. The style is characterized by symmetrical arrangements and Classical detailing, including pediments, parapets, and columns.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Courtyard Apartment in the Tudor Revival style built in 1942. The two buildings are L-shaped in plan. Exterior walls are stucco with stone veneer. Ornamentation includes battened wood window shutters. 1250 N. Orange Grove Drive has decorative half-timbering. Exterior chimneys are stucco and brick, respectively. The buildings have gable and hipped roofs clad in composition shingles with shallow boxed eaves. Fenestration consists of multi-light wood casements, leaded glass windows, as well as sliding and hung vinyl replacements. Visible unit entrances consist of single wood-paneled doors under shed-roof overhangs with concrete stoops. There are 1-story detached multi-car garages to the rear of the properties. There is a front yard area at the front of the property with a lawn, shrubs, and trees surrounded by a concrete block and stone retaining wall. Between the two buildings there is a shared courtyard area with stone walkways and planters with mature trees, shrubs, and flowers.

Although intact, it is an unremarkable example of the Spanish Colonial Revival style that lacks distinguishing architectural detailing when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Craftsman style built in 1913. It was converted to a duplex after 1950. The building has a rectangular plan. Exterior walls are stucco. The building has a cross-gabled roof clad in composition shingles with shallow open eaves and exposed rafter tails. Visible fenestration consists of one-over-one double-hung wood windows. The main entryway is centered within a recessed porch. The porch is supported by wood posts and accessed by a set of shallow concrete steps. The entry is a wood-paneled door.

The building has a front yard with a central concrete walkway, foundation plantings, shrubs and trees. The front of the property is enclosed by a wood picket fence. A side driveway runs along the north edge of the property.

Period of Significance: 1895-1925; 1906-1931 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update.

923 Palm Avenue is an unremarkable example of a Craftsman residence dating from the early twentieth century with diminished integrity. City Council denied local designation of 923 Palm Avenue on July 15, 2013. No new information was revealed as a part of this updated evaluation; therefore, the property remains ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z).

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design and materials has been diminished by the application of stucco cladding.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story duplex in the Spanish Colonial Revival style built in 1926. The building has a rectangular plan. Exterior walls are stucco. Ornamentation consists of arched openings, carved brackets, and sawn wood railings. The rear of the building has a flat roof with clay tile coping, and the front of the building has a cross-gabled roof clad in clay tiles with flush eaves. The roof is accentuated by an octagonal tower that includes a vestibule for a unit entrance. Visible fenestration consists of arched single-light fixed wood windows, multi-light wood casements, and multi-light wood fixed windows. Individual units appear to be accessed from the exterior but are not visible.

The building has a hardscaped front yard lined with hedges and mature trees. There is a detached garage south of the building.

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria:

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Spanish Colonial Revival Duplex.

9000 Phyllis Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Duplex property type and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Postwar Courtyard Apartment in the Mid-Century Modern style built in 1953. The building is U-shaped in plan. Exterior walls are stucco with volcanic rock veneer. Ornamentation consists of geometric metal screens. The building has a low-pitched front-gabled roof with open eaves and projecting beams that continues into two shed roofs along the wings of the U-shaped plan. Fenestration consists of fixed clerestory windows in the gable end, jalousie windows, and fixed aluminum windows. The main entrance consists of a fully glazed metal or wood door with sidelights in a recessed entryway. Individual units appear to be accessed from the exterior surrounding the courtyard.

The central courtyard includes a fountain. There is a vehicular entrance on the ground floor leading to subterranean parking. The front of the building is landscaped with retaining wall planters with shrubs and trees. A set of steps leads to the front entrance.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

928 N. San Vicente Boulevard appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment type. As the building is an unremarkable example of Mid-Century Modern architecture, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Postwar Courtyard Apartment property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Mid-Century Modern style evolved from various prewar expressions of modernism. A "second generation" of architects, inspired by the work of early local Modernists like Richard Neutra, Rudolph Schindler, and Frank Lloyd Wright, developed a regional style popularized in part by the Art and Architecture magazine's pivotal Case Study Program. The style is characterized by clear expression of structure and materials, an emphasis on horizontality, large expanses of glass, and seamless indoor-outdoor spaces.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance despite minor, reversible alterations at the main entry.

Period of Significance: 1945-1962

Property Type: Residential

Applicable Criteria: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Dingbat/Stucco Box.

1035 N. Sierra Bonita Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of postwar West Hollywood and as an excellent and rare example of a Dingbat exhibiting quality of design. As this type of building is ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses all character-defining features of the Dingbat/Stucco Box property type as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the Dingbat/Stucco Box emerged as an economical and efficient multi-family housing type that was well-suited for increasing density through infill construction. The simple buildings were accentuated with signage and ornamentation that resembled glyphs in typesetting called "dingbats." Although popular, they were short-lived, as new parking regulations in the mid-1960s rendered the characteristic tuck-under or soft-story parking inadequate. (See continuation sheet.)

☐ Update

B10. Significance (Continued from Page 2): Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance. The original script signage was lost in the 1970s, but was reproduced in metal and reinstalled c. 2019. The building has also undergone a soft-story retrofit as mandated by City ordinance, but the original slender posts are still apparent.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1- to 3-story Prewar Courtyard Apartment in the Hollywood Regency style built in 1937. The two buildings are roughly rectangular in plan. Exterior walls are stucco and brick. There are exterior brick chimneys. Ornamentation includes latticework with vines, wood window shutters, exaggerated American Colonial Revival details, pediments, Juliet awnings, and wrought iron railings. The buildings have flat and hipped roofs clad in composition shingles with shallow boxed eaves. Fenestration consists of wood multi-light double-hung windows and casements. Individual unit entrances appear to be accessed via the central courtyard. There is soft-story parking at the rear of each building. Landscaping includes mature trees and shrubs at the front of the property and a communal courtyard with a fountain and brick patios, stairs, and walkways lined with trees and shrubs.

*B10. Significance: Theme Courtyard Apartments; Prewar Courtyard Apartments; Period Revival; Hollywood Regency B10 Area: West Hollywood

Period of Significance: 1920-1945; 1937-1961 Property Type: Residential Applicable Criteria: A/C; 1/3; A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Courtyard Apartment.

8720-8732 Shoreham Drive appears eligible for listing in the National Register (3S) and California Register (3CS) and for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under national criterion A/C, state criterion 1/3, and local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of a Prewar Courtyard Apartment in the Hollywood Regency style.

It possesses most character-defining features of the Prewar Courtyard Apartment property type and Hollywood Regency architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Prewar Courtyard Apartments were the next evolution of the courtyard housing type after bungalow courts. Multiple units in one or two larger buildings were arranged around a central courtyard or open space. Many examples were thoughtfully designed by architects, which reflected the increasing wealth of residents living in multi-family housing during this period. Architects including Arthur and Nina Zwebell and F. Pierpont and Walter Davis were highly influential, helping to shape the designs of the property type through the 20th century. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Hollywood Regency architecture combines the clean lines of the modernism movement with stylized Classical detailing. The style was popularized, especially among the Hollywood elite, in part by the work of John Woolf, and was often utilized in remodeling existing homes. Hollywood Regency architecture often features a mansard roof and is characterized by an emphasis on verticality and tall, narrow features, including double-height entrances, thin columns, pediments, pilasters, and ornate wrought iron railings.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains all necessary aspects of integrity from the period of significance.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

8731 Shoreham Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment property type. As the buildings themselves do not reflect a particular style of architecture, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Postwar Courtyard Apartment property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

Property Type: Residential

Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a High-Rise Apartment Tower.

8787 Shoreham Drive appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development under local criterion A1/A3 for representing residential and cultural patterns that comprised the postwar residential growth of West Hollywood. As the building is an unremarkable example of Mid-Century Modern architecture, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the High-Rise Apartment Tower property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

In 1956, Los Angeles County residents voted to repeal the 13-story height limit for residential construction, which led to an increase in high-rise construction in the following years. In West Hollywood, this activity was concentrated near Sunset Boulevard and Doheny Road and high-rise office buildings. Constructed and marketed as luxury rentals with an array of amenities, high-rise apartment towers have often been converted to condominiums.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

This is a 2-story Fourplex in the French Revival style. The building is rectangular in plan. Exterior walls are stucco. There is an interior stucco chimney. Ornamentation consists of quoin detailing, a turret, string course, carved brackets under a projecting bay window, and a segmental pediment with pilasters around the entrance. The building has mansard roof clad in composition shingles with flush eaves and a conical roof over the turret. Windows consists of multi-light wood casements. Individual units appear to be accessed via interior corridors. The main entrance on the front elevation consists of a single wood-paneled door. Landscaping consists of a front yard area surrounded by hedges and a brick retaining wall. There is a one-story detached garage to the rear of the main building.

*B10. Significance: Theme Apartment Houses: Duplexes and Fourplexes; Period Revival: French Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1926-1941 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Fourplex.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Fourplex property type and French Revival (Chateausque) style, but lacks distinguishing architectural detailing when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

B9a. Architect: Unknown B9b. Builder: Unknown

*B10. Significance: Theme Apartment Houses; Prewar Apartment Houses; Period Revival: Spanish Colonial Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Pre-War Apartment House property type but lacks distinguishing architectural detailing and has diminished integrity when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and materials have been diminished by removal of original windows, modifications to the porch, and balconette railing.

Period of Significance: 1895-1925; 1922-1949 Property Type: Residential Applicable Criteria: Local: A1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of the Spanish Colonial Revival style.

517 N. Sweetzer Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Architectural Styles under local criterion A1 as a fully realized example of the Spanish Colonial Revival style applied to a single-family residence. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Spanish Colonial Revival architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

Period of Significance: 1945-1969 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Courtyard Apartment.

921-925 Sweetzer Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment property type. As the buildings themselves do not reflect a particular style of architecture, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Postwar Courtyard Apartment type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

Period of Significance: 1910-1940; 1922-1949 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

1014 N. Sweetzer Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the bungalow court property type. As the buildings themselves are an unremarkable example of the Spanish Colonial Revival style, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Bungalow Court property type, and some character-defining features of the Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

The bungalow court is a multi-family property type consisting of free-standing units thoughtfully arranged around a common landscaped open space. It emerged in Southern California in the early twentieth century and was popular prior to World War II. For developers, they allowed for greater density on a lot while being less expensive to construct than an apartment house; for residents, they made a detached home more affordable while creating a sense of community. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.

In 2003, 1014 N. Sweetzer Avenue was nominated for designation as part of a proposed Bungalow Court Thematic Grouping. West Hollywood City Council denied designation of the grouping and the resolution stipulated that a new nomination could not be filed for the subject property until after June 23, 2008.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a multi-family residence built in 1927. It is a bungalow court consisting of two, 1-story, three-unit bungalows and a 2-story, four-unit bungalow arranged in a U-shape. Exterior walls are textured stucco. Ornamentation consists of wing walls. The bungalows are rectangular in plan and each has a flat roof with a raised parapet and clay tile coping. Windows consist of multi-light double-hung wood windows. Entrances are obscured by metal screen doors. The entrances are sheltered by shallow pent overhangs clad in clay tile and accessed by a shallow set of concrete steps.

The bungalows are arranged around a central concrete walkway lined with foundation plantings and shrubs. There does not appear to be any vehicular accommodation on the property.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a multi-family residence built in 1926. It is a bungalow court consisting of three, 1-story, four-unit bungalows arranged in a U-shape. Exterior walls are textured stucco. Ornamentation consists of decorative attic vents, wing walls, and wrought iron balconettes. The bungalows are rectangular in plan and each has a flat roof with a raised parapet and clay tile coping. Visible windows consist of multi-light paired casements. Entrances are fully glazed multi-light wood doors. The entrances are sheltered by shallow pent overhangs clad in clay tile and accessed by a shallow set of concrete steps.

The bungalows are arranged around a central concrete walkway lined with foundation plantings and shrubs. There is a one-story detached garage with individual bays and metal tilt-up doors along the north edge of the property.

This property was previously nominated for local listing as a contributor of the Courtyard Thematic District in 1991. The property owner of 1233 N. Sweetzer Avenue was one of several property owners that presented an appeal to City Council about the designation. Council chose to defer action regarding the property's significance indefinitely on May 18, 1992.

This property is not fully visible from the public right-of-way due to heavy vegetation and could not be fully described or evaluated for potential significance or integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Postwar Courtyard Apartment in the Mid-Century Modern style built in 1956. The building is O-shaped in plan. Exterior walls are stucco, scored stucco, and volcanic rock veneer. The building has a low-pitched hipped roof with shallow boxed eaves. Fenestration consists of tripartite groupings with fixed metal windows flanked by single-light casements. The main entrance consists of a metal gate within a recessed entryway. Individual units are accessed from the exterior surrounding the courtyard. Entrances consist of flush wood doors with metal screens.

The central courtyard includes a hardscaped patio and planters. There is a vehicular entrance on the ground floor leading to subterranean parking. The front of the building is landscaped with terraced planters with tropical plants, trees, and shrubs surrounded by volcanic rock retaining walls. A set of concrete steps with volcanic rock risers leads to the front entrance.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

1236 N. Sweetzer Avenue appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Multi-Family Residential Development under local criteria A1 and A3 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a fully realized example of the Postwar Courtyard Apartment type. As the building is an unremarkable example of Mid-Century Modern architecture, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Postwar Courtyard Apartment property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.
After World War II, much of Southern California underwent a building boom, predominantly single-family tract homes in newly developed suburbs. Due to West Hollywood's earlier building boom in the 1920s, there was little room for this type of construction. As a result, postwar construction consisted largely of infill to increase density to meet the demand for housing.

During this period, the courtyard apartment property type evolved through the incorporation of economical construction techniques, midcentury detailing, and amenities intended to create a relaxed, indoor-outdoor atmosphere, including swimming pools, tropical plantings, and exterior balconies. (See continuation sheet.)

B10. Significance (Continued from Page 2): The Mid-Century Modern style evolved from various prewar expressions of modernism. A "second generation" of architects, inspired by the work of early local Modernists like Richard Neutra, Rudolph Schindler, and Frank Lloyd Wright, developed a regional style popularized in part by the Art and Architecture magazine's pivotal Case Study Program. The style is characterized by clear expression of structure and materials, an emphasis on horizontality, large expanses of glass, and seamless indoor-outdoor spaces.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Postwar Courtyard Apartment in the Mid-Century Modern style built in 1955. The building is O-shaped in plan. Exterior walls are stucco and cut stone veneer. The building has a low-pitched front-gabled and hipped roof with shallow eaves. Fenestration consists of jalousie windows and tripartite groupings with fixed metal windows flanked by single-light casements or jalousie windows. There are fixed louver awnings over the windows on the front elevation. The main entrance consists of a decorative metal gate within a recessed entryway. Individual units are accessed from the exterior surrounding the courtyard. Entrances consist of flush wood doors with metal screens.

The central courtyard includes a hardscaped patio and swimming pool. There is a vehicular entrance on the ground floor leading to subterranean parking. The front of the building is landscaped with elevated planters with tropical plants, trees, and shrubs surrounded by cut stone retaining walls. A set of concrete steps with cut stone risers leads to the front entrance.

Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Postwar Courtyard Apartment property type and Mid-Century Modern architectural style, but lacks architectural distinction when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

Period of Significance: 1920-1945; 1920-1945 Property Type: Residential Applicable Criteria: Local: A1/B

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment as an example of the Egyptian Revival style. The Egyptian Revival style is rare enough in West Hollywood that a theme was not developed for the context statement update; therefore, it was assessed using the Los Angeles Citywide Historic Context Statement.

1127 N. Vista Street appears eligible for designation as a West Hollywood Historic Resource as an individual property and as a contributor to the Vista Street Residential Historic District (5B) through survey evaluation. (See District Record.) While distinguishing architectural features were removed around 2021, including a winged orb motif above the primary entrance, residential examples of the Egyptian Revival style are very rare throughout the region. It is significant under local criteria A1 and B as a rare remaining example of the Egyptian Revival style applied to a residential building. As a modest example, the property may not meet state or national thresholds for integrity.

It possesses most character-defining features of the Duplex/Fourplex property type, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts. Character-defining features include the characteristic battened entryway with cavetto cornice, stucco exterior, small window openings, and flat roof.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand.

In the Los Angeles region, Egyptian Revival was a rare and short-lived architectural trend in the Los Angeles region that became even more popular after the discovery of King Tutankhamen's tomb in 1922. The style shared many similarities with the architecture of the Art Deco movement, including the use of vibrant colors, abstracted nature motifs, and stepped forms. Although fanciful, the style was somewhat impractical, which contributed to its decline in popularity.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance. It also retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

This is a 1-story Duplex in the Craftsman style with Early American Colonial Revival influences built in 1923. The building is rectangular in plan. Exterior walls are wood siding. The building has a cross-gabled roof clad in composition shingles with boxed eaves and eave returns. Windows consists of paired, multi-light wood casements and one-over-one wood double-hung windows. Individual unit entrances are centered under projecting porches and consist of single wood doors flanked by sidelights. The porches are supported by round wood columns. There are two, 1-story detached garages at the rear of the main building. The property has a front yard area with shrubs and mature trees. There is a brick paver driveway running along the north and south edges of the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Duplex.

1141 N. Vista Street appears eligible for designation as a West Hollywood Historic Resource as an individual property and as a contributor to the Vista Street Residential Historic District (5B) through survey evaluation. (See District Record.) It is significant in the contexts of Multi-Family Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the growth of West Hollywood and as a good example of the Craftsman and Early American Colonial Revival styles as applied to a duplex. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Duplex property type and Craftsman and Early Colonial Revival architectural styles, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand.

The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

American Colonial Revival refers to a range of architectural styles inspired primarily by the buildings along the Atlantic Coast of 17th - and 18th-century America. This revivalism went through several periods of popularity, beginning around the centennial in 1876. Early American Colonial Revival dates to the prewar period and is characterized by symmetrical facades and ornamentation such as pediments and wood window shutters.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance. It also retains sufficient integrity to contribute to the historic character of the Vista Street Residential Historic District.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House (Type A).

1153 N. Vista Street appears eligible for designation as a West Hollywood Historic Resource as an individual property and as a contributor to the Vista Street Residential Historic District (5B) through survey evaluation. (See District Record.) It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Prewar Apartment House (Type A) and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants. (See continuation sheet.)

Period of Significance: 1895-1925; 1906-1931 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Craftsman single-family residence.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. The property possesses some character-defining features of the Single-Family Residence property type and Craftsman architectural style, but lacks distinguishing architectural detailing when compared to similar properties in West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was surveyed as part of the 2022-2023 multi-family survey update and identified for evaluation through public comment.

814 N. West Knoll appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Duplex property type and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Duplexes and fourplexes were an early example of an apartment house, incorporating two or four individual units in one building that was similar in size, scale, and massing to a single-family residence. This allowed them to blend into low-density neighborhoods while creating more housing to meet rising demand. (See continuation sheet.)

B1. Historic Name: B2. Common Name:

B3. Original Use: Multiple Dwelling B4. Present Use: Multiple Dwelling

*B5. Architectural Style: Mid-Century Modern

*B6. Construction History: (Construction date, alterations, and date of alterations)

Constructed, 1961. Reroof, 2001. Reroof, 2012.

*B7. Moved? ☒ No ☐ Yes ☐ Unknown Date: Original Location:

*B8. Related Features:

B9a. Architect: Unknown B9b. Builder: Unknown

*B10. Significance: Theme Courtyard Apartments; Postwar Courtyard Apartments; Modernism and Mid-Century Modernism: Mid-Century Modern B10 Area: West Hollywood

Period of Significance: 1945-1969; 1949-1967 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Postwar Courtyard Apartment.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it is an unremarkable example of a Postwar Courtyard Apartment and the Mid-Century Modern style and does not appear to have an important association with postwar multi-family residential development; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 2-story Prewar Apartment Building (Type B) in the Spanish Colonial Revival style built in 1931. The building is irregular in plan. Exterior walls are stucco. Ornamentation includes wrought iron railings and grilles, carved wood brackets, and glazed ceramic tile accents. The building has a flat and hipped roof clad in clay tile with open eaves and exposed rafter tails. Windows consist of multi-light wood casements arranged individually and in pairs. Individual unit entrances consist of single wood doors. Some of the entrances are sheltered under porches with shed roofs clad in clay tile, stuccoed columns, and wrought iron railings. There is a one story, detached garage at the rear of the building. Landscaping includes areas of lawn, foundation plantings, shrubs, mature trees, and winding concrete walkways.

*B10. Significance: Theme Apartment Houses; Prewar Apartment Houses; Period Revival: Spanish Colonial Revival B10 Area: West Hollywood

Period of Significance: 1920-1945; 1922-1949 Property Type: Residential Applicable Criteria: Local: A1/A3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Prewar Apartment House (Type B).

1153 N. Vista Street appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Spanish Colonial Revival style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of Prewar Apartment House (Type B) and Spanish Colonial Revival style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

In the decades before World War II, the rising demand for housing in West Hollywood was increasingly at odds with the general cultural preference for single-family development, reflected by zoning practices adopted during this era. During this paradigm shift, the construction of architecturally distinctive and compatibly scaled multi-family housing was generally well received.

Higher density luxury construction was a priority as West Hollywood became a fashionable and desirable place to live. Two- to five-story prewar apartment houses increased the number of rentable units on a lot. In addition to their architectural styling, features such as landscaping, signage, communal amenities, and a unique building name (like "La Fontaine") helped to attract tenants. (See continuation sheet.)

Page 3

***NRHP Status Code 5S3**

***Resource Name or #:**(Assigned by Recorder) 883 N West Knoll Dr

Recorded By: Amanda Duane **Date:** 8/26/2023 ☒ Continuation ☐ Update

B10. Significance (Continued from Page 2): The Spanish Colonial Revival style blends multiple historical styles and influences, including the architecture of rural Spain and colonial Mexico. The style became widely popular in Southern California after the 1915 Panama-California Exposition in San Diego. The style is characterized by asymmetrical massing, gabled roof forms, clay tile roofs, stucco exteriors, and metal ornamentation such as wrought iron grilles.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains all necessary aspects of integrity from the period of significance.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a 1-story single-family residence in the Tudor Revival style built in 1927. The building is O-shaped in plan. Exterior walls are stucco. There is an interior brick chimney. Ornamentation consists of a Tudor-arched porte-cochere, decorative half timbering, and carved wooden brackets. The building has a hipped roof clad in wood shake with flush eaves. Windows consist of single- and multi-light wood casement windows. The primary entrance is located within a recessed entryway and consists of a single wood door. Landscaping includes a lawn and foundation plantings. There is a set of steps and a side driveway that runs along the west edge of the property.

*B10. Significance: Theme Single-Family Residences and Secondary Dwellings; Period Revival: Tudor Revival B10 Area: West Hollywood

Period of Significance: 1895-1925; 1924-1942 Property Type: Residential Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of the Tudor Revival style.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it is an unremarkable example of the Tudor Revival style, and does not appear to have an important association with residential development in West Hollywood; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity

A Historical Resource Evaluation was prepared in 2018 in anticipation of a proposed redevelopment project. The assessment concluded that the property was a typical example of the Tudor Revival style and did not appear eligible for listing in the local, state, or national levels. GPA concurs with this finding.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. While it possesses some character-defining features of the Hollywood Regency architectural style, research indicates that these features are the result of later alterations to a 1925 residence rather than a fully realized, cohesive design. While many examples of Hollywood Regency were the result of later remodeling, the property only possesses very basic features of the style. Therefore, it does not embody any particular architectural style and lacks the aspects of integrity essential to conveying any potential significance from its earlier date of construction.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the integrity of design, workmanship, and materials have been diminished by the remodel of the building with Hollywood Regency features.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This is a single-family residence in the Craftsman style with Early American Colonial Revival influences built in 1923. The building is irregular in plan. Exterior walls are wood clapboard. The building has a side-gabled roof clad in composition shingles with eave returns. Visible fenestration consists of non-original jalousie windows within original openings. The main entryway is centered under a projecting porch supported by turned wood posts. The entry is a single wood-paneled door and is accessed by a set of shallow concrete steps.

The building has a front yard with a central concrete walkway, grass, and trees. The front of the property is surrounded by a brick and metal fence with a hedge. A side driveway runs along the south edge of the property.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This property consists of two cottages on one parcel. The front cottage is a 1-story single-family residence with Storybook influences built in 1937. The building is square in plan. Exterior walls are stucco. Ornamentation consists of a bay window surrounded by vertical wood siding with scalloped edges, wood window shutters. The building has a high-pitched hipped roof with shallow open eaves and exposed rafter tails. Windows consist of diamond-light and multi-light wood casements. The main entryway is sheltered within a shallow recessed porch and consists of a partially glazed wood cross-braced door with diamond-lights. The entry porch is supported by narrow wood posts and enclosed with a simple wood railing. The property has a front yard with a lawn, mature trees, and concrete walkways leading to both cottages.

The rear cottage is not visible from the public right-of-way but appears to be similar in design based on satellite imagery.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of multi-family residential development.

Upon further research and evaluation, it is ineligible for listing in the National Register and California Register or for designation as a West Hollywood Cultural Resource through survey evaluation (6Z). It does not appear to meet the criteria for significance under national, state, or local landmark programs. Although intact, it is not a fully realized example of any multi-family property type or residential architectural style from the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts; therefore, it is not emblematic of the residential development patterns that comprised the growth of West Hollywood.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property retains integrity.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This property was identified in the 2022-2023 reconnaissance survey as a potentially significant example of a Craftsman single-family residence.

748 Willey Lane appears eligible for designation as a West Hollywood Historic Resource (5S3) as an individual property through survey evaluation. It is significant in the context of Residential Development and Residential Architectural Styles under local criteria A3 and A1 for representing residential and cultural patterns that comprised the early growth of West Hollywood and as a good example of the Craftsman style. As this type of building is rare in West Hollywood but ubiquitous throughout the region, the property appears unlikely to meet state or national thresholds for significance.

It possesses most character-defining features of the Single-Family Residence property type and Craftsman architectural style, as outlined in the 2024 Historic Context Statement of Residential Properties in the R2, R3, & R4 Multi-Family Zoning Districts.

With the completion of the Los Angeles Railway route to the area in the 1890s, two concentrations of residential buildings formed: one to the west around the townsite of Sherman and one further east, adjacent to Hollywood. In these early years, residential development primarily consisted of modestly scaled vernacular and Craftsman style single-family homes, but this would soon give way to more density and multi-family construction.

Single-family residences would remain the predominant housing type through the 1920s, when multi-family residential construction began to overtake construction of new free-standing homes. Early attempts to increase density included building small, secondary dwellings, generally to the rear of a lot occupied by an existing single-family residence. (See continuation sheet.)

☒ Continuation

☐ Update

B10. Significance (Continued from Page 2): The Craftsman style originated with the Arts and Crafts movement in the United Kingdom. The innovative designs of architects Greene & Greene in Southern California brought the style to the United States, and the publication of their work in books and magazines helped make it the most popular domestic architectural style in the country through the early 1920s. The style is characterized by low-pitched roofs with wide, overhanging open eaves, prominent porches, and wood shingle or clapboard exteriors.

Based upon a review of available documentation (such as building permits, Sanborn Maps, and satellite imagery) as well as visual observation from the public right-of-way, the property has undergone minor alterations but retains sufficient integrity to convey its local significance.
